PRATT FEED FACTS

THEY DUMPED GASOLINE IN THE SEA TO GET RID OF IT

many years ago, before the days of automobiles and gas engines. What a waste that was! To-day thousands of poultrymen are just as wasteful with their cockerels.

The other day I walked down South Front Street, Philadelphia, where there are a lot of poultry dealers and commission men. There I saw hundreds of crates of scrawny, but healthy, young cockerels that folks had gathered up and shipped to market "to save the room and cost of feeding." In that condition the cockerels were a drug on the market and hardly sold for enough to pay the shipping charges. Ninety-nine out of a hundred folks actually lose money on their cockerels.

Cockerels are a source of big profits if they are fed right. That's the whole secret of the difference between profit and loss, where cockerels are concerned. If you take your long legged, lanky, active birds with muscles as tough as leather, put them in a crate and ship them off to market, well, that's like dumping gasoline in the ocean "just to get rid of it."

Do you know you can easily increase the weight of your cockerels a third? Do you know that you can change those tough, stringy muscles to tender, delicate flesh? You can!

Pratts Buttermilk Fattening Mash makes summer cockerels profitable. Just pen them up for a week or ten days and feed them nothing but this wonderful mash and watch the results. Whether you kill and dress them or ship them alive, you will get top prices that will surprise you.

Users of Pratts Buttermilk Fattening Mash know it puts tender meat on the fowls and cash in the pocketbook like magic. It is one of the most difficult things in the whole feed business to make a really good fattening mash. The secret is guarded jealously in many cases. Don't let that worry you.

Pratts have been acknowledged poultry authorities for over half a century. We know how and you'll find our very best skill in Pratts Buttermilk Fattening Mash, one of the finest of the feeds in Pratts, "America's Quality Feed Line".

The Produce and Live Stock Market

CORRECT INFORMATION FURNISHED WEEKLY BY THE PENNA. BUREAU OF THE MARKETS FOR THE BULLETIN

Holiday Hits Produce Market

The Fourth of July holiday plus Sunday hit the wholesale fruit and vegetable market hard today, according to the Federal and State Bureaus of Markets. Although offerings of fresh fruits and vegetables were moderate to light, they were more ample for the demand and prices on most all commodities were decidedly lower. In many cases the market opened at about former prices but because of the slow buying lower levels were quickly established in an effort to clean up supplies.

The main factor in this slump was the absence of the out of town buyers from the market and the light buying by retailers who were cautious in order not to have any perishables on hand to carry over the week-end.

The highly perishables, berries, peaches and cantaloupes were most seriously affected, but other lines except those which were in very light supply also were slightly lower.

Nearly stringbeans were an outstanding feature because from having been scarce there was suddenly an abundant supply. Prices were generally one half of those obtained yesterday.

Egg Market Firm

Pennsylvania furnished 685 of the 844 cases of eggs on the Philadelphia market Friday. Virginia furnished 89 and Maryland 132. The market today was firm, with extra firsts quoted at 36c per dozen. Firsts, in new cases, sold at 34c per dozen.

The live poultry market was firm with White Leghorn fowl quoted at 20c to 23c per pound. White Leghorn broilers, 23c to 28c. Plymouth Rock broilers sold at 36c to 46c per pound and mixed broilers at 34c to 40c.

Beef Market Stronger

Peaches were in moderate supply on the Philadelphia market this morning and the market was stronger, according to the State and Federal Bureaus of Markets. Fancy large fruit was higher in price. Georgia is furnishing the bulk of the supply and last week shipments from this State jumped to 1,975 cars.

Cantaloupes, although limited in supply, were fully ample for the demand and prices showed no material change. There were 1,630 cars of cantaloupes shipped during the past week and with the exception of 100 cars from Georgia, Arizona and Louisiana, practically all cars originated in the Imperial Valley of California. Watermelons were more plentiful and lower in price. New potatoes were in limited supply and the market was generally steady. Beets, Cabbage and Carrots were weaker, while nearby Lettuce was unchanged.

