

SWINE BREEDERS TOUR SHENANDOAH VALLEY

The Farm Bureau is perfecting arrangements for the participation of interested county swine breeders in the annual growers' tour that has been outlined by the Extension Department of State College.

the leading livestock farms in the Shenandoah Valley where hogs, cattle and two breeds of beef cattle.

This tour will be one of the most interesting and instructive ever planned and it affords a splendid opportunity for farmers to take a profitable two-day vacation, according to Mr. Zug.

The Farm Bureau is furnishing details of the trip to those who intend going and it is also keeping in touch with car owners who wish additional passengers to arrange for accommodations for those who will want to go with some one rather than drive their own cars.

It appears to us that words of that kind show the true inner thoughts of the speaker and in many cases shows the ignorance of the man both as to the laws of safety and decency.

Make the Road Safe. Getting in a heavy harvest—sometimes under poor weather conditions—is a big enough proposition without meeting obstacles on a route such as uneven roadways and ditches. Concrete culverts bridge the trouble and also drain wet, marshy places—making the farm more comfortable and healthful.

Let good brake lining save you. A sudden dash from a side road, frantic jamming of worn out brakes, and your car joins the others on the junk pile. Faulty brakes are to blame for most accidents—any police department will tell you that.

The Best Heating COAL. Pound for pound, Baker's Coal will give you more heat, whether burned in furnace, stove or grate, than any other coal you can buy. A trial will prove the truth of our statement.

Think Of It. 25 DIFFERENT KINDS OF SCHRAFFT'S CANDIES AT 50c A POUND. All of one kind or assorted of all kinds at the same price. Just received a full line of Summer Marshmallow Candies and Milk Loaves.

The Produce and Live Stock Market

CORRECT INFORMATION FURNISHED WEEKLY BY THE PENNA. BUREAU OF MARKETS FOR THE BULLETIN

The abundance of string beans featured the wholesale fruit and vegetable market this morning, according to the reports of the Federal and State Bureaus of Markets. Good beans, of the stringless varieties, sold well in comparison to the others.

The offerings of peaches from distant points were moderate. The later variety of Elbertas is becoming more plentiful and is rapidly taking the place of the earlier season is about over. This morning's market showed a stronger tone on shipped peaches, a few sales of fancy stock exceeding the high marks of yesterday.

Potatoes were practically all in poor condition. There was but one carlot of Virginia stock which did not show more or less signs of decay. There was a good demand for good stock and the market continued firm.

Potatoes in Poor Condition. The receipts of potatoes were heavy over the week and most of the stock arrived in very poor condition, according to the reports of the Federal and State Bureaus of Markets. The Eastern Shore of Virginia stock, which represents the bulk of the supply at the present time, mostly showed the effect of sun and many were very waxy. These potatoes sold at low prices, according to condition.

Cantaloupes and peaches were fairly liberal and while the former weakened peaches were about steady. Green vegetables were dull and moved slowly on account of the Japanese beetle plagues. Lettuce and peas were considerably lower. Small berries showed a slight improvement in quality and prices. Tomatoes continued to sell slowly under liberal receipts.

Grain Prices Slightly Higher. Following a three weeks' decline the grain market turned firmer during the week ending July 11th and prices worked slightly higher according to the weekly report of the United States Department of Agriculture. Rust claims persisted both in the United States and Canada and had some influence on the wheat market although no serious damage was reported. An increase of over 100,000 bushels of wheat is expected in Canada. The latest reports from Europe indicate a substantial increase over last year's short crop. However, according to present conditions it is probable that the wheat crop in the Northern Hemisphere will be only slightly heavier than a year ago while stocks are much smaller.

Hay Market Firmer. Increased receipts weakened the market during the week July 6-11th and part of the recent advance was lost. The demand improved slightly with more inquiries from the south but consumers were taking only for immediate needs and receipts were fully equal to trade needs. Poor hay became draggy under increased arrivals at Boston and Pittsburgh. Timothy averaged steady. Alfalfa and prairie held steady. Hay prospects were generally reduced during June.

Two New Houses. Two new built houses on South Barbara street, Mt. Joy, each side has 6 rooms and bath, light, heat, open stairways, 3 porches, concrete walks, slate roof, and built A1 in every respect. Come and see them. J. E. Schroll, Mount Joy.

Next Community Sale. The next Community Sale at Florin will be held on Saturday, July 25, when the usual large assortment of personal property will be disposed of at public sale. Sale will start promptly at 12:30.

MARKET: Market fairly active for good to choice beef steers and heifers. Compared with week ago, local dry fed beef steers and grassers, grading good and better fully steady, early week's decline practically wiped out. Common killers showing decided weakness.

Perry Countian's Annual Reunion

WILL BE HELD AT CASSEL'S PARK, IN EAST DONEGAL TOWNSHIP, ON SATURDAY, JULY 25

The sixth annual reunion of the Perry countians of Lancaster county and their friends will be held in Cassel's Park, East Donegal township, near Marietta, on Saturday, July 25.

A great effort is being made to have this event surpass all former reunions. A band will be in attendance all day and furnish music.

Exercises will begin at one o'clock and will be as follows: Devotional exercises conducted by Rev. Gable, of Maytown; Address of Welcome by Prof. Arthur P. Mylin, Superintendent of Public Schools of Lancaster County; Response by Rev. George S. Albright, of Kinderhook.

Prof. D. A. Kline, of New Bloomfield, Superintendent of the Public Schools of Perry County, will deliver the address in the afternoon.

At two o'clock there will be a base ball game between Maytown and Brown's A. C. team. Athletic contests will follow at 3:30 P. M. Everybody is most cordially invited to attend the day's outing. You are urged to attend and get acquainted.

