

PUBLIC SALE OF VALUABLE REAL ESTATE

ON THURSDAY, SEPTEMBER 11, 1924 By virtue of an Order of the Orphans' Court, of Lancaster County, Pa., the undersigned administrators of the estate of John G. Reist, will sell at Public Sale on the premises, on the road leading from the State Highway to the former Nisly Mill, about 2 miles West of Florin, the following:

Tract of Land, Containing 115 Acres More or Less Situated in Mt. Joy Township, adjoining lands of Jacob K. Nisly, Jno. E. Eshleman, B. F. Emch and P. R. R. Company. The improvements thereon erected are a

2 STORY LOG AND FRAME HOUSE LARGE BANK BARN

With Sheds For Tobacco, Corn Barn and other outbuildings. This farm is in a high state of cultivation, about 45 acres in alfalfa and one of the most productive farms in Lancaster Co. There is fruit such as peaches, apples, etc.

Two wells of never failing water on the premises. Persons wishing to view same prior to day of sale, will please call on the undersigned residing in Mount Joy, Pa. Sale to commence at 2 o'clock P. M.

Also on the same day in the Evening, at the Bulletin Office, East Main Street, Mount Joy, Pa., the following real estate:

A 2 1/2 Story Frame House

Containing 10 rooms with Bath and hot water heating plant

A GOOD FRAME STABLE

and other outbuildings. Situated on the side of Market Street, in Mount Joy. This is an exceptionally good building in excellent condition and will make a fine home. Sale at 7:30 P. M. Terms made known by

Chas. S. Frank, Auct. KATHARINE H. REIST, John N. Metrick, Atty. ELI G. REIST, Administrators of John G. Reist, deceased

BETTER MARKETING NEEDED BY PENNA. APPLE GROWERS

Receipts of Pennsylvania grown apples last year in the 15 largest markets in this State were more than double those of 1922, as revealed by statistics obtained recently by the Bureau of Markets of the Pennsylvania Department of Agriculture. Last year 7434 cars of apples were unloaded in the 15 cities, of which 11 per cent, or 840 cars, originated in this state, while in 1922 the total receipts amounted to 6326 cars, 6 per cent of these, or 397 cars being Pennsylvania apples. The 1921 receipts were about equal to the figures of last year when Pennsylvania supplied about 6 per cent of the total. Shipments of apples from Pennsylvania points in 1923 totaled 3500 cars of which number 840 cars, or 25 per cent, were sold in the 15 markets for which records are available.

New York and Washington lead all other states in supplying the larger Pennsylvania markets with apples in carload lots. Records obtained for three years by the Bureau show that these two states supply about two-thirds of the carload apples. Seventy per cent of the apple receipts in 1921 came from these two states; in 1922 they supplied 73 per cent; and last year they dropped to 62 per cent, the decrease being partly balanced by more Pennsylvania apples. The cities showing the largest increases in Pennsylvania receipts were Bethlehem, Johnstown, Philadelphia and Pittsburgh.

Receipts from Virginia soared from 84 cars in 1922 to 464 last year; most of these went through the Philadelphia market. West Virginia and Maryland likewise jumped, a considerable proportion of the 327 cars from West Virginia going into Pittsburgh and two-thirds of the 234 Maryland cars being unloaded in Philadelphia. Apple receipts from Michigan totaled 113 cars, or double the 1922 unloads; these consisted of early fall apples, and the majority were sold in Pittsburgh, although Wilkes Barre and Scranton absorbed 24 cars between them. Delaware apples appeared in about the same quantity as in 1922.

Over 2300 cars of apples came from the western boxed apple states during the year. This necessitated a freight expenditure of over \$1,000,000. With New York furnishing 34 per cent of the carload receipts in the 15 largest markets, the western states 31 per cent, and Pennsylvania only 11 per cent, it is readily seen that producers and shippers in this state must center their efforts along the marketing line in order to get back into their own home markets, and the first factor to be considered is better grading and packing.

OHIO CONCERN PAYS FINE FOR SELLING POOR PAINT

Determined to wipe out adulterated and misbranded paints in this State, the Pennsylvania Department of Agriculture has prosecuted the Brooks Oil Company, of Cleveland, Ohio, for selling so-called Dutch Process White Lead, which was found to be unlawful. As a result of the legal action a fine has been paid to the Bureau of Foods and Chemistry.

Department chemists analyzed the white lead, finding it adulterated with non-lead pigments. According to Dr. James W. Kellogg, the Bureau's assistant director, the offending product was sold in Harrisburg for nine to eleven cents a pound. Pure white lead, he said, is worth about fourteen and one-half cents a pound. He pointed out that inferior white lead is usually sold for several cents a pound less than the best grades.

