THE PRODUCE AND LIVE STOCK MARKET

CORRECT INFORMATION FURNISHED WEEKLY BY THE PENNA. BUREAU OF MARKETS FOR THE BULLETIN

Trading was active at all the markets. Supplies of home grown fruits and vegetables were liberal. Corn was plentiful and cheaper. Lima beans took a decided drop in price, ranging from 20-25c per bushel. Eggs held firm, selling at 32c per dozen. Peaches of choice quality from nearby found ready sale at 15-25c per qt. box. Other lines held practically steady in price.

Beets: Homegrown and Miss, good supply, 5-10c bunch.
Cabbage: Miss, fair supply, good condition, new stock 8-10-20c head.
Corn: Homegrown, fair supply, 80c 60c dozen.

Carrots: Southern, good supply, 5c bunch, 10c qt. box.

Cucumbers: Fla., fair supply, 5-10c each. Some smaller, 3 for 10c.

Pickles, 50-75c per hundred.

Celery: N. J., fair supply, 10-15-25c stalk.

Caniflower: Homegrown, 8-25c head.

Egg Plant: Southern, 20-25-30c each.

Lettuce: Nearby, 10-20c head.

Calif. Iceberg 15-25c head.

Endive 5-10c head.

Onions: New Vo., fair supply, 10c pint box, green 5-8c bunch.

Parsley: Homegrown, good quality, 1-3c bunch.

Peppers: Homegrown and Fla., fair supply and quality, 2-3-5c each.

Potatoes: Nearby Irish Cobbler, fair quality, 15-20c 1/2 peck, \$100-110 bu. New stock 20-25c 1/2 peck.

New stock, 20-25c 1/2 peck.

Parsnips: Nearby, fair supply, 10c qt. box.

Beans: Homegrown and Md., yellow and green, fair supply, 15-20c 1-4 peck. Limas, 30-40c qt. box.

Peas: Homegrown and N. J., fair supply, 20-30c 1/2 peck. Homegrown sugar peas, 15-20c qt. box.

Poker: Nearby, good quality, per bunch 5-8-10c bunch.

Rhubarb: Nearby, fair supply, 5c bunch.

Radishes: Homegrown and southern, good supply, 5-10c bunch.

Squash: Nearby, good supply, 5-10c each.

Sweet Potatoes: Dela. and homegrown, fair supply, 25-40c 1-2 peck.

Spinach: Homegrown, fair supply, 10-15c 1/2 peck.

Tomatoes: Homegrown and Tenn., good supply, 15-25c pint box.

Turnips: N. J., fair supply, 20-25c 1/2 peck.

Butter: 45-55c lb., mostly 50c.

Creamery 48-55c lb.

Eggs: 28-32c dozen, mostly 30c.

Poultry: Dressed chickens, \$125-2.00 each. Springers, 50-61.00 each.

Squabs, 25-40c each. Ducks \$1.50-2.00 each.

Fruits

Apples: Homegrown, supply good. New transparents and other early varieties, 15-30c 1-4 peck.

Apricots: Calif, 20-25c qt. box.

Bananas: Jamaica, good supply, 25-35c dozen.

Grape Fruit: Fla., good quality, 10-20c each.

Cantaloupes: Calif. and Ga., good supply, 5-10-12-15c each.

Currents: Nearby, 20-25c qt. box.

Lemons: Calif., good quality and supply, 30-40c dozen.

Oranges: Calif. and Fla., supply good, quality and condition good, 25-75c dozen.

Peaches: Homegrown and Ga., fair supply, 15-25c qt. box.

Plums: Calif., 20-25c qt. box.

Nearby, fair supply, 15-20c qt. box.

Pears: N. J. and Homegrown, fair supply, 10-25c qt. box.

Gooseberries: Nearby, 15-20c qt. box.

Raspberries: Nearby, black, fair supply 15-25c qt. box. Red, 35-45c qt. box.

Blackberries: Nearby, good supply, 20-25c qt. box.

Watermelons: Ga., good supply, 40c-\$1.00 each.

