Mr. and Mrs. Christian Brubaker had as their guests on Easter: Mr. and Mrs. John Brubaker and family and Mr. and Mrs. John Metzler and family.

Many of our young folks attended the special Easter and Palm Sunday services at Manheim and Mount Joy. The observance of this brought this thought to my mind. Any denomination or religious organization who has its place of worship closed most of the time allows its members and young folks to be attracted elsewhere when they ought to worship at their parent's church, will eventually without a doubt lose many of its young folks and its members. What do you as readers say?

BEWILDERING TO THE MIND

Everyday Measurements of Science That Are Almost Beyond Comprehension of the Layman.

One great difficulty in the study of astronomy is to comprehend the immensity of the distances and sizes involved. For instance, we can form no conception of the size or distance of the sun.

Suppose there was a spherical shell of the diameter of the sun. Suppose a great globe should drop into this shell, every second night and day, a ball the size of the earth. How long would it take to fill the shell? Would it take an hour, a day, or a week? In fact, it would take two weeks, and when full the shell would contain more than 1,000,000 earths.

The distance to the sun is 93,000,000 miles. How long would it take a cannon ball to reach the sun, if shot from the earth, and continued on its course at a uniform velocity? In order not to underestimate the distance some might say a year. In fact it would take 1,000,000 earths.

Astronomically speaking, the above distance is very short. The sun is our nearest star. Strain the imagination by trying to comprehend the velocity of light which would pass seven times around the earth in one second of time. Now stagger the brain by trying to think of stars, so remote from us that a million years are required for their light to cross the enormous abyss that separates them from us. Think of it! When that ray of light, which now enters the eye, started on its course, perhaps there was no life on this earth.—John Candee Dean in the Indianapolis News.

THE QUESTION OF FURNITURE QUALITY

There are few things that quality effects so vitally as furniture.

Often things that people buy for personal wear and for home use are not always expected to last a long time, but this cannot be said about furniture. When you buy furniture you are buying something you expect to render you long service. It will if you buy it here, because here we think of quality first. All the furniture we buy must measure exactly up to requirements which we make as to the manner of workmanship. And, after all, in the long run, well-made furniture is the cheapest sort of furniture to buy. We invite comparison, look around, compare qualities and prices and then come here and see our vast assortment.

REFUSED HAND OF SULTAN

Offer of Marriage by Ruler of Sulu Was Turned Down by Alice Roosevelt.

The Moro is not all bad. He has his good points. There has never been a case where a Moro has murdered an American woman, and there are many American women in Moroland. This abstinance, however, is not due to Moro chivalry, but to the fact that in the Moro thought women have no souls.

Not that the believed soullessness of the sex keeps the Moro from being a ladies' man. In fact, he is inclined to be very gallant. The famous visit of the Taft party, accompanied by the then Miss Alice Roosevelt, some years ago (and long to be remembered in the Philippines), was attended by a characteristic exhibition of Moro gallantry. When this party visited Sulu—a trip to the islands would be complete without visiting this picturesque island—his royal highness, the sultan of Sulu, immediately offered his hand in marriage to the daughter of the President. He addressed her as the American princess, and the name of Princess Alice still clings to her in the Philippines. The fact that his highness already had a couple of dozen wives scattered around the town was no deterrent in case of a Mohammedan monarch.

ENCOURAGING THE HEN.

The modern method of increasing the quantity of eggs that may be obtained from hens is turning on electric lights in their pens in the middle of the night, thereby awakening them, to the end that they eat an extra meal before the light of laying an egg a day, week after week. One cannot but think that this lengthening of the working day for hens is a device of the same genius who discovered that there was no need of arising at dawn to feed the poultry. He simply waited until after the benighted denizens had gone to roost, and then scattered their morning meal. The hens found their breakfast waiting for them in the morning while the ingenious one arose and went about the affairs of the day only when he felt so inclined. No chauticleer called him to work.

"Automobile" Street Car.

Mechanical arrangement similar in many respects to that of an automobile is the distinguishing feature of a new form of gasoline-driven interurban car described in Popular Mechanics Magazine. Though the body, seating 35 passengers, is like that of a standard modern street car, there is a long hood extending in front, in which the 50-horsepower engine is mounted. An auto-type gear shift is provided, and a shaft transmits the power to the rear wheels. Air brakes, electric lights, and a hot water heating plant are other details of the equipment. The car makes a round trip of 40 miles in a little more than two and one-half hours, consuming about five and one-half gallons of gasoline, or one gallon to seven miles.

Too Late.

"Ah!" exclaimed the fallen baseball star as he wiped away a tear. "If I had only thought about that song the young people were singing when I was a bush league player!"

"What was it?" asked a sympathetic friend.

"'Take Back Your Gold!'"—Birmingham Age-Herald.

Bad Housing and Tuberculosis.

Because of lack of housing in New York City, the city health commissioner, fears an increase in the tuberculosis mortality rate. He says insanitary conditions create an excellent field for the spread of disease and are sure to result in a moral and mental degeneracy.