New Apples More Plentiful

Receipts of new apples from Delaware and New Jersey are becoming more liberal on the market, according to the report of the Federal and State Bureaus of Markets. The Early or summer varieties are crowding the market and the stock of the market and while there are still Washington Wine-saps at the fruit stands the general public wants the fresh yellow apples. The Yellow Transparent and Starr are the principal varieties. Although the prices have been high on fancy fruit the market is declining as the supply becomes more plentiful.

There are only moderate supplies of small berries on the market and the prices on good quality stock continue high.

Nearly all vegetables are in light supply for this period, largely because of the hot dry weather during the past month. The bulk of the vegetable supply still arrives from distant points. Cucumbers from North Carolina and Virginia are still plentiful and in poor demand. First arrivals from Delaware and Maryland are selling at low prices.

The potato market continues dull with only moderate supplies coming from the Eastern Shore and Norfolk districts of Virginia. Small lot of New Jersey stock, mostly small in size, are arriving from nearby points and are selling at a wide range in prices.

Cantaloupes Supply Moderate

Cantaloupes showed a wide range in quality and condition on the Philadelphia market this morning, according to the State and Federal Bureaus of Markets. Supplies were moderate and the demand fair for good stock. Georgia has begun to ship 'lopes' but they are mostly of poor quality. The bulk of the supply is from California, Georgia and Florida watermelons were in moderate supply and the market steady. Trading was slow with some stock showing decay. Tomatoes were weaker and prices a little lower. Potatoes were steady and the bulk of supplies were only fairly well graded. The first Jersey sweet corn made its appearance on the market this morning. Nearby apples were more plentiful and the demand fair. Green beans were in demand while beets, cabbage and carrots were weaker.

Feed Markets Dull

Feed markets are dull and prices generally a shade easier. Wheat fed quotations experienced quite a set back and offerings were decidedly liberal. The Eastern demand is very light as the result of satisfactory pasturage and inquiries from other sections have materially fallen off. The export demand for old meals is light and the domestic demand poorer. Stocks in all sections are quite ample and mixed feed manufacturers appear to be the principal buyers.

Summer Apples on Market

Summer apples from New Jersey and Delaware are appearing on the Philadelphia market, according to the State and Federal Bureaus of Markets. Supplies are still limited and the demand slow. The first Jersey cucumbers were off red this morning and brought top quotations. Cantaloupes and peaches

held steady while watermelons were more active at slightly lower prices. Cabbage was more plentiful. Ohio stock was steady but Maryland stock was lower due to poor quality. Tomatoes showed a wide range in quality and condition but prices were steady. New Jersey tomatoes are becoming more plentiful. The potato market was firm and prices were higher than on Saturday. New York State is furnishing the bulk of the currants and strawberries that are on the market. Jersey string beans were in light supply and green stock was in demand. Fancy onions met an improved demand at higher prices. Squash were more plentiful and prices declined.

GRAIN MARKET CONTINUES DOWNWARD TREND

Favorable crop conditions at home and abroad forced grain prices downward on a nervous market during the week ending June 27, according to the weekly grain market review of the United States Department of Agriculture. The corn market was sharply lower with a big improvement in crop conditions. Moisture was sufficient and temperatures were favorable for promoting rapid growth, although rainfall was insufficient in most of the Southern States. The oats and wheat market declined with improved crop conditions of the growing crop.

Hay Prices Firm

Light receipts of hay at interior markets again forced hay prices higher although California and Northeastern markets were practically unchanged. Farmers in most sections were marketing sparingly with prospects for a reduced crop although rains during the week were beneficial to pastures and meadows. The Timothy market continued firm with higher prices at New York and interior markets although Boston market was easier with receipts in excess of trade needs.

MARKET: Market active, strong bidding on good fed and grass-cuts. Beef steers showing new top. Dry fed locals grading good and better 25c to 50c higher, spots up more, grassers showing 15c to 25c advance, top dry feeds \$12.25 average weight 1270, some held above \$12.50 bulk \$10.50-11.25. Top grassers \$10.10, bulk \$8.25 to 9.25. Bulls, she stock and canners slow about steady. Calves steady, top vealers \$13.25, few selects \$13.50. HOGS: Hogs inactive, no fresh receipts.

