They's Always Something!

Do they come back?

before
after
I'll say they do -
The Milk Scale tells the Tale -

YOUR cows get tired of unpalatable feeds—their production falls off but Oh Boy! How they do come back and fill the old milk pail brim full when you begin to feed Sugared Schumacher. It sharpens their appetite—they eat it with a relish—they don't go off their feed—they improve in health and their better condition is reflected every day in the milk pail. Come in and let us tell you all about it.

SUGARED SCHUMACHER FEED

It is made by the Quaker Oats Co., the largest feed manufacturers in the world. Our prices are particularly attractive just now.

FARMERS' COLUMN

PROMPT ACTION AGAINST HOG CHOLERA SAVES HEAVY LOSS

Watch for the first hog to show signs of cholera, advises the United States Department of Agriculture. If the herd is treated immediately it is generally possible to save the herd with but few losses. If the disease, however, is allowed to reach all the animals before the serum preventive treatment is applied heavy losses may be expected. Antihog-cholera serum is a preventive and not a cure for hog cholera, the department points out.

Whenever a hog dies of an unknown cause the owner should watch his herd closely for at least a week, and if any more hogs in the herd begin to show signs of sickness a veterinarian should be called immediately, for the chances are that hog cholera has reached the herd and prompt action in applying the serum treatment is the only thing that will save the well animals. A high temperature, ranging from 105 to 108 degrees F., in a hog that staggers when it walks is a pretty good indication of hog cholera. Such hogs should be segregated and not allowed to mingle with other hogs or to wander about for they will spread the disease wherever they go, sometimes in places where it is impossible to disinfect. Hogs that die on the farm should be buried, or, preferably, burned, in order to prevent birds, insects, and animals that visit the carcass from spreading the disease.

Usually the disease is most prevalent during the fall months and losses are invariably heavy in herds where owners neglect to immunize their hogs before the disease reaches them, or fail to call a veterinarian immediately on its first appearance.

HAILSTORMS KILL STOCK AND HURT PEOPLE ON TRAIN

Speaking of hailstorms, it is seldom that even the oldest inhabitant can beat this report sent in to the United States Department of Agriculture by one of the field workers at a station in Colorado.

"Most of the hailstorms have occurred since the winter wheat was harvested. In some sections such severe storms were experienced that corn and row crops were cut to the ground, small pigs and poultry were killed outright, and buildings were severely damaged.

"A St. Louis and Denver train on the Burlington line was caught in a very severe storm and was compelled to stop until the storm passed over. During the storm all the windows and ventilators on the north side of the coaches and many of those on the south side were broken out. The hailstones were said to be simply pieces of rough ice, many of them the size of hens' eggs. The stones were so large and driven with such a strong wind that they went through both sashes and screens in the Pullman car coaches. Where the curtains were pulled down as a last resort, they were ripped to shreds.

After the storm the hail was said to be several inches deep over the floors of the cars, and when the train was finally able to pull into Akron, a distance of 4 miles, many of the passengers were given medical treatment for scratches made by flying glass and bruises from the hailstones. The train was abandoned at Akron and a new train made up to carry the passengers on east."

ENEMIES OF CATTLE DIPPING HELP REPAIR DAMAGED VATS

Wanton destruction of cattle-dipping vats in Echols County, Ga., early in the summer, interrupted systematic eradication there only temporarily, according to the United States Department of Agriculture. As events turned out, many persons who opposed the dipping of cattle are now engaged in repairing the vats and in building new ones so that their cattle can be dipped regularly and conveniently at points near their homes. Although the destruction of vats by a lawless element was given wide publicity throughout the country, records of the Department of Agriculture show that during the month of August practically all the cattle in Echols County were dipped under Federal or State supervision.

Most opposition to the eradication of cattle ticks results from unfamiliarity with the purpose and benefits of the work or from unwillingness to receive information on the subject. More than 15 years of experience in conducting systematic dipping has enabled the Department of Agriculture to meet all situations and opposition encountered up to the present time. The usual educational work is generally effective, but additional persuasion combined with law enforcement is at times necessary.

Both eggs and poultry are recognized as among our most valuable foods, but the United States Department of Agriculture is setting out to find definite information regarding their vitamin contents. Experiments are being carried on with rats and pigeons to show how they compare in this respect with beef, pork, and other common foods.

