

Five Passenger Sedan 1924 Model Fisher Body

\$1365

F. O. B. Cleveland

THIS price makes the Cleveland Six the dominant and outstanding value of the six cylinder field.

Only by paying several hundred dollars more can you get the same smooth, masterful hill and traffic performance of the new "Extra Power" motor, the same refined comfort and smart appearance, the same dependable, economical, satisfactory service.

Seven out of ten Cleveland orders specify this model. Drive it once and you will understand why. More for the money is the reason.

KEEN COMPETITION AT FARM CLUB SHOW

(Continued from page 1.)
E. Garber, Raymond Zook, Jacob Zook.

Discuss Corn Question
"Selection of Seed Corn," was the subject discussed by Harry Hershey. The speaker stated he selects his seed corn in the field at husking time and looks for a heavy ear, well filled at tips and butts having straight rows, a deep kernel and the cob medium small.

A short talk on "Feeding Steers" was given by Elmer Brandt. He emphasized the following points:

1. Keep the steers hungry but give them plenty of feed; 2. Give them plenty of water; 3. Ensilage rations, cotton seed meal, oats, ear corn and clover; 4. Feed cotton seed meal and corn meal; whole shelled corn and clover hay.

A short musical and literary program was given by the pupils of the school; recitation by Viola Schroll; violin duet, by Keiser Sisters; current events, by John Mumma; reading of club paper by Thomas Johnson. The meeting was presided over by George Endslow.

The next meeting of the club will be held December 12 at the home of N. E. Garber, near Rheems.

Card Table Covers

Hostesses are enthusiastic over the new card table covers, made of black sateen and gayly decorated with applique flowers cut from colored bits of silk or cotton fabrics. Silk floss outlines the flowers, and black braid or ribbon provides the ties for the corners.

Good House for Sale
I have a good 8-room house on West Main street, in A1 shape, that I will sell very reasonable. If interested will be pleased to know same. It pays better to own a home like this than pay rent. J. E. Schroll, Realtor, Mount Joy.

AMERICAN FOODS BEST SAYS FAMOUS DOCTOR

Athens.—American standard food-stuffs are the best in the world, says Dr. Mabel Elliott, famous woman physician, who for the past two years has been medical director of American orphanages in the Near East. From the standpoint of purity and high food value, she asserts that no European nation can compete with the United States, and for this reason she insists on American products in all orphanages and hospitals. In order to meet adequately the needs of undernourished children.

Dr. Elliott's annual report, summing up the results of the care of 50,000 children in orphanages as well as clinics for 50,000 additional children in refugee camps and homes, says:

"Stable American foods are now the backbone of all our menus for rebuilding children who became weak and anemic during the refugee exodus from Asia Minor. Our menus contain, not only bread made from American flour, and corn grits in porridge and stews, but also the liberal use of corn syrup, American condensed milk and American cocoa and macaroni, thus making a balanced ration to meet all the scientific requirements as to relative food values, calories and vitamins.

The favorite orphanage pudding is composed of corn grits with cocoa, sweetened with corn syrup, and made more nutritious and palatable by adding a sauce of American condensed milk. Such a pudding has a high food value and is very economical—no other equivalent food value could be obtained from other foods at twice the cost. Moreover, it is so palatable that children eat it eagerly several times a week, and never seem to tire of it. The American people, in providing for these parentless children such pure and wholesome foods from their own tables, are certainly making a practical application of the golden rule."

Dr. Elliott has recently returned to America to arrange for the publication of a book of her experiences under the title of "Beginning Again at Ararat."

RADIO TO SUPPLEMENT NOT SUPPLANT WIRES

Experts Declare It Cannot Take Place of Telephone System.

That radio will not become a substitute for telephonic communication by wire is the opinion of those most qualified to judge. Secretary Hoover, after an investigation made by a board appointed by him to make an exhaustive study of radio, said: "I think that it will be agreed at the outset that the use of the radio telephone for communication between single individuals as in the case of the ordinary telephone is a perfectly hopeless notion. Obviously if 10,000,000 telephone subscribers are crying through the air for their mates they will never make a junction; the ether will be filled with frantic chaos, with no communication of any kind possible."

