**FEDERAL REPORTS TELL OF WORK OF PENNSYLVANIA FEED CONTROL**  
 The high standard of the control work of the Bureau of Chemistry of the Pennsylvania Department of Agriculture, in the inspection and control of the sale of feeding stuffs in the state, is recognized by the Federal Trade Commission in a recently issued report.  
 The Commission conducted an exhaustive investigation throughout the United States, showing the work that is being done by the various states in co-operation with the Federal authorities and the work of the Pennsylvania Department of Agriculture is selected as one of five states that are held up as examples.  
 The report contains much valuable information relative to the feeding stuffs industry throughout the United States and the book should be of special interest to Pennsylvania stockman and breeders.  
 For the past twenty years the Pennsylvania Department of Agriculture has been actively engaged in supervising the marketing and sale of feeding stuffs in this state and in carrying out the enforcement of the state and Federal pure food laws.  
 Know What To Use And Use It  
 It is no manifestation of economy on the farm to attempt to get a reasonable amount of labor out of a horse with physical ailments which interfere with its proper bodily functions.  
 Poor judgment is likewise displayed when a light willing horse is used on exceptionally heavy work.  
 Either of the foregoing irregularities with regard to efficiency is discontinued by the Pennsylvania Department of Agriculture.  
 The Department also calls attention to another feature in farm management which should receive serious consideration, viz., the selection of the proper kind of harness to use for the accomplishment of work without extra expense or the loss of time.  
 It is more profitable to buy harness that is a little too heavy than to invest money in lighter equipment which gives service under ordinary conditions only for a brief period.  
 Judgment exercised in selecting harness adaptable to the conditions under which it is to be used will make a favorable showing in farm profit and loss computation.  
 Raymond Davis, of Rheims, is making his home with his sister, Mrs. Harry Gail.

**THE PRODUCE AND LIVE STOCK MARKET**

CORRECT INFORMATION FURNISHED WEEKLY BY THE PENNA. BUREAU OF MARKETS FOR THE BULLETIN

Herewith is a corrected weekly report of the Lancaster markets relative to produce and live stock:

**LABORATORIES HAVE BUSY MONTH.**  
 The laboratories of the Bureau of Animal Industry of the Pennsylvania Department of Agriculture were rushed during the month of October, the reports showing that 132 specimens were submitted and examined for the determination of the presence or absence of disease.  
 Of thirty-three specimens submitted where glanders was suspected, negative results were obtained in each case. Thirteen specimens were sent to the laboratories to determine the presence of rabies. Eight were positive specimens and five were negative. Infectious abortion made up the greatest number of cases, there being thirty-seven such specimens submitted and of this number, 21 were found to be positive.

**Who Wants This?**  
 Is there a tenant farmer around here that wants to make as much money with less work than he is doing now? Here you are. A 30-acre farm 1/2 mile from Manheim, best of gravel land, good buildings, an abundance of fruit, fine water. This would make a dandy truck farm as it is close to markets. Don't delay; act quick as I am going to turn this farm--Call and write J. E. Schroll, Mt. Joy, Pa.
