Another Big Canned Fruit Sale

This is the second sale in a comparatively short time wherein we have been able to offer our customers unusual values in Canned Fruits. Coming as this sale does just before the great National Holiday, it affords many economies in stocking the picnic basket. We guarantee every can to be our usual standard of quality, and at these SPECIAL DOZEN PRICES it will pay every housekeeper to lay in a generous supply.

MOUNT JOY, PENNA.

Our reg. 15c can **Grated Pineapple** cut to 11c doz \$1.25
A delicious dessert—ready to serve. Mighty nice for Sherbets, Ice Cream, Puddings, etc.

Fancy Calif. Peaches, can	23c doz	\$2.65
Extra Fancy Calif. Peaches, can	29c doz	3.40
Hawaiian Sliced Pineapple, med can	23c doz	2.65
Hawaiian Sliced Pineapple, big can	29c doz	3.35
Hawaiian Grated Pineapple, med can	19c doz	2.20
Choice Calif. Apricots, can	15c doz	1.75
Fancy Calif. Apricots, big can	25c doz	2.90
Calif. Sliced Peaches, can	16c doz	1.85

Fancy Sugar Plums cut to 12c doz \$1.40
York State ripe fruit of excellent quality; if you like plums you will enjoy these.

Good Things to Eat for July 4th

Uneda Biscuits, pkg	6c
Best Pink Salmon, can	9c
Choice Sardines, 3-5c cans	10c
Sour Pickles, big bot	18c
Fancy Queen Olives, bot	12c, 22c
Fancy Stuffed Olives, bot	13c, 23c
Sweet Pickles, bot	18c
Pure Jelly, glass	10c
American Maid Catsup, bot	10c
Table Mustard, glass	7c
"Asco" Pork and Beans, can	11c, 16c
Potted Meats, can	5c, 10c
"Asco" Dried Beef, pkg	10c
"Asco" Peanut Butter, glass	9c
Rich New Cheese, lb	21c
Assorted Fruit Jams, jar	15c
Pure Grape Juice, pt bot	29c
Best Red Salmon, can	30c
Princess Salad Dressing, bot	25c
Butter Thin Biscuits, pkg	13c
Wax Lunch Paper, roll	4c
Nabisco Waters, pkg	10c
"Asco" Pork and Beans, can	6c
Kraft Cheese, can	12 1/2c
"Asco" Mustard, jar	12c

"Asco" Coffee lb 25c
If you are particular about your cup of coffee, try a pound of our famous "Asco" Blend. We know its rich, rare flavor will please you.

Victor Bread Big Sandwich 6c
Loaf
Why bake these hot days when you can buy "Victor" the loaf that is equal to the best home-made you ever ate. Try it.

It is not to be expected that Hartford Tires and Tubes will be found at so called "bargain prices."

Into Hartford Tires are built all the years and all the ability of Hartford experience, running back to before the time the first automobile was built.

Hartford developed the single tube bicycle tire.

Out of this tire developed the fabric that is now being used in automobile fabric tires all over the world.

Hartford Tires cost you no more to begin with than any good tires.

And for every dollar you pay for Hartford Tires you get a full dollar's worth of service in return.

Information for the Farmer

CLEAN-UP WEEK A FEATURE WITH MODERN TOWN DWELLERS

The spring clean-up time, now a regular annual feature of town and city life, can not be observed on farms in the same season because of more pressing work. Efforts are made constantly, therefore, to encourage picking up the odds and ends about the farms in the slack time between fall planting and early spring. In many towns, however, the home demonstration agents give their organizing ability to furthering such work in the early weeks of spring.

In Spokane, Wash., a campaign called the "Alley and Back Yard Beautiful," began in 1919 to extend through five years. This work was initiated and guided by the city home demonstration agent, whose reports show excellent progress. Newspapers give constant publicity to the work, urging the repairing of screens, windows, and outbuildings, and the planting of shrubbery, trees, and flowers. In 1920, in the city of Spokane, more than 8,000 grape cuttings and rooted plants were set out. The chamber of commerce supplied thousands of circulars drawing attention to the duties of citizenship, particularly for home owners. In many yards, as a result, there are to be seen purple grapes, the stately hollyhock, the modest foxglove, and many other flowers growing inside freshly painted fences. In one yard, 50 by 142 feet, the hitherto neglected vines produced more than a ton of grapes last year. In the work this spring Spokane is being districted for a beautification campaign to be conducted precisely as the Liberty Loan campaigns were carried forward during the war, each district under a captain, with a team, reporting regularly on conditions.

