HOME GREETING MEANS MUCH

Children Apt to Remember in After Life the Kind of Reception They Were Given.

Have you ever realized what a difference the home greetings make to the children, make, in fact, to every member of the family? When they come home from school, when they run in from their playing, when they arrive home from a day's outing or a short visit, how do we greet them?

Do we ever say sharply: "Mary, when will you ever remember to wipe your feet?" or, "Dick, why will you persist in dashing in like a wild Indian when I've told you so often about coming in quietly?" or, "Billy, you've ripped a button off. Come here quickly and let me fix it!" Do we quench their enthusiasm, their joy at getting home, by such remarks? Will the children greet so look forward to their home-comings, look forward to their mother? Will they have a picture in later years of a loving, smiling mother, always glad to welcome them back to the home nest, or a stern, scolding, criticizing mother, ready to find fault?

Surely it is worth while to control our manner, our speech, and never let anything prevent us from giving the warm, hearty, loving welcome home we would wish to give our children, our loved ones, making them love the home-comings, says the Delmeator. If faults must be reproved, advise given, save it for other times than the moment of arrival. Let the greeting be hearty and loving, one which will warm the children's hearts at the time and which they will remember with joy in the after years.

LENGTH OF WORKING SEASON BIG FACTOR IN ROAD BUILDING

The length of the working season is a most important element in road construction and one in which there is considerable variation, according to the Bureau of Public Roads of the United States Department of Agriculture, which has collected data from all the states.

Deducting Sundays only there are 313 working-days in the year and Alabama, Mississippi, and New Mexico report that grading is possible on 300 of them. Neighboring States report as follows: Florida, 265; Louisiana, 260; and Texas, 275. Contrasted with these are Maine, with 110; New York, 150; Wisconsin, 153; and western Oregon, 100. In 14 States grading will probably be impractical after the middle of November, and in some of them at an earlier date.

Gravel surfacing can be placed in most of the States from 120 to 200 working days, although 10 of them report a greater number.

In 26 States concrete surfacing can be placed on from 100 to 150 days, and in 16 States on from 150 to 200 days. In 28 States the season is generally over by November 1.
