HOME HEALTH CLUB

WEEKLY LETTER WRITTEN EXPRESSLY FOR THE BULLETIN BY DR. DAVID H. REEDER

The justly famous Dr. Osler told his fellow physicians and the medical students to whom he lectured "Know syphilis in all its manifestations and relations and all other things clinical work and teachings have overturned will be added unto you."

Another famous physician whose work and teachings have overturned more medical dogmas than any other of recent years made the emphatic statement that 75 per cent of the human family had the taint of syphilis in their blood.

A physician whose name is well known to nearly every other physician in America and many European says that syphilis is the father of all diseases.

A well known physician who stands high in the councils of one of our nations' scientific research societies states emphatically that without the foundation cause of syphilis in the blood, there can be no such diseases as cancer, tuberculosis, erysipelas, colitis, diphtheria, paresis, locomotor ataxia and most of the insanities.

It is a well known fact that many of our most brilliant men and women are frequently stricken down in what appears to be the very apex of their career.

The purest and best of people suffer and are innocent victims of this vile and deadly scourge. It is one of the fundamental laws of nature that like attracts like unto itself. Syphilis originates as a social disease and when the brain is overworked even by a minister and the taint has been lying dormant for a lifetime, it suddenly rouses into activity in a compelling manner the instincts which live in the person originally infected.

Already it has weakened the power of the brain to control the actions of the individual and one of the outstanding features of that kind of brain degeneration is that the more pronounced the destruction of the brain the more positive becomes the manner of the victim. He becomes a law unto himself. He is the great "I Am" and can do no wrong. He loses a rational sense of probity, honesty and honor. The most unheard-of crimes will be committed in the coolest manner imaginable. Most of such crimes pertain to and involve sex.

Not so long ago our country was shocked from coast to coast by the murder of an entire family and it was found that the 16 year old daughter was about to become a mother. A little later a priest, in whose house the girl was a servant, was also murdered. Those who are believed to know say that the priest was responsible for the girl's condition and also for the murders of her family, while the murder of the priest was the revenge sought by a young man who knew the facts.

The big headlines of today's newspapers tell of the disappearance of a prominent preacher and a teacher in the Sunday school. He leaves a beautiful wife and a fine family of children. Some people say this casts a slur on the church.

Not so. It casts a deep and profound reflection upon a so-called scientific profession that for a hundred and twenty-five years has been inculcating humanity with syphilitic disease in order to prevent smallpox, a disease from which less than one-tenth of one per cent of the people die.

Will you kindly investigate the percentage of deaths from cancer and tuberculosis? They are diseases which cannot develop without a taint of syphilis and 99 per cent of all vaccine virus carries that taint.

Vaccination does not prevent smallpox, but it does cause sickness, suffering, disease and death. It inoculates pure, clean, innocent, human beings with the taint of a disease which destroys mind, soul and body, especially the mind.

It is claimed that every brain that develops beyond the normal, in other words—every brilliant and successful person—has the syphilitic taint, that it stimulates the brain to over-activity and eventually destroys it. In some cases it appears to attack only the spinal cord, but as that cord is practically a continuation of the brain, the gray matter of the body is evidently its favorite abiding place.

When you see the big headlines in the newspapers, it means that something out of the ordinary has

happened. The good deeds that you and your neighbor do daily are so common that to tell about them is not news. If you or one of your neighbors commit a crime, it is something very unusual and therefore startling news. When ever I see such accounts I do not blame the minister. I say at once that he has congenital leues. In other words, has either inherited from some one of 32 ancestors a taint of syphilis or he has been inoculated through vaccination or any one of the many ways and the poison has attached his brain.

All such disastrous results can be prevented by safe and sane methods and even the faintest trace of the poison eliminated from the blood by correct eliminative treatment and diet. Drugs will not do it. They merely suppress symptoms and nature's heroic method of elimination through horrible festering sores. The commonly accepted method of testing the blood will not be found reliable and will not disclose the faint trace of the poison which may wreck many lives.

A correct diagnosis of this condition accurately discloses the reason why so many business men, who by superior mental ability grow very rich, quickly fall a prey to evil, wreck their business, desert their wives, and children and take up with questionable companions.

I wish I could tell them from the house-tops of some of those pitiful cases that have come under my observation, then I think there would be a more intelligent work of prevention adopted by all humanity.

TELEPHONE DEMAND TAXES BELL COMPANY

14,000 New Telephones Every Month Being Added in Penna.

The telephone industry is growing at so rapid a rate, according to Bell Telephone officials, that five years from now there will be almost 1,300,000 Bell telephones in service in Pennsylvania alone. At present this company is operating about 800,000 telephones in the State.

The people of Pennsylvania are asking for 14,000 new telephones every month. In fact, telephone companies are being taxed to the utmost to keep up with the demand.

In a recent statement, President Kinard, of the Bell Telephone Company, stated that his Company would connect some 168,000 telephones this year in Pennsylvania.