RECEIPTS: Cattle 19 cars;—11 St. Louis; 3 Penna.; 2 Chicago; 2 Virginia; 1 Maryland, containing 539 head, 226 head trucked in from nearby. Total cattle, 765 head, 22 calves.

Range of Prices:

STEERS

Good to choice \$11.25-12.50
Fair to good \$10.50-11.25
Medium to fair \$9.25-10.50
Common to medium \$7.50-9.25

BULLS

Good to choice \$7.00-8.25
Fair to good \$6.00-7.00
Medium to fair \$5.50-6.00
Common to medium \$4.50-5.50

HEIFERS

Choice to prime \$8.75-9.50
Good to choice \$8.00-8.75

Straw \$10.00-11.00 ton

Selling Price of Feeds

Bran \$39.00-40.00 ton
Shorts \$40.00-41.00 ton
Hominy \$50.00-51.00 ton
Middlings \$47.00-48.00 ton
Linseed \$58.00-59.00 ton
Gluten \$49.50-50.50 ton
Ground Oats \$42.50-43.50 ton
Cottonseed 41 pc. \$52.00-53.00 ton
Dairy Feed 16 pc. \$39.00-40.00 ton
Dairy Feed 18 pc. \$43.50-44.50 ton
Dairy Feed 20 pc. \$45.50-46.50 ton
Dairy Feed 24 pc. \$50.00-51.00 ton
Dairy Feed 25 pc. \$53.00-54.00 ton
Horse Feed 85 pc. \$48.00-49.00 ton

Insect Pests

Entomologists at the Pennsylvania State College are advising the following insect control measures this week: For second brood oriental peach moth (egg stages) now at its height, spray with nicotine sulphate solution; for cabbage lice, dust or spray with nicotine as soon as they show up in the field; lead arsenate can be added to control the cabbage worm; red spiders are showing up on apples and can be controlled with the spray application for the second brood codling moth later in the month.

Swine Tours

Swine breeders of Pennsylvania will have opportunity to go on two auto tours, arranged for this summer by swine extension specialists of State College. Breeders in eastern counties will tour the Shenadoah Valley in Virginia on July 30 to 31. Western Pennsylvania hog men will have the Ohio experiment station at Wooster, O., as the objective in a trip schedule for August 12 and 13. Your County Agent will give full information.

Potato Prospects

Specialists at State College believe that prospects were never brighter for potato growers than this year. The quality of Pennsylvania sprouted potatoes is satisfactory to the market, and spraying enables the grower to produce more on less acreage. There should be at least seven applications of spray during the growing season.

VERY GOOD MARKETING HINTS FOR HOUSEWIVES

Feeding the family is one of the biggest problems that the housewife has to solve. The usual family of today is not satisfied with a meat and potato diet but ask for variety. This makes her problem still harder. In summer the housewife wants foods that are appetizing and easy to prepare. To supply this need farmers in approximately 18 States are growing and shipping vegetables into the Philadelphia market. This morning there were over 28 different vegetables and about 15 fruits offered. This seems to be an "in-between season" and although there is a wide variety there are comparatively few products that are plentiful and cheap.

Potatoes are abundant and fairly reasonable in price. The Eastern Shore of Virginia is supplying most of the stock offered in Philadelphia. New Jersey is shipping a few new potatoes but so far they are immature and small. Watermelons from Florida and cantaloupes from California are plentiful and are selling at reasonable prices for this time of year. Georgia peaches are also abundant.

Summer apples are on the market and more plentiful. These early apples make fine appeasance and add variety to the menu. Prices are fairly high but will probably drop as the season advances. New Jersey squash have been arriving for some time and wholesale prices are considerably lower than a week ago. Cucumbers from the South are plentiful and the first ones from New Jersey were offered on Tuesday. Cabbage is high in price and beans are also higher. The New Jersey blackberry season is just opening and there should soon be a plentiful supply. The dry weather cut the yield but the recent rains have helped conditions to some extent. New Jersey sweet corn made its first appearance on the market on Tuesday.

