ducers cannot even approach. The Big-Six Touring is a seven-passenger car with a seven-passenger motor and seven-passenger dimensions throughout. It distinctly is not a sevenpassenger body mounted on a five-

passenger chassis. The Big-Six will take the steepest hills on high. It will maintain a high rate of speed over long stretches hour after hour. No car provides more restful riding-none is easier to operate.

Equipment is complete, even to an extra wheel with tire, tube and tire cover.

Its low price is due to large volume and to the fact that Studebaker overhead is shared by three models-all sixes. Then, too, only one manufacturing profit is included in the Big-Six price because all vital parts are manufactured in Studebaker plants.

If you spend more than the Big-Six price you can buy more weight and bulkiness and pay more for overhead and operation, but you will not get a better automobile.

Studebaker has been building qual-