As a source of entertainment and comfort to millions of people, the radio is proving a wonderful boon to mankind. There is not the slightest possibility, however, according to experts in the science of communication, that the radio will ever supplant wires for transmitting the millions of messages that are moving simultaneously across this country every day in serving the more than 15,000,000 Bell telephone subscribers.

General John J. Carty, vice president of the American Telephone and Telegraph Company, in charge of development and research, has concluded, after a thorough research into the possibility of radio supplanting the telephone, that:

"The ether must be reserved exclusively for those services for which wires are not adapted. Fortunately these services comprise but a small fraction of the future world communications. If we had to depend on radio alone mankind never could realize the incalculable benefits which are now destined to grow out of a comprehensive system of world-wide communications. The ultimate system which is to provide the communications of the world will consist of both wire and radio, each supplementing the other in proportion to its capabilities."

TELEPHONE OPERATORS GIVE WEATHER FORECASTS

London, England.—Pity the poor English telephone girls! They are supposed to be able to tell people what the weather will be like. In this, their newest duty, perhaps they will receive a sigh or two of sympathy from the operators of switchboards in America who for many years bore the suffering of having subscribers ring up to ask, "What time is it, please? My clock has stopped."

Not long ago the postoffice, which owns all the telephones in Great Britain, arranged with the Air Ministry to supply each exchange with daily forecasts of the weather in its vicinity. The first month this information was available to subscribers 10,172 persons called up to find out if it was going to rain. Of course, it usually was, the way of British weather being a wet one. In London most of the inquiries were made on Fridays and Saturdays. This was taken to mean that the only time people really care about climate over there is when they are set for an outing. The rest of the time they cannot be bothered, let the fogs fall where they may.

Besides it is cheaper not to care. The Postoffice is not giving away tips on the weather for the mere fun of it. Those who get such information from "Central" must pay two-pence, the cost of a regular city call.—Patriot, Hartford, Conn., Pa.

Klan officers are beginning to kill each other. This should make it interesting.

Realty Bargains!

Any person looking for a Farm, either large or small, Mansion Dwellings, Business Place, Building Lot, in fact anything in Real Estate, should carefully read the following. If you don't find listed just what you want, call or phone and I will tell you what else I have for sale.

You Are Invited To Try the New Traffic Transmission

This is Traffic Transmission Week the country over.

We have made special preparations to demonstrate the biggest automobile development since the self-starter.

Come prepared to drive a car in which you can change speeds instantly and silently on the steepest hills or in the tightest traffic pocket.

There is nothing new to learn.

You will find the familiar gear lever at your right hand. You will make exactly the same hand and foot movements to effect a speed change.

There will be no "high pressure" sales solicitation. Our sole desire is to have every motorist appreciate, first, the possibilities of this new Chandler feature; and second, the performance mastery of the

Pikes Peak Motor

For the first time, a truly great power plant is available in a handsome, long-lived car of moderate price!

(The Traffic Transmission is built complete in the Chandler plant under Campbell patents.)

Touring Car \$1485 (All Prices f. o. b. Cleveland) Chummy Sedan \$1785

A powerful foot brake controls the rear wheels; an automatically equalized emergency operates through the propeller shaft; and the Traffic Transmission makes the braking effort of the engine instantly available by a split second change to a lower gear.

An Achievement

The development of the Traffic Transmission, the Pikes Peak Motor, in fact, the entire 1924 car with its powerful brakes, indestructible rear axle, facile steering, up-to-date bodies by Fisher and low prices, was possible only to a great organization like The Chandler Motor Car Company.

Advanced manufacturing skill, advantageous plant location, complete factory equipment, strongly secured financial position, and permanent executive direction all had to be present in preeminent degree.

Remember! This is Traffic Transmission Week! Come in! Telephone! Make the test that tells all—drive the 1924 Chandler yourself!
