It is a beautiful the to p tree, but it is doubly beautiful to pl the right (see in the right place. The deed loses half of its beauty when a tree is placed where it does no belong, and where it will be impossible for it to add to the joy and comfort of those who may be near it in future years. A tree placed in a location where it will be in the way, and where

it cannot develop in accordance with its natural tendencies, is doomed to be a failure. The same is likely to be true of the tree that is planted without thought as to the variety that is best suited to the situation. It is the tree planting that involves thought and judgment that is the real blessing to humanity.

The beautiful thing in the planting of the tree is the attitude of mind of the one who does it. Those who are to receive the benefits from the act appear long after the work is done; those who do the work are seldom directly rewarded for the labor. When person plants a tree he is contributing to the pleasure of generations to come, and if he plants the right tree in the right place he bestows a blessing upon others in the most unselfish manner. If, on the other hand, the wrong tree is planted, the future gen erations cannot reap the full benefit of the work done years before by the well-meaning but uninformed tree planter, and the deed as measured by results becomes less beautiful.-Illinois Arbor Day Bulletin.

OWES SPEECH TO WIRELESS Young English Woman, Dumb From Birth, Sald to Have Become Nor-

mal After Treatment.

A young woman, deaf and dumb from birth, the first patient to undergo Mrs. Harry Burkhart. treatment by a new wireless invention, articulated several words in the Royal Medical college, Epsom, Eng- Mrs. Martin Strickler

the dumb.

This latest wonder is made possible by the invention of Mr. J. W. Theo- Air Hill, Franklin county, medical friend, Dr. Frank Thompson. The dumb patient puts on ear receivers, and receives a lesson in phonet- ville, Cumberland County, spent the tes with the sounds magnified till they week-end with D. H. S. are deafening to normal ears.

Dr. Thompson prophesies that his result has been that her deafness is Sarah Brady on Marietta street. also tending to disappear.

Molten Lava Welds Volcanoes. George Gillman read a paper before and Mrs. James Hockenberry the Geographical society descriptive which he alluded to as Africa's highest mountain. The party which he led were the first to ascend after the mountain had become British territory. From wherever across the sur- McBride, Brandt Nissley, Alic rounding steppes one approached the Nissley, Catharine Eby and M isolated mountain mass two outstand- ser. ing features impressed themselves at Mr. nd Mrs. Melvin Pe once-the tremendous size, coupled son, Junior, of Chambersby with great height, and the almost in- the guests of the forme credible contrast between the tropical Mr. and Mrs. Frank half desert below and the alpine des- gal street. ert above. Structurally, Kilimanjaro consisted of three single strato-volcanoes, each of which had had its own origin and history. Through mutual interbedding of the laval flows, however, all three had grown into one

solid complex strato-volcano. Fighting Insect Pests. A new method of control of "scrowworms," "wireworms" and sod web worms which attack tobacco and similar crops has been discovered by the tobacco insect laboratory of the United States Department of Agriculture. It has been found that these worms are very greatly attracted to nitrobenzine, and by flavoring poison with this chemical a mortality of from 80 to 90 per cent of the larvae in heavily infested fields is produced. These larvae are very important pests of tobacco and a large variety of other crops, and up to this time fall plowing and other indirect methods were the only known ways of combating them

Mr Coolidge has been president all this time and hasn't introduced a single pet word or slogan yet.

Seventy-Six Thousand New Telephones

That's the number of new Bell Telephones which are being added to the Bell System in Pennsylvania this year, making a total of 850,000.

ADDED is the word, for 76,000 is the net figure. To realize this net gain, we must install a total of 150,000 telephones, not including some fifty thousand moved from one address to another during the year.

And a further gain of 83,500 is expected in 1924. Installing the telephone instrument, however, is the smallest part of the job.

means 52 large building operations, half a million miles of new wire, ten millions of dollars in new switchboards and Central Office equipment.

To carry out our full \$30,200,000 program this year

This is the most stupendous construction program ever undertaken in our telephone history. It is our response to the demand of the people of

Pennsylvania for more and more telephones.

The Bell Telephone Company of Pennsylvania

ONE POLICY, ONE SYSTEM UNIVERSAL SERVICE, AND ALL DIRECTED TOWARD BETTER SERVICE