Some of the reduced or compounded leads are sold as "standard" white lead. This practise is unlawful, as the product must be labelled with the word "compound." Painters, and all paint dealers, are cautioned against selling the adulterated and misbranded products.

Dr. Kellogg explained that all impure white lead, as well as impure zinc oxide, reduced by addition of cheap, inert pigments are required by the State law to be plainly labelled as a "compound" in the brand or trade name. He said prosecution was recently brought in Philadelphia for the sale of a so-called standard white lead, which contained less than four per cent of pure white lead.

The Bureau of Foods and Chemistry is investigating all painting materials on the markets in Pennsylvania. Prosecution will be ordered against all persons selling misbranded or adulterated products.

A Great Convenience Running-water systems were installed on more than 3,100 farms during 1923, according to reports to the United States Department of Agriculture by farmers and farm women who, through the efforts of agricultural extension workers, were interested in demonstrating ways in which this convenience may be economically placed in farm homes and farm buildings.

Prepare Fruit Storage It is a good plan to thoroughly clean and disinfect the storage cellar. Remove the old rotten fruit, apply white wash or some disinfectant, and give the room a thorough airing.

OWL-LAFFS

O. W. L. (On With Laughter)

Christ Mumma told me that a fellow up town asked his wife why she didn't fry a slice of that ham he bought. She replied: "Why I was saving that for your funeral." Can you imagine how happy he must be every time he eats a home cooked meal?

Here's one our devil wrote: There was a young lady named Flapper, Who always looked dainty and dapper, But when she began Drinking beer from a can I felt a desire to slap her.

At Lancaster marriages are becoming such a joke that the daily papers there are putting each day's list of marriage licenses on the comic page.

Oscar Sheetz would like to know this one. If it takes two hours to walk ten miles, how long will it take to run back.

A young fellow who lives out near Strickler's church came to town last evening wearing the loudest necktie I ever saw. I said: "What's the idea?" He replied: "My auto horn isn't working."

Jack Miller told another radio fan that he bought his radio outfit for a song. The fellow said: "So did I but the only darn thing I can get oftentimes is the weather report."

I am beginning to think that about eighty per cent of the automobiles are sold on time but mighty few of them in time. I know a few fellows who think as I do.

Oh well, that old adage has changed as has almost everything else nowadays. Today it's: Where there's a pill, there's a pay.

Two young ladies from town went boating on the lake at Mount Greta. They had no wish to tell when the hour was up so one of them drove a nail thru the side of the boat and remarked: "There now, it will take about an hour for her to fill up with water. When she's nerly full we'll come in."

Philip Schock sold a new roadster to a young lady out in Rapho and was teaching her to drive the car. He said: "And now we'll change gears." She remarked: "I wouldn't change them. The car seems to be running fine as it is."

Frank says he can't see how they can get so dumb in twenty years.

Well, she may be dumb but believe me her father is some slicker. He caught this same girl and the hired man kissing each other while sitting in the hay mow a few days ago and he said: "What's the matter with you two actin' like that? Have you got hay fever?"

The fellow darn near had heart failure and the girl hasn't been able to explain as yet.

Can't be too hard on that pair tho. I grew up a country boy and you can take it from one who knows. A hay mow as a spooning place has a 1924 model automobile beat seven different ways.

En if you doubt my words you can ask any successful farmer anywhere. I asked "Doc" Hollowbush the correct meaning of a Bachelor of Arts. He told me "any good looking, neat appearing man of wealth who has reached middle age and escaped matrimony."

I spoke to a man whose son recently disappeared. The father said: "That boy's wandering in his mind." Just then I interrupted him and said: "That's all right, he'll soon be back. He won't go far."

A recently married woman at Florin said to her husband: "You don't love me any more. I'm going out into the yard and have a good cry." He said: "Please cry over the roses as they need a good watering."

Just for dirty spite she didn't cry a bit and the poor fish had to water them next day.

A WISE OWL

Many Sentenced in 1923 Sentences aggregating more than 350 years and fines totalling \$695,014.93 have been imposed by state and federal courts on 1,012 of the 6620 persons arraigned in 1923.

MORE BY-PRODUCTS USED AS INDUSTRIES INCREASE

New industries are continually being launched, and with every one of them there are certain by-products produced which must be used in some way if the greatest efficiency is to result. The Bureau of Dairying of the United States Department of Agriculture has kept in advance of these growing industries by making feeding tests of numerous such by-products as feed for dairy cows. Some of these feeds tested have only recently been prepared in a commercial way. Their value as feed for dairy cows may be summarized here.

