

VELIE

THIS SEASON'S SMARTEST SEDAN \$1795, at Factory

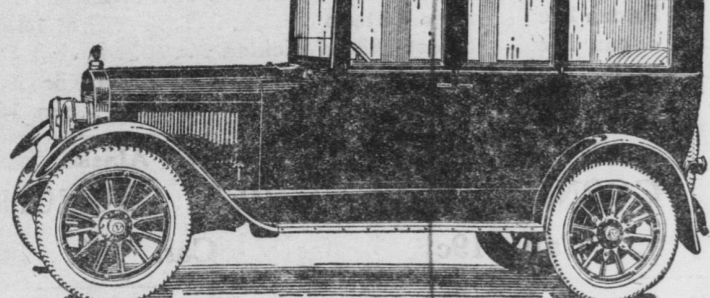

Vellie's following among car owners is as distinctive as the car itself—an unusual class, desiring a little more in comfort and luxury than the ordinary, ready to pay a little more for a greater margin of surplus power, greater flexibility and ease of handling, less trouble risk, less upkeep worry; wanting a little more in the final details that mean unalloyed satisfaction.

Yet strangely enough, the Velie purchaser pays no more for these things. And in the instance of Velie closed cars, actually pays less.

This Velie 5-passenger Sedan, mounted on the Model 58 chassis and powered with the vibrationless, automatically lubricated Velie-built motor, is choicely equipped down to the last detail of silvered flower vase, vanity case and smoking set.

Sixty per cent of all Velie cars are sold to Velie owners—a positive proof of Velie value.

Every time we sell a car we make a friend.

SEDAN

Ira K. Newcomer
R. D. Elizabethtown, Pa.

ODD FELLOWS ON OUTING THURSDAY

(Continued from page 1.)

second prize, box of candy.

Fourth event: 50 yard race for married women; first prize, one case assorted mayonnaise; second prize, one dozen noodles.

In the afternoon there will be a free show, free dancing and a concert by the Boys' Band in the evening. Samuel T. Kinsinger is the chairman of the program committee.

SEWER BUILDING HALTED BY STATE

(Continued from page 1.)

technical objections to the submitted plans and the natural surmise is that the delay is occasioned through the neglect of those in authority to obtain the necessary signatures to the documents. In the meantime Elizabethtown citizens are wondering why work has not commenced.

The sewage system designed for Elizabethtown is the result of an agreement between the borough authorities and the Elizabethtown Masonic Homes, by which a joint reduction plant will be built to handle the sewage of both the town and the Homes.

The reduction plant will be on the Home property and approximately 7,000 feet of 15 inch pipe, from the borough line to the plant will be laid at the expense of the Homes. The borough will supply 88 per cent of the cost of construction of the plant and the Homes the remainder. It is estimated that Elizabethtown's portion of this expense will be about \$31,000, and taking into consideration the value of the land it will be virtually a 50-50 proposition between the borough and the Homes.

At the reduction plant sewage will be chemically treated. All moisture will be extracted and the sludge will be utilized for fertilizer. All water from the sewer will be thoroughly treated and purified before being released.

The system within the borough will consist of two trunk line sewers of 15 inch size. Connecting to these trunk lines will be 6 and 8 inch street lines. Automatic flush boxes will be installed at intervals to keep the system clear.

The trunk line sewers are built by the borough. Property holders will pay about \$1.60 per foot front for the connecting sewers running through the streets. This does not include the connections from the sewer into the houses. It is estimated that the cost of a 40 foot front property, including the cost of sewer and connections into houses, will be approximately \$115.

These plans have been worked out under the energetic administration of the present borough council, which consists of H. D. Horst, president, I. A. Shiffer, Frederick Klein, H. E. Reem, H. W. Waymer, J. H. Buch, A. F. Ricker, J. H. Stern is chief burgess and D. L. Landis secretary of council.

EVERYBODY SWAT

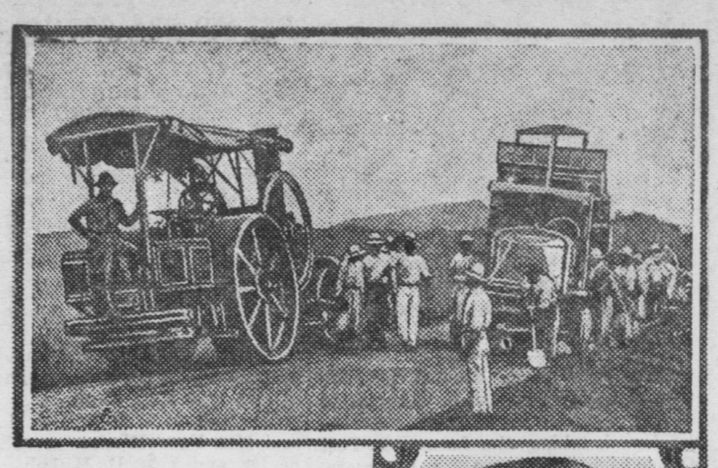

Walt Mason says: "Oh, every fly that skips our swatters will have 5,000,000 sons and daughters and countless first and second cousins; of aunts and uncles, scores and dozens, and fifty billion nieces—So KNOCK the blamed thing all to pieces." And isn't it the truth? All together, swat, swat, SWAT!