BROKEN APPLE BOXES RESULT OF TOO FEW NAILS

Apple growers, finding that a certain standard type of bushel boxes in which they have been shipping fruit broke in many instances before it reached the market, recently asked the Forest Products Laboratory of the United States Department of Agriculture to investigate the cause of the breakage.

Several of these standard apple boxes packed with fruit as for shipment were tested in the revolving-box drum at the laboratory. Before they had gone a "journey" of average length in the machine most of the boxes had broken open and the drum was dripping cider. On investigation it was found that usually the parts of the box to loosen and give way first were where the four nails were holding an edge. Two more nails were therefore driven into each nailing edge of the remaining boxes. With this simple change the boxes stood just about twice as much rough handling.

Inadequate nailing is the chief fault of almost all the boxes examined by the laboratory. A few more nails would save shippers millions of dollars of fruit losses annually.

WHICH WILL LAST LONGER SPLIT OR ROUND FENCE POSTS?

Some people believe split fence posts last longer than do round ones. Probably as large a number hold the opposite view. The Forest Products Laboratory of the United States Department of Agriculture says that one will last about as long as the other if the percentage of heartwood and sapwood are the same in both. If the percentage of sapwood is increased by splitting, the split post will be less durable, while if the percentage of heartwood is increased it will be more durable than the round one. Exceptions to this should be made if the posts are of spruce, hemlock, or any of the true firs, whose heartwood and sapwood are about equal in size.

If the posts are to be treated with creosote or some other preservative, the round post is preferable to the split, because of the comparative ease with which the sapwood can be treated. Experiments at the laboratory demonstrate that the heartwood faces on split posts do not, as a rule, absorb the preservative as well as does the sapwood.

SEED POTATOES PEST ACTIVE IN NORTH CAROLINA FIELDS

A very serious outbreak of the seedcorn maggot, or bean fly, in seed potatoes in the eastern part of North Carolina, covering Pitt, Tyrrell, Beaufort, and Pamlico Counties, has been reported to the United States Department of Agriculture through the insect-pest survey work being carried on by the Bureau of Entomology. Damage from the pest was first reported late in March, and the insect is still at work, the maggots attacking the seed potatoes in the soil before they sprout.

Careful counts made by entomologists in the infested fields have found that 85 per cent of the seed has been destroyed, which has necessitated replanting or abandoning the crop. It is estimated that in the infested region the crop will be reduced 50 per cent by the depredations of this insect. The infested region lies in the low coastal soil. The weather this spring has been abnormally warm in that region, especially since March 1.

The insect, according to entomologists of the Department of Agriculture, is found in practically all sections of the United States, and much investigational work has been done to find a remedy for its destructive attacks on seed potatoes. No single remedy, however, it is said, has been found that will wholly check the pest.

CAMPAIN INCREASES USE OF MILK BY CITY CONSUMERS

The use of milk was increased, as a result of a campaign held in Winston-Salem, N. C., recently, to such an extent that on account of the large volume of business dealers were able to distribute the milk at 10

cents a gallon less. The campaign was one of a series which is being conducted in various States by dairy specialists of the United States Department of Agriculture in co-operation with State and local officials.

Before the campaign was conducted a survey was held in Winston-Salem, and it was found that the per capita consumption of milk was less than one-half cup per day. Many school children were undernourished. The health authorities, who were actively assisting in the campaign, weighed and measured 1,866 white school children and found that 16 per cent were underweight, which indicated insufficient nourishment. Similar records were taken with 1,806 colored school children, and 15 per cent were found to be underweight.

During the week of the campaign an effort was made to determine the number of school children who received milk daily. Of the 5,647 grade children questioned, it was found that 2,198 received milk daily, and 2,123 drank no milk, while 2,427 were receiving tea and coffee.

BRANCH OFFICE FOR WAREHOUSE INFORMATION

A branch office for investigational warehouse work and to facilitate the licensing of warehouses for the storage of cotton, grain, and wool will be established June 1 at Dallas, Tex., by the Bureau of Markets, United States Department of Agriculture. This office will be under the direction of Mr. R. L. Newton.

Under the United States warehouse act such public warehouses may be licensed by the Secretary of Agriculture. The warehouses are operated under a system of Government supervision similar to that provided through the operation of the national bank system. The purpose of the act is to standardize warehousing practices and to provide a form of warehouse receipt which shall be uniform in terms and conditions, and of which there is reliable evidence of the quantities, kind, ownership, and other conditions of the product for which it is issued. Such receipts are acceptable as collateral for loans and have been approved and recommended by Federal reserve officials and others interested in financing warehoused cotton. Insurance companies have also lowered their fire insurance charges on cotton stored in Federally licensed warehouses as against warehouses that are not licensed.

