

# LOWEST PRICED QUALITY AUTOMOBILE

Every Chevrolet is fully equipped when sold. It has electric lights and starter, gasoline tank in the rear, demountable rims and extra rim and tire carrier, 3-speed transmission and reverse, speedometer and all necessary indicators on the instrument board, curtains open with doors of open models. All closed models have high grade Fisher Bodies with plate glass windows. There is nothing more to buy but the license. Costs least per mile for gasoline and oil.

There are more than 10,000 dealers and service stations throughout the country. Repairs are made on a low-cost flat rate system.

CHEVROLET

### Pals

Perhaps you've learned that Good Looks and Economy are not always on speaking terms. Good Looks often spurns Economy for Extravagance.

But when it comes to painting, they're regular pals. Tasteful painting with good paint insures their permanent association. Economy saves Good Looks' favor by protecting her against weather.

Our trained painters provide the good looks. We use paint made of Dutch Boy white-lead and oil because it stands the gaff—gives real economy.

Our low prices will make you ask us when we can begin.

"Save the Surface and You Save All."

## LORAW & SON

FLORIN, PENNA.

### HERE SHOPPING

Attractive assortments of freshly gathered fruits await your approval. And you may choose from the very choicest of the season's offerings at prices which will please you with their opportunities for economy.

Dairy Feed 25 pc. \$51.50-52.50 ton  
Horse Feed 85 pc. \$52.50-53.50 ton

### GET AT THE CAUSE!

Many Mount Joy Folks Are Showing How to Avoid Needless Suffering

There's nothing more annoying than kidney weakness or inability to properly control the kidney secretions. Night and day alike, the sufferer is tormented and what with the burning and stinging, the attendant backache, headache and dizziness, life is indeed a burden. Doan's Pills—a stimulant diuretic to the kidneys—have brought peace and comfort to many Mount Joy people. Profit by this Mount Joy resident's experience:

C. H. Metzler, mechanic, 49 W. Main St., says: "I wasn't feeling any too good and the trouble was all with my kidneys. In the first place they were put out of order by a cold. My kidneys were not only sore, but they were sluggish, too, which resulted in the kidney secretions passing too seldom. At times when I did any stooping, a sharp pain ran through my back. A sharp use of Doan's Pills brought good results."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Pills—the same that Mr. Metzler had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

**Business Place for Sale**  
A business with store stock and fixtures including cigars, tobacco, confections, etc. in business district of Mount Joy. A dwelling in connection can also be rented. Immediate possession. Apply to Jno. E. Schrock, Mt. Joy.

People in some parts of Scotland believe the finding of a four-leaf clover denotes bad luck instead of good luck.

It pays to advertise in the Bulletin every foot of his height.

## Crow Is Denounced as Farmer's Enemy

Investigations of the crow which have taken place recently on a scale wider than ever before have proven that he is one of the most destructive creatures known to useful and game birds, and to poultry and crops. In fact, his depredations are so widespread and fraught with such evil results that sportsmen all over the country are banding together to shoot him so that the game which remains can have a better chance of coming to maturity. A census taken among the game warden in Pennsylvania recently showed that an overwhelming number of the men in the field were positive, from actual observation, of the destructive habits of the crow, and they advised that campaigns be undertaken against him. Some naturalists have claimed that not only directly does the crow damage the farmer, by attacking young poultry and destroying crops, but that indirectly he is work is done when he destroys millions of the eggs of useful birds, and therefore prevents the coming to maturity of these auxiliaries of the farmer who would, had they been allowed to exist, have accounted for myriads of insects. In fact, naturalists have said that the farmer's bill for insecticides would be greatly lowered were it not for the crow prevented from killing useful birds who are the natural enemies of the insect pests.

In the West hunters are employed to kill off the predatory animals which prey on the cattle, and great sums have been saved by their activities. It appears that organized effort against the crow will also save great sums in other parts of the country if this particular menace to bird life is reduced in numbers. The various campaigns against the crow have followed on the heels of the great conservation movement to protect game which is now finding such a response among sportsmen in all parts of the country. With the efforts made to provide proper refuges for useful birds comes the question of protecting their young against the predatory creatures which prey on them.

### Direct From Heat

To obtain electricity direct from heat is a dream that is likely at some time to be realized. At present there are numerous methods of obtaining heat but the power obtainable is very minute. However, a method has been devised which employs two insulated carbon rods heated in an electric furnace or oxy-acetylene flame, in a new way. The two carbons are kept separated at one end, but the other ends are connected through a current measuring instrument. When one of the carbons is suddenly displaced a current of several amperes will flow. By displacing one of the carbons periodically an alternating current can be generated.

When a slight voltage is applied to the carbons the current increases to more than ten amperes at about 450 degrees Fahrenheit.

These experiments are interesting, inasmuch as such a result would hardly be expected at atmospheric pressure. The same thing has been noticed before on a much smaller scale, but in a high vacuum. Such seemingly insignificant discoveries often mark the beginning of wonderful developments.

### Odd Birth Certificate

The egg, with the greatest claim to distinction is one which was used as a birth certificate! This unique "document" was submitted to a meeting of a school attendance committee held at Norwich in February, 1899. Mrs. Bell, a widow, had been called upon to prove that her daughter had reached the school exemption age.

She produced an egg, colored in tints of purple, yellow and cream, with the name of her daughter and the date of her birth picked out in white in almost copperplate lettering. In addition, two texts had been written on the egg—"The Lord shall guide thee continually" and "Teach me to do Thy will." This was the only record Mrs. Bell had of her daughter's birth, and after the "certificate" had been passed round and admired, the committee accepted it as evidence.