"We anticipate no falling off in the demand for telephones," said Mr. Kinard. "During the next five years we will be called upon to connect 925,000 telephones (gross) and our net increase will be almost 425,000 new telephones. Our expansion program this year alone calls for the addition of \$40,000,000 worth of new equipment to our present plant in Pennsylvania, and so far as we can see now, the coming five years will require about \$175,000,000 worth of new equipment.

"The tremendous demand for new telephones necessitates this expansion. It is our obligation to render good telephone service, and to furnish that service, so far as in our power lies, whenever and wherever it is needed."

"We are doing our utmost to meet the demand for telephone service and are installing the telephones as quickly as we can place the necessary equipment."

AFTER AN OPERATION

Mrs. Wilke Couldn't Get Back Her Strength Until She Took Lydia E. Pinkham's Vegetable Compound

Rochester, Minnesota.—"I had a very serious operation and it seemed as if I could not get my health back after it. I suffered with pain almost constantly. My sister came to help take care of me, and she was taking Lydia E. Pinkham's Vegetable Compound for nervousness and a run-down sensation. She had me try some of it, and in a very few days I began to feel better. In two weeks I hardly knew myself and after taking a couple of bottles more I was up and helping around, and now I am strong and healthy again and am still taking it. It is a pleasure for me to write this to you, and I hope that many other women who are suffering like I was will find out about your medicine. I will give any information I possibly can."—Mrs. JAMES WILKE, 832 E. Center Street, Rochester, Minn.

Remember, the Vegetable Compound has a record of fifty years of service and thousands of women praise its merit, as does Mrs. Wilke.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to the Lydia E. Pinkham Medicine Company, Lynn, Mass.

Bell Phone 75R2

Facts About the Telephone

Chicago, with a population about the same as that of Paris, has three and a half times as many telephones as the French capital.

During 1923 there were 190 telephone conversations for every man, woman and child in the United States.

Dr. Paul Kammerer, the eminent Austrian biologist who has been lecturing in this country, remarked in a recent interview that the American telephone service "gives our Viennese service a black eye."

DIVIDEND DECLARED ON PREFERRED STOCK BY BELL TELEPHONE CO.

W. S. Peirson Retires; Directors Elect J. H. Crosman, Jr., as Secretary and C. L. Richle as Treasurer.

The Board of Directors of the Bell Telephone Company of Pennsylvania at their annual meeting, held in Philadelphia, declared the first quarterly dividend on the preferred stock sold last November, payable April 15 to stockholders of record, March 20. The regular quarterly dividend of 2 per cent on common stock was also declared.

The meeting was marked by the retirement of Winfield S. Peirson, for many years Secretary and Treasurer of the Bell Telephone Company of Pennsylvania and the election of J. Heron Crosman, Jr. as Secretary, and C. L. Lothrop Richle as Treasurer.

At the annual meeting of the stockholders, which preceded the meeting of the board, the report of the Directors for 1923 was approved. J. Howell Cummins was elected director to fill the vacancy caused by the resignation of Richard M. Elliott.

The new director is president of the John B. Stetson Company, with which he has been associated since he was fifteen years old. He was born in Lancaster County, Pennsylvania, and received his education in the public schools and Central High School of Philadelphia.

FRENCH DISSATISFIED WITH GOVERNMENT TELEPHONES

"France is casting envious glances at telephone efficiency in America," declared General Otto H. Falk on his return from Europe recently. "After experiencing the superiority of the American brand of telephone service on the battlefields during the war, the French people have become acutely dissatisfied with the kind of telephone service provided by the government. They point out that even if America has thirteen telephones for every 100 inhabitants, whereas France has only one telephone for every 100 inhabitants, service in America is far superior."

General Falk emphasized the fact that "Americans, accustomed to prompt telephone service, find the service in European countries so poor and so annoying that they prefer to use the taxis instead."

The inferiority of the telephone system abroad, General Falk indicated, is due to the fact that "telephone communication in European countries has been stagnating under political management, which killed incentive for invention and development along this line."

CERTIFIED SEED POTATOES

I will have a car of Northern Grown Michigan Russets arriving at Florin in March, at \$2.00 bu. at the car. Either write to me or call Wolgemuth & Son, Florin, Pa. Get your orders in early. According to reports the northern grown seed will be scarce this spring due to an unfavorable growing season last year.

MAYTOWN

John Shank, this place, celebrated his seventy-third birthday anniversary and is enjoying the best of health. He is daily at work, employed by the state department. He does as much work as many young men.

Former County Super III M. J. Brecht, aged 68 years, former county superintendent of public schools, is at St. Joseph's Hospital, Lancaster recovering from an attack of kidney troubles.

TELEPHONE COMPANY PAYS \$300,000 IN BENEFITS IN 1923

During 1923, the Bell Telephone Company of Pennsylvania paid out in pensions and other benefits \$298,821, according to a recent report of the Employees Benefit Fund Committee of that company.

This plan for Employees Benefits has been in effect since 1913. The money to carry on this work is appropriated by the Bell Telephone Company each year and no assessments are made on the employees.
