

HOW OUR REPRESENTATIVES MAKE THE NATION'S LAWS

What happens to the thousands of bills introduced in Congress, and how do those that are finally passed succeed in seeing the light of day?

In our latest booklet of the series on Our Government we tell the story of just how Congress goes about its work, together with some interesting sidelights on the customs which have an important bearing on our legislation.

This booklet is the last of the stories of Our Government. We are contemplating a new series of articles that will be equally interesting and instructive. We shall be glad to put on our list the names of all those in this community who wish to receive them.

HAVEN FOR MICE

Small Rodents Said to Infest New York's Skyscrapers.

According to Truthful Janitors, They Burrow Into Steel and Concrete, and Establish Homes.

A stenographer on the third floor of a downtown office building recently aroused considerable comment by climbing on top of her desk and waving her arms around in the air and crying loudly for someone to save her. She had seen a mouse. Now, mice to turn up in old places in New York that etc.

It is of recent newspaper record that one came out of the stony walls of the aquarium and fell into the shark tank and another mouse is reported as emerging inside the Statue of Liberty, up near the top, and looking at a party of school teachers and starting a disturbance in which several of the teachers were badly shaken up.

"Mice!" exclaimed the head janitor of a steel and concrete skyscraper. "Is that the first mouse you ever saw round this joint? Listen, I bring five cats to this place so far, and I been on this job just three weeks."

"Yes," replied the investigator. "And how have they come out?" "You mean how have they gone out. You never saw cats go out of a place second street skyscraper. The woman in charge of a roomful of girl dinz clerks looked up to find her force suddenly begin to conduct itself in a way she never approves under any circumstances.

Three girls began to walk upon the tops of their desks. Three more shinned up the sides of filing cabinets. Another girl stood in a waste basket and called for the police. And the rest cried about the office in a riotous manner.

The department head looked upon all this as a breach of discipline. She arose and went down into the heart of the riot, intending to say so. But as she there she changed her mind, she let out a whoop and traveled half way across Manhattan island, and picked up her skirts and fled.

A mouse had come out of the fresh-air shaft looking for a cat.

Island Religious Shrine. Star Island, one of the Isles of Shoals, ten miles off the mainland of New Hampshire, has been dedicated exclusively to religious service for 129 years. On its rocky summit is a small graystone church which was built in the year 1800. This has been used ever since as a place of worship, first by fishermen's mothers, sisters and sweethearts who prayed for the safe return of their loved ones.

During the last 26 years it has been a shrine for Unitarians and Congregationalists. At ten o'clock each night long lines of men and women, carrying small lanterns, wind their way thither and, a churchful at a time, hang their lanterns on the walls, and bow their heads in prayer or raise their voices in appropriate hymns.

But Not His Perfumery. Bobby, a five-year-old citizen of Irvington, had been suffering from quinsy and the specialist found it necessary to give the lad ether when he lanced his throat, says the Indianapolis News. As soon as Bobby had sufficiently recovered, plans were made to have the offending tonsils removed. In order to smooth the way, Bobby's mother said:

"Now, Bobby, the same kind doctor who took away the pain from your throat last week is coming again to remove your tonsils, so that you will never have another sore throat. You liked the doctor, didn't you?"

After a short pause during which Bobby's face showed signs of unpleasant reflection, he answered: "Yes, I liked the doctor all right, but I didn't like his perfumery."

Palladium and Platinum. In the investigation of methods for assaying platinum, conducted by the bureau of mines, recent experiments have developed that with certain ores, especially when the quantity of platinum is considerable, nitric acid will not effect a separation of platinum and palladium. A method which has been found to be accurate and result in a complete separation of the metals is described in Serial 2000, "Separation of palladium and platinum by means of dimethylglyoxime obtainable from the bureau of mines, Washington, D. C.—Scientific American."

Who Wants This. Is there a tenant farmer around here that wants to make as much money with less work than he is doing now? Here you are. A 30-acre farm 1/2 mile from Manheim, best of gravel land, good buildings, an abundance of fruit, fine water. This would make a dandy truck farm as it is close to markets. (Don't delay. Act quick as I am going to turn this farm—Call, phone or write J. F. Schroll, Mt. Joy.