Panama Borrows \$4,500,000 in U. S. to Build Good Roads

American engineers are building Panama highways with American methods. Typical construction scene.

The little Republic of Panama, which has just floated in this country a loan of \$4,500,000 with which to build good roads, is to have by 1926 the most comprehensive system of modern asphalt and macadam highways in any of the Latin republics, Venezuela excepted.

A special mission of the Republic of Panama is now in this country completing details of the loan and arranging for road construction. The selection of these types of construction was made after careful consideration of the best American pavements.

The Panama road program contemplates completion in the next three years of work begun in 1920 when the Government had accumulated over \$3,000,000 from ordinary revenue for road building. Up to the present time a total of 125 kilometers of asphalt and macadam highway has been completed.

Having come to the United States for the money with which to pay for road construction and for highway engineering skill the Republic of Panama is also employing modern American methods in the construction of its highways. While much of the outlying rural roadway is of the macadam type, the best road in the Republic is a stretch of asphalt highway from the City of Panama to Old Panama and Tapia where traffic is heaviest, according to one of the members of the Special Mission. The highway is equal to any in the United States, he declares, not excepting the famous asphalted Fifth Avenue of New York.

RHEEMS

Church of the Brethren held their regular Sunday evening service at Rheems last Sunday with a fair attendance.

Mr. and Mrs. William Hassinger, of Florin, spent last Sunday at the home of their daughter, Mrs. Grace Garber and family.

Hot weather accumulates coal at the Rheems coal yard. The past few days two cars arrived, making about five hundred tons on hand.

Mrs. Alida Pollard, of Chambersburg, and Miss Ethel Matheny, of Thurmont, Md., spent last week as the guests of Mr. and Mrs. J. C. Smith and family.

Mr. and Mrs. Eli Espenshade and daughter, Ella, and Mrs. Sarah Ann Espenshade, of near Bachmansville, Pa., spent last Sunday at the home of David K. Espenshade.

P. R. R. wrecking forces from Harrisburg retracted a car load of stone at the west end of the Penn line stone siding with their steam derrick Thursday afternoon.

Samuel Wormley, a veteran store clerk, has leased the B. F. Shank building, formerly a barber shop, in which he contemplates establishing a general store on a small scale, with ice cream parlor and soft drinks combined.

P. R. R. Agent Clyde Numbers has accepted a promotion, being appointed agent at Atglen, Pa., commencing Monday, July 16. Leonard H. Walker, from Kinzer station, fills the vacancy, with C. H. Musser as assistant.

The J. L. Heisey & Sons, with their modern equipped warehouse, received 2250 bushels of wheat last Saturday as a record breaking day for Rheems. Prior to this year the largest amount received in one day was 2125 bushels.

Two prominent farmers of West Donegal township report good yields of wheat. Irvin Fridy delivered his 43 acres of wheat to Rheems with an average of 31 bushels per acre while John Roland comes to the front with 30 acres averaging 35 bushels per acre.

Elvin Killian, a P. R. R. fireman, while on duty on a train due at Lancaster 5:59 last Saturday morning, had his second finger broken at the first joint by a piece of iron which came loose on the engine, making it necessary to put on a new fireman from Lancaster to Philadelphia.

Earl Martin, a farmer of Mt. Joy township, delivered his 1922 wheat to the Mount Joy Four Mills with an average of 35 bushels per acre while his neighbor, John Wolgemuth, delivered his 30 acres to the Wolgemuth & Sons ware house, Florin, with an average of forty bushels per acre.

The J. L. Heisey & Sons, Rheems Feed and Grain warehouse, is coming to the front in being equipped in a first class manner. July 10 a P. R. R. car was loaded with 1500 bush. of choice wheat in three hours, using the new wheat loader, which needs no attention in the car. The old manner would have required two men six or more hours.

ROCK POINT

Frank Felty finished threshing his crop of 110 bushels.

Russel Shope finished hauling in his wheat crop which he will soon thresh.

Rain would be very welcome thru this section as some of the crops are suffering.

The Farmer's meeting will be held at the home of John Mumma on

INSURANCE and building materials

PERMANENT types of construction naturally reduce insurance rates. But their real value is in the insurance they themselves give—insurance not only against fire, but against deterioration, upkeep and replacement expense.

Your building material dealer's experience is an insurance policy that costs you no premiums, but instead saves them. Follow his advice as to types of building and building materials.

United States Tires are Good Tires

THE growing number of Royal Cord Clinchers you see on the roads gives an idea of how many car owners there are who want the best tire money can buy.

There weren't near enough Clincher Royals to go around last year.

This year—even with the production more than doubled—you can be sure of them by taking them at the moment.