GOOSEBERRY SPREADS SERIOUS PINE DISEASE

The wild gooseberry and all its current relatives have been found to spread the blister rust disease of white pine. This European pest came over to this country fifteen or sixteen years ago and has spread so widely over the white pine range that it could not be suppressed. The fungus cannot pass from one pine to another but must come from nearby gooseberries on which it lives during the summer as an orange or reddish rust on the leaves. There is no doubt that the parasite is as unwelcome to the gooseberry as it is to the white pine tree or to forest owners, but its own guilt in this matter cannot be overlooked and wherever white pines are growing it must be viewed with alarm.

When it comes to a choice between saving the white pine or the humble wild gooseberry then latter should be made the goat every time, states W. A. McCubbin, bureau of plant industry, Pennsylvania Department of Agriculture. The blister rust disease has yet but a scanty foothold in the Pennsylvania but is creeping down gradually from New York and the New England states. Everybody can help to stop it from becoming a menace to our future pine forests by destroying wild gooseberries whenever and wherever found.

DEMAND FOR TB TEST GREATEST IN HISTORY

The interest in eradicating bovine tuberculosis from Pennsylvania herds, is the greatest in the history of the State, according to F. P. Willis, Secretary of Agriculture.

On June 15, 90 per cent, or more of the herd owners in 265 townships in 36 counties had signed agreements and were awaiting a tuberculin test under the modified area plan. In addition to the 265 townships, the owners of 23, 125 cattle in 2864 herds had filed applications and were awaiting a test under the individual accredited herd plan.

Testing on the area basis has been completed for all cattle in Mercer, Crawford and Jefferson counties and in 78 townships of 13 other counties: Lawrence, 15; McKean, 9; Columbia, 12; Montgomery, 1; Elk, 3; Blair, 1; Butler, 4; Beaver, 3; Clearfield, 11; Warren, 5; Westmoreland, 5; Erie, 6.

DAUPHIN COUNTY FAIR OPENS ON LABOR DAY

HARRISBURG, Pa., July 6.—The fourth annual Harrisburg-Dauphin County Fair will open Labor Day, September 7, on the spacious exhibition grounds along the William Penn Highway just east of the city limits and will continue for five days until September 11.

As a forerunner to the annual fair, a special feature matinee horse racing card has been arranged for July 25 when Central Pennsylvania people will have an opportunity to see some first-class horse racing on a track known as one of the finest in the State.

Thousands of dollars recently have been expended in erecting new buildings and in grading and improving the grounds and track. The fair grounds are served by good trolley service and are accessible by automobile from all parts of the State. Twenty-five acres have been reserved for automobile parking space.

Second Garden Crops

Where conditions are favorable it is advisable to plant second crop vegetables in the garden. There is time for many different kinds to mature. Until August 1 the following may be planted: dwarf snap beans, cress, fennel, kahl, lettuce, mustard, radish, spinach and turnips. Until mid-July plant beets, carrot late celery and endive.

The Flower Bed

Bare spots in the perennial borders can be filled in now with some of the better annuals such as snap dragon, sweet alyssum, zinnia and petunias, not to mention the bulbous gladiolus.

Shoot to Kill
THE PESKY FLIES

Just insert the handy atomizer in a bottle of McNess Kilfly and blow the vapor into the room. It harms nothing but flies. They drop dead in a hurry. Sweep them up and enjoy complete freedom from the annoying pests.

McNess' KILFLY

is simple, sure, safe, easy to use. Won't spot nor stain. Why be bothered with flies when it is so easy to get rid of them without chasing them or catching them with sticky paper or poisons. The Kilfly Way is the easy way—the right way. Try it. I will gladly demonstrate Kilfly when I call.

In case I have not called on your home or have just been to your home send your order for Kilfly by mail or telephone. Kilfly comes in 11 oz. bottles, price 50 cents and in quart cans, price \$1.25. Hand atomizer, 40 cents. McNess Kilfly kills flies, cockroaches, bed bugs, moths, mosquitos, ants and fleas.