EGGS AND POULTRY PLENTIFUL FORECAST FOR THIS WINTER

This fall and winter eggs and poultry will be plentiful and prices should be low enough to make them econo-

mical. Just now storage houses are full of eggs and farmers have increased their flocks of poultry to an unusual extent. On August 1 there were 4,812,248 cases of eggs in storage, which is about 35 per cent more than the average at this season for the last three years.

Eggs start moving out of storage in summer and the greatest sales of such eggs come in fall and early winter. As a rule, the bulk of storage eggs are sold before the 1st of January, the activity of the market after that date depending on whether the weather is severe or mild enough to stimulate egg production. An open winter practically eliminates the storage egg early in the season. But this year, regardless of the state of the weather, eggs should be available at very reasonable prices for the rest of the year. Prices to the farmer, however, have now reached a low point on both eggs and poultry, and he is not marketing poultry freely, but is holding his birds for better prices or using them on the table at home. Poultry fattening stations that are usually crowded at this season are now only about two-thirds full.

COUNTY ASSESSOR'S FIGURES AID EXTENSION-WORK PLANS

In making county and community programs of demonstrations and other extension activities for the year, extension agents in Oklahoma report to the United States Department of Agriculture that the use of county census and assessor's figures as a basis for determining the county's major agricultural problems is proving very successful. A meeting of the men and women from each community is called each year by the county agricultural agent for the purpose of making a program for the year's extension work.

In these meetings it has been found that these figures are of great service in showing agricultural conditions of the county in a concise and comprehensive way. In one instance it was found that about 51 per cent of the county's agricultural land was farmed by tenants. Discussion brought out the fact that the Federal farm loan was practically unknown in the county and plans were made to conduct a campaign to bring the benefits of the loan to the attention of the communities as a possible means of securing a greater percentage of farm ownership.

Figures showing that more acres in the county were being planted to wheat than any other crop started a discussion which indicated there was a difference of opinion as to the best variety for the locality; it was therefore decided that demonstration plants of the best-liked varieties of this crop be grown in eight sections of the county. In a similar way all the figures covering the agricultural activities of the county are studied in these program-making meetings, and as a result a program is made which is based on what statistics have shown to be the most urgent needs of the communities and in which general interest throughout the county is felt.

CIRCLER
MORE THAN A BRASSIERE
NO. 1111
STANDARD QUALITY
PRICE \$1.00
The Circler is more than a brassiere. It's self-adjusting and simply slips over the head, clasps at the waist and under-arms and smooths out ugly lines.
If your dealer can't get it send actual bust measure, name, address and \$1.00. We'll send the Circler prepaid. Sizes 34 to 44.

CRAMPS, PAINS AND BACKACHE

St. Louis Woman Relieved by Lydia E. Pinkham's Vegetable Compound

St. Louis, Mo.—"I was bothered with cramps and pains every month and had backache and headache and I could not work. My mother and my whole family always took Lydia E. Pinkham's Vegetable Compound for such troubles and they induced me to try it and it has helped me very much. I don't have cramps any more, and I can do my housework all through the month. I recommend your Vegetable Compound to my friends for female troubles."—Mrs. DELLA SCHOLZ 1412 Salisbury Street, St. Louis, Mo.

Just think for a moment. Lydia E. Pinkham's Vegetable Compound has been in use for nearly fifty years. It is prepared from medicinal plants, by the utmost pharmaceutical skill, and superior methods. The ingredients thus combined in the Compound correct the conditions which cause such annoying symptoms as had been troubling Mrs. Scholz. The Vegetable Compound exercises a restorative influence of the most desirable character, correcting the trouble in a gentle but efficient manner. This is noted, by the disappearance, one after another, of the disagreeable symptoms.

Fordson THE UNIVERSAL TRACTOR

Fordson Often Does More In a Day Than Six Horses

The Fordson substitutes motors for muscles.
The Fordson substitutes tractor wheels for the legs of man and horse.
The Fordson takes the burden off flesh and blood and puts it on steel.
It allows the farmer's energy to be devoted to management, and not merely to operation. It gives him time. It cuts his producing costs.
There's a big story of savings made possible by the Fordson. Let us tell you. Write, phone or call.