Fish meal, which is made from the waste in the canning of sardines by pressing out most of the oil and then drying and grinding the residue, was found to be worth pound for pound 20 or 25 per cent more than prime cottonseed meal, although not so palatable.

Peanut feed, the residue from cold-pressed unhulled peanuts, was found to possess a nutritive value of 74 per cent of that of prime cottonseed meal. Potato meal specially prepared was worth 78 per cent as much as corn meal. Sweet-potato meal appears to be almost as valuable as corn meal for dairy cows; but the maximum value that can be assigned to velvet-bean meal is but 65 per cent of that of cottonseed meal.

Potato silage and corn silage were found to possess about the same feeding value. Apple-pectin pulp, a by-product in the extraction of pectin from apple pumace, compared with dried beet pulp, was found to be less palatable and less efficient as feed.

Hydrolyzed sawdust is unpalatable, contains but little nutrient, and can be fed only in small quantities. The maximum value that apparently can be given to hydrolyzed sawdust is 14.5 per cent of that of corn meal.

Supplementing with cane molasses a ration already suitable is not economical. Compared with an equal weight of hominy feed, the molasses appears slightly less valuable. Molasses renders feeds of poor quality more palatable and induces a greater consumption of nutrients, a matter of importance in feeding exceptionally high-producing cows.

VIGILANCE AGAINST ANTHRAX URGED BY DEPARTMENT

Anthrax, an acute infectious disease affecting animals and occasionally man, has broken out in several Southern and Western States Department of Agriculture announces. Reports from veterinarians of the Bureau of Animal Industry show that most serious outbreaks have occurred in Mississippi, Louisiana, Arkansas, Texas, and South Dakota.

Cattle and sheep are most susceptible, but none of the domestic animals are exempt. Anthrax is caused by a germ which multiplies rapidly in the body, especially in the blood, and produces poisonous substances which cause death. The germs probably are most commonly taken in with food, though they may gain entrance also through wounds.

The symptoms of anthrax very greatly, according to the acuteness of the attack. The early stages usually are characterized by high fever, rapid pulse, and labored breathing. In the most common form of the disease there are also local external swellings or tumors. Death ensues in from a few hours to several days.

Medical treatment is usually of no avail in acute cases. The most effective method of dealing with anthrax is by prevention. The preventive measures recommended are (1) protecting individual animals by vaccination and (2) burning or deeply burying the carcasses of animals that have died of the disease, so as to avoid infecting the ground.

Walked Five Miles Daily

By wearing a pedometer, an Iowa farm woman found she usually walked 5 miles each day in preparing meals for her family of three. With the aid of a member of the cooperative agricultural extension service of that State, she studied the placing of her kitchen equipment. After rearranging it to meet her particular needs more effectively, her pedometer showed, according to reports to the United States Department of Agriculture, that the distance she had to walk in preparing one day's meals was but 2.5 miles, exactly half that required before, leaving her, she states, more time to read, write, and sew.

Budding Fruit Trees

The time for budding has arrived for fruit men who grow their own seedlings and wish to propagate their stone fruit trees for next year. This method of securing your orchard stock is cheaper and gives you varieties that are "true to name."

Marietta Won Sunday

The All Stars of Marietta and East Petersburg played a very good game on Brown's athletic field here Sunday, the river boro lads winning 3 to 1.

Wonderful Growth! Last Friday, We Opened Six New Stores

- One in Baltimore Md.
One in Centralia Pa.
One in Dover N. J.
One in Media Pa.
One in Paulsboro N. J.

And One Big Combination Store in Delaware Gardens, N. J. This Friday, August 29, We Will Open Six More

- One in Pottsville Pa.
One in Rutledge Pa.
One in Pittston Pa.
One in Philadelphia Pa.
One in South Springfield Pa.
One in Cambridge Md.

Just Think of It! This wonderful growth is due to the increasing demand for ASCO Service. It means that more and more people are realizing every day that it DOES Pay to Trade Where Quality Counts. They are learning that their money goes further in an American Store than elsewhere.

Housewives appreciate the thorough Quality of ASCO Products, and they see the saving of money there is in shopping with us. The result—TWELVE New Stores within Two Weeks. It will bring ASCO Service to more and more people.

ASCO GINGER ALE bot 10c Dozen bottles, \$1.17. ASCO Sarsaparilla and ASCO Root Beer at the same price. No charge for bottles, and we pay one cent for each empty returned.