There was a slow draggy market throughout the week and at the close beef steers compared with week ago, better grades fully steady, others showing weaker tendency, top \$10, bulk \$7.50-9.00, quality mostly compared with same week last year, top \$8.75, bulk \$7.50-8.50. Bulls closed weak 25-50c lower. Heifers and cows held steady. Stockers and feeders: The receipts of stockers were less than in the corresponding week 1922, yet on the face of weather conditions that existed here during the past 6 weeks, last week's supply was excessive and instead of a cleanup by sellers, fully 1400 head had to be carried over for want of buyers. The market at Lancaster for this class of stock was the lowest in the United States and shippers suffered losses, ranging in some cases from \$100-250, per car. Many bunches of cattle sold at prices no higher and in many cases less than they cost at St. Paul and Chicago. Naturally this condition cannot continue and in the opinion of various commission firms will result in curtailed shipments unless there is a better demand and a lift in prices. The prospects for next week are much lighter receipts than there were here for the past two weeks. The quality has been of the commonish kind, both horned and dehorned with not more than 5 loads of what the trade would call the good kind, averaging from 850-900 lbs., which sold at from \$6.50-7.25, the bulk of sales ranged from \$4.50-5.50 with many of the common kind at \$4.00 and less. Calves held steady, top vealers \$12.50.

Receipts for Saturday's market: 19 cars cattle from the following points: 7 St. Louis, 6 Chicago, 2 St.

MORE ACCREDITED HERDS ARE NOW PREVAILING

Steadily gathering impetus since the first herd of dairy cattle was tested for the presence of tubercular germs three years ago, the Accredited Herd Plan is coming into favor among Lancaster county breeders and at the present time there are thirty-five herds of dairy cattle which are listed as disease-free on the official records of the state.

County breeders were actuated to take the Plan because of the fact that breeders and dairymen in other counties spurred on the work of the Bureau of Animal Husbandry even more rapidly than in this section and because purebred animals of quality have little sale value in the eyes of the buyer today unless they have the necessary credentials.

The curtailment of gratis veterinary services and the reduction of the amount of indemnity for diseased cattle, while offering, naturally, some check to the movement, does not seem to have affected the ardor of Lancaster county breeders in respect to the desire for disease-free animals, according to present indications.

The following is the list of men who have, within the past three years either had their herds accredited or are now in the process of accreditation.

Accredited Herds

S. N. Root, Landisville.

J. Clarence Reist, Mt. Joy.

Samuel Nissley, Manheim, No. 1.

Aaron Altland, Elm.

Masonic Homes, Elizabethtown.

Norman Garber, Mt. Joy, No. 3.

Passed One Clean Test

Alber Basser, Bainbridge.

John Heisey, Washington borough.

N. R. Nissley, Landisville.

Norman Bender, Landisville.

Harry Mumma, Landisville.

KINDERHOOK

Miss Gertrude Steckler is visiting relatives in Lancaster.

Mrs. Nora M. Halter and sons and Mrs. George Haberstroh motored to Reading to visit Joseph Moore.

Mr. and Mrs. W. Roy Greene, Miss Mac Greene and Harold W. Greene, who spent their vacation in New York, Philadelphia, Columbia and Kinderhook, have returned to their home in Enola.

The following persons were guests of the Girls' Day committee on Wednesday evening: Mr. and Mrs. M. C. Pauls and children, Evelyn, Thelma and William, of Yorkanna; Mr. and Mrs. Walter Crumbling and children, Kenneth and Donald, of Hellam town ship, York county; Mr. and Mrs. Geo. Abel and children, Mildred and Marilyn, of Wrightsville; and Miss Lillian Fry, of Wrightsville. Rev. Herbert Snyder, pastor, led the prayer meeting. The Birk sisters sang, "In the Garden."

CATARRH

Catarrh is a Local disease greatly influenced by Constitutional conditions. HALL'S CATARRH MEDICINE consists of Ointment which gives Quick Relief by local application, and the Internal Medicine, a Tonic which acts through the Mucous Surfaces and assists in ridding your System of Catarrh.

Sold by Druggists for over 40 Years. F. J. Cheney & Co., Toledo, O.

Peach Borer Control

Growers planning on treating with P. D. B. to control the peach borer should make arrangements for the purchase of materials so that application can be made after September 10.

Poultry

Keep a good mash mixture before the flock at all times. A mixture of equal parts by weight of wheat middlings, wheat bran, ground oats, corn meal and beef scraps will boost the egg production.

