A new kind of overshoe for farmers

The "U.S." Walrus: watertight as a rubber bootas warm and easy to slip on as an arctic

HE combination you have always needed-something to keep your feet dry and warm and yet easy to slip on and off! Here it is-the new U. S. Walrus.

This new overshoe slips on and off easily over your leather shoes. Its warm, fleecy lining keeps your feet comfortable in the coldest weather. And its smooth rubber surface can be washed off as quickly and cleanly as a boot.

The comfort and convenience of this new overshoe are backed by real strength. Made by the oldest and largest rubber manufacturer in the world, the U.S. Walrus is built for the roughest wear. Its sole consists of five layers of the finest rubber. All other points where the strain comes are reinforced.

Ask your dealer to show you the U.S. Walrus. After you've worn them you'll realize why farmers everywhere are buy-

Other types of "U. S." Footwear -built for rough service

U. S. Boots have the wear and comfort which the accumulated improvements of 74 years have given them.

U. S. Bootees lace on over the sock like a leather shoe. You can wear them all day long in the wettest weather. Your feet will stay dry and comfortable.

There is a U.S. model for every need -arctics, rubbers, "overs." Every one has been designed by experts-every one is backed by over half a century of experience. Always look for the U.S. Seal - it means solid wear and long service for your money.

United States Rubber Company

Look for this seal (15) on all "U.S." Footwear