VALUE OF MILK IN THE DIET SHOWN WITH RAT EXHIBIT

A striking exhibition of the value of milk in the diet has been prepared by the Dairy Division of the United States Department of Agriculture for use in educational milk campaigns. The exhibit consists of two stuffed and mounted rats, one a large boned healthy specimen, the other an undersized weakling with skin clinging to its poorly developed bones. The illustration compares an adequate diet containing all the food essentials with an inadequate, poorly chosen diet, lacking some of the food essentials. The large, well-developed healthy rat had its cereal diet supplemented with milk, and the advantage accruing is shown by the well-developed tissues, muscles, and bones, the smooth hair, the bright eyes, and the healthy color of the living rat. The protein of milk is capable of building muscular tissue. The mineral of the milk, especially lime, builds strong bones, and the food accessories (vitamines) of the milk insure growth and health.

The small rat was deprived of milk and other adequate sources of these necessary food constituents, hence the weak, gelatinous bones, thin muscles, lack of growth, and constant loss in weight and size. Both rats had wheat biscuits, but only one had milk with the biscuits. These rats were chosen from two cages, each containing six rats. On March 24 each group weighed 485 grams. All rats were young and of the same age. On May 4 both groups were again weighed. The six rats receiving milk had gained 542.5 grams. The others showed a loss of 17.1 grams each, or 102.7 grams for the lot of six.

This is not considered a scientific experiment, but a simple exhibit to show the effects of an inadequate diet, as proved by experimental research.

MARINES' SUPPLIES TO BE INSPECTED AT SIX PORTS

Fruits, vegetables, and butter for the Marine Corps are now being inspected by Bureau of Markets inspectors at New York, Boston, San Francisco, San Diego, Hampton Roads, and Philadelphia. For some time past the Bureau of Markets has inspected perishable food products for the Navy at these points, in accordance with a special arrangement between the Navy Department and the Department of Agriculture.

These inspections are made for the purpose of determining whether produce offered complies with the terms of the contracts. The inspectors have power to reject deliveries which do not come up to specifications or to suggest "cuts to and losses which will be sustained because of off-grade or improperly packed products.

It is expected that the heaviest work for the marines will be done in New York City, where potatoes and onions will be inspected for shipment to Haiti and San Domingo. These shipments amount to about 200,000 pounds of potatoes and 50,000 pounds of onions each month. The particular difficulty at this time of year is to get old stock that is not sprouting, as new potatoes and onions do not "hold up" well for long shipments into tropical countries.

Will Hold a Festival
A festival will be held in the park in this place on Saturday, July 2, under the auspices of the Camp Fire Girls. There will be music and many good things to eat.

Fordson

Put it to any Power Task

While the Fordson Tractor has power in plenty to drag plows and harrows through the heaviest soil, it is light enough, small enough and so easily controlled that it can handily be put to many tasks about the farm, that will save you time, money and work.

In fact the Fordson will do every power job, both draw-bar and belt, more quickly and at less cost than it can be done with any other form of power. Every month the whole year 'round there's dependable Fordson will prove itself a paying investment, because of its capabilities, its economy and efficiency.

We will gladly explain and demonstrate to you the many Fordson money-making, time-saving features. Call, write or phone.

FARMERS ATTENTION!

This is the week when EVERYBODY is busy.

FARMER'S don't have time to look around.

We, therefore call your ATTENTION to our FULL LINE OF HAY and HARVESTING MACHINERY.

5 and 6 ft. McCORMICK and DEERING MOWERS.

7 and 8 ft. McCORMICK and DEERING BINDERS.

KEYSTONE CYLINDER HAY LOADERS.

INTERNATIONAL SIDE RAKES and TEDDERS.

Special readjustment prices on the above.

SWAYNE ROBINSON "MONEY MAKER" 17-22 HAY PRESSES.

We also have a few good values in SECOND HAND TEDDERS and BINDERS.

We have at your beck and call several expert MECHANICS and when you need them, telephone.

Our warehouse contains a good supply of REPAIR PARTS and we maintain a quick delivery service for parts needed out of HARRISBURG.

We are here to SERVE you.

Use us when you need anything.

Our WATCHWORD is SERVICE.