Good House for Sale

I have a good 8-room house on West Main street, in A1 shape, that I will sell very reasonable. If interested will be pleased to know same. It pays better to own a home like this than pay rent. J. E. Schroll, Realtor, Mount Joy.

Lightweight 100-150 \$8.25-8.75

Rough stock \$6.25-8.25

HOME HEALTH CLUB

WEEKLY LETTER WRITTEN EXPRESSLY FOR THE BULLETIN BY DR. DAVID H. REEDER

Curing Everything: While I am convinced that there is no such thing as an incurable disease yet I know that every sick person is not curable.

So simple a thing as a splinter in the hand or foot may cause a sickness that ends the loss of life and yet that infection was curable if it had been properly treated.

So terrible disease as Leprosy has until recently been considered incurable and yet we find that when the proper treatment is applied nearly all cases are curable. Cancer is a disease, the very name of which strikes terror to many stout hearts, and yet most cases are curable. Especially, in my estimation, those that have not been made worse by surgery.

It is ignorance that makes disease fatal. It is ignorance that causes the disease in the first place, because all diseases are preventable.

Not all of the ignorance is on the part of the laity, the sick people. Mankind as a whole is still in swaddling clothes so far as real knowledge about ourselves and how to maintain health throughout the span of life to which we are justly entitled.

From a therapeutic standpoint man is of a three fold nature, chemical, mechanical and physical. Practice of the healing art began in the chemical stage, medicine, it progressed to the mechanical, surgery and adjustment by manipulation, with physical training. It is rapidly entering into the third or advanced stage. The conscious mind is becoming conscious of the fact that there is another and much more important mind than itself.

This latent or perhaps super mind knows more in the new born babe than the conscious mind learns in a lifetime of hard and careful study.

The conscious mind learns only through the operation of the five senses while the super mind knows at the start of each new life and instantly starts the work of breathing, circulating the blood, voicing its desires, eating, and from that time on starts the education of the conscious mind. After a while the conscious mind imagines it is the only mind and knows all about it but were it not that the super mind never sleeps but is on the job every second of time forever and then some. If it were not the heart would stop beating and the conscious mind would cease to be conscious.

As an illustration of the coarsure of many minds I recall some of the scientific papers read in a medical convention less than a year ago. Each idea was so solemnly exploited in the medical press and passed on to the laity as profound scientific wisdom.

One astonishing paper attributed a majority of the ills of civilized mankind to wearing shoes with heels which throw the body out of plumb. Another paper attributed the condition of many crippled children to the fact that the parents taught them not to cry. Figure it out yourself.

Another attributed most of the criminal activities of the present day to prohibition but did not mention the power of the human brain was largely controlled by the proper functioning of the nose. One paper assures us that if the subject of diet were taught in the public schools another half of the diseases would be banished forever.

While a woman physician announces that the position in which babies are held during infancy has much to do with their health throughout life. A New York physician declared in his paper that there were more physically crooked people in that city than in any other city in the world and I am inclined to think that some who send money for investment may claim that the crookedness is not all physical.

One reason advanced for the degeneration of man was because he lost a rib when he made woman. The richness of the blood depended upon the condition of the marrow in his bones and the loss of this rib bone could not be compensated for. My, my, but that was a great mistake for the Creator to make. Let's not worry about these single idea minds. If each one's theory was correct there would not be enough disease to go around.

The Oats Midge

What is the oats midge? Every summer when this pest makes its regular visitation this question is repeatedly asked of the Bureau of Plant Industry of the State Department of Agriculture.

This small insect is really a flower thief, for it infests a great variety of flowers. In the case of the rose, for example, the midges get down among the petals of the budding flower and cause sufficient injury to prevent the bud from developing properly.

On oats the damage is so great as to materially reduce the crop. They also attack citrus fruits, tomatoes, begonias and a wide variety of plants grown under glass.

The thrip or midge does not chew nor does it suck. What actually happens is that in order to get the juices of the plant it rasps off the outer skin to get at its repast.

Infested plants may be sprayed with a tobacco extract containing 40 per cent of nicotine, diluting it one part to 600 parts of water and adding 3 pounds of yellow laundry soap to every 50 gallons of the spray as a sticker and spreader.

The Bulletin contains more local and up-to-the-minute news than any weekly in this section. Compare it and convince yourself. It costs only \$1.50 a year.