### Modest Request

The motorist was quite certain that he had not been exceeding the speed limit, so he was astonished when the village policeman brought the car to a standstill.

"I say," protested the driver, "I wasn't doing more than ten miles an hour, I swear it!"

"Oh, that's all right, sir," replied the officer. "I wasn't worrying about that, but I'd be obliged if you could spare me a little gasoline. I'm going to a wedding tomorrow and I want to clean my gloves."

### Volcano in United States

The United States has a live volcano of its own in northern California, called Lassen peak. Its latest important eruption began in 1914, and it has been more or less active ever since. The mountain is nearly two miles high, and there is enough fire inside it to run the machinery of all the factories in this country.

### Danger in Searchlight

Searchlight rays so powerful as to develop "sunburn" upon any person who gets in close proximity, come from a light constructed by the Sperry-Gyroscopic company on Long Island. The light is 90,000,000,000 candlepower and it has a lens with a diameter of 96 inches. The beam can be flashed over a distance of 50 miles.

You may as well try to conduct your business without capital as to try and get along without advertising. There's no use, it won't go. All the leading and most successful merchants use the columns of the Mount Joy Bulletin.

To be perfectly proportioned, a man should weigh 25 pounds for every foot of his height.

## Home Health Club

WEEKLY LETTER WRITTEN EXPRESSLY FOR THE BULLETIN BY DR. DAVID H. REEDER

**CATARRAL DEAFNESS:** It is a very common thing for people to complain of failure to hear well and also they usually blame it on catarrh, they blame the catarrh on the climate and sometimes they move hundreds of miles to get away from a bad climate, much to their dismay they find catarrh just as prevalent in the new location and just as many people complaining about catarrhal deafness.

In most cases climate has very little to do with catarrhal conditions.

On the frontiers of almost any new country the pioneers are free from catarrh. Their children are less free, and their grandchildren suffer just as much as in any other older community. No. It is not due to germs or the evils of civilization, but to diet, to indoor life and more abundant food.

The hardy pioneer is hardy because he is lean, and from force of circumstances, not overfed. His life is mostly in the open.

I know from experience. But few of my readers could tell me of frontier life that I have not personally experienced. Even to passing through the most severe North Dakota blizzard in a tent on the open prairie. Living for weeks on bread made from wheat, ground in a coffee mill, yellow turnips made up the balance of the bill of fare, eighty miles to the nearest store and no roads but the trackless snow. In writing to friends about the climate, later on, I stated facts when I told them that no one had a cold, sore throat, or trace of catarrh. I thought it was the climate.

On the cite of our camp there is now quite a city and I get letters from there complaining about catarrh and the climate.

A famous poet once exclaimed, "Oft in ourselves doth die the ills (or cures) which we ascribe to heaven."

Read what the famous doctor James D. Edwards, father of the osteopathic finger technique in the treatment of deafness says about causes:

"Some mothers are in the habit of instructing their children to forcibly blow their nostrils while occluding the anterior nares with a pocket handkerchief. In the early periods, the eustachian passageway is almost horizontal, hence the practice of closing the anterior nares while blowing the nose should be avoided, as this is often the cause of acute otitis media and pocket handkerchief deafness. Furthermore, nasal irrigation, sprays or syringes, should not be prescribed in early childhood. Instillations of oil, dropper method, is a safer and better procedure. In acute head colds the writer prescribes the following: Camphor, grain three, menthol, grain three, and phenol, drops three to one ounce of liquid alcohol; one dropful of this solution in each nostril three or four times a day. In acute otalgia or earache due to swelling of the eustachian mucosa this oil may be warmed and dropped into the external auditory canal, and should be repeated every hour or two until relieved. This local treatment is, of course, only palliative; osteopathic manipulations of the cervical, submaxillary and upper-dorsal areas are the corrective measures."

Sugar, (white granulated) starch and excess of salt, lack of fresh outdoor air and outdoor exercise causes weakness of the mucous surfaces, poor elimination and toxemia, other factors also aid or contribute to cause catarrh, without catarrh there is seldom a case of impaired hearing. Osteopathic finger surgery or technique overcomes about eighty percent of cases of catarrhal deafness and autogenous therapy with proper diet will remove the cause in a still greater percentage of cases.

All readers of this paper are at liberty to write for information on any subject pertaining to health.

Address all such communications to Dr. David H. Reeder, Home Health Club, LaPorte, Indiana, with at least six cents in postage for reply, giving full name and address.

### Heisey Reunion Aug. 14

The seasonal time for holding family reunions is with us again, and the Heisey folk will hold their 13th reunion Thursday, Aug. 14th, 1924, at Elizabethtown College Chapel, with programs at 10 A. M. and 2 P. M.

### Reunion in August

The annual summer reunion of the Hoffman association, comprising members of this clan from several states, will meet at Millersburg, August 16. Special program are being prepared for the day.

### Ever Think Of It?

Mr. Business Man did you ever stop to think that every copy of the Bulletin is a salesman, visiting many, many homes each week and soliciting business for every advertiser in its columns?

If you want to succeed—Advertise

## The Chew to Choose

YEARS of experience have shown you that BEECH-NUT Chewing Tobacco never stoops to conquer.

We don't use factory hash. We don't buy up cigar and pipe scrap. We don't pack dust and sweepings and stems. We don't cheapen BEECH-NUT Chewing Tobacco with indiscriminately purchased crops or bulk it by mixing in bitter, rancid, thick ground leaves.

BEECH-NUT is always a clean, pure, product, especially cut to just the right size and prepared through to sealing without one touch of hum an hands.

That's why it's still the biggest selling brand in the world. The truest friend 10c. ever had.

Chillard Company
