To See Us

There is no Substitute for Quality

Automobile bodies, like houses, may be either strong, sturdy and durable, or light, flimsy and weak. Like houses, good bodies are expensive, and makeshifts are cheap. Prices influence sales of automobiles, as they do of houses, but highest quality and lowest price are possible in neither.

There is no substitute for quality.

To cheapen quality of materials, construction and finish is not Studebaker policy. A makeshift product is fatal to permanent success. Studebaker bodies are built to withstand for many years the exposure and use to which an automobile is subjected. Better bodies are not built by any manufacturer nor borne by any chassis. Studebaker's reputation is at stake in body building.

Studebaker body plants in Bend, Indiana, alone contain square feet of floor space, represent investment of \$7,000,000, employ people, and are the largest body owned and operated by any manufacturer in the industry. We believe, as experienced and content to build good bodies at costs as any plants in existence of Studebaker cars get the best investment, experience and

The broad principle upon which Studebaker business has prospered for seventy-one years, and upon which we now conducted, insures satisfaction to everybody who deals with the Studebaker.