The committee is making a great effort to have this reunion higher and better than any ever held.

UNIFORM RULES NEEDED FOR ACCREDITING FLOCKS

The poultry-breeding industry of the United States is making a determined effort to bring harmony out of the confusion that now exists because of the differences in the rules and regulations applied to certification and accreditation of flocks in the various States.

Under present conditions when a prospective purchaser is buying eggs, baby chicks, or breeding stock comes across the word "accredited" or "certified" in connection with the advertised flocks, he does not know just what factors were taken into consideration to certify or accredit these flocks, unless he is familiar with the regulations governing such work in each State. The great difference in methods, plans, and rules governing the accreditation and certification of poultry in different States is serving to retard the progressive development of the industry and in unfairly shielding some breeders whose flocks are certified under less stringent rules than others.

At present there are 22 States which have adopted regulations for certification and accreditation of flocks. The difference that exists between the regulations in these States is seen in the case of baby chicks. In one State chicks are sold by grade based on the production of the parents; in another case two grades of chicks are offered, one grade being from accredited flocks that are not tested for bacillary white diarrhea, and the other grade from flocks that have been tested and found free from the disease. In another State chicks are sold on a basis of four grades according to the grading of the adult birds, and the grading of the adult birds is based on their general qualities. Still another sells certified as well as two other grades of chicks, the certified chicks being produced from certified males mated to certified females, while of the other two grades the first are chicks produced from old hens mated to certified cockerels, and the second grade are chicks produced from certified pullets mated to certified cockerels.

The general committee appointed to cooperate with the poultry office of the United States Department of Agriculture has made a survey in which this same degree of difference in State rules and regulations was found to exist in regard to hatching eggs and breeding stock as well as baby chicks. The committee is of the opinion that if the States can get together to discuss these differences much can be done to stabilize the poultry-breeding industry. Also, from the standpoint of interstate commerce in hatching eggs, baby chicks, and breeding stock, the committee feels that uniformity in the State rules and regulations concerning the accreditation and certification work is necessary if poultrymen are to retain this business.

CATTLE EXHIBITS WILL FEATURE COUNTY FAIR

The Lancaster Fair Association has started preparations for the coming Agricultural Fair to be held in the early fall. Racing, will be the big feature that will attract thousands but farmers and stock raisers will be interested in knowing of the exhibits of fine cattle.

Lancaster County has long been noted for prize cattle, but of recent years our cattle have not been exhibited in sufficient numbers. In this year's fair the Guernsey Breeders Association, of which E. G. Bushong is Superintendent and the Holstein Cattle Association, directed by John H. Shirk, gave promised to exhibit an aggregate of at least two hundred head of fine Lancaster County Stock. The farmers will compete among themselves for prizes and the interest will be very keen.

All the stock exhibited will be T. B. tested and many exceptionally fine specimens will be in the showing. Other fine breeds will also be shown at the Fair. Young America will have a big part in this year's Fair, as a Boy's Calf Club is affiliated with both the Guernsey and Holstein associations and the boys will also compete for prizes.

The Produce and Live Stock Market

CORRECT INFORMATION FURNISHED WEEKLY BY THE PENNA. BUREAU OF MARKETS FOR THE BULLETIN

Receipts: For today's market: Cattle 13 cars: 4 from Kansas City 3 Tennessee; 2 Penna.; 2 Virginia; 2 St. Louis; containing 341 head, 64 head trucked in from nearby farms. Total Cattle 405 head, 11 calves.

Receipts: For week ending July 18th, 1925: Cattle 140 cars: 12 Virginia, 31 St. Louis, 21 St. Paul, 17 Kansas City, 6 Chicago; 6 Tenn.; 6 W. Va.; Ind., 4 Pa.; 3 Buffalo; 3 Pittsburgh; 2 Oklahoma, 1 Ohio, 1 N. Carolina, 1 New Jersey and 1 Mich., containing 3952 head, 265 head trucked in. Total Cattle 4217 head, 453 calves, 83 Sheep, 21 Hogs.

TREES DAMAGED BY TUSSOCK MOTH INVASION

The white-marked caterpillars which have practically defoliated many shade trees during the past few weeks are bringing inquiries about their control to the State Department of Agriculture.

This insect is the white-marked Tussock moth which is unusually abundant in many of the town and cities of Pennsylvania, and during the past few weeks has done much damage to shade trees, according to G. Guyton, entomologist, Bureau of Plant Industry.

There are usually two generations of this moth in a year; the first brood appearing in the last part of May, and the second one about the first of August.

The insect is characteristically a town and city pest. It is thought that probably the reason for this is the lack of bird enemies of the pest in the cities.

The control of this insect is rather difficult, since it is not always possible to spray the infested trees with a poison spray. Where it is possible to spray the trees, one thorough spraying with a spray composed of 1 1/2 pounds of powdered arsenate of lead to fifty gallons of water will give complete control. However, it is necessary that all the trees in the vicinity be sprayed at the same time.

VISIT OUR Fast Color Fabrics Department AND ASK FOR Peter Pan Suitings. This excellent cloth is Fast Color. Every yard is guaranteed to come through the rub of the tub looking as good as new. We will replace the cost of the entire garment if any Peter Pan cloth fades under any condition.

Shoot to Kill THE PESKY FLIES. Just insert the handy atomizer in a bottle of McNess Kilfly and blow the vapor into the room. It harms nothing but flies. They drop dead in a hurry. Sweep them up and enjoy complete freedom from the annoying pests. m'ness' KILFLY is simple, sure, safe, easy to use. Won't spot nor stain. Why be bothered with flies when it is so easy to get rid of them without chasing them or catching them with sticky paper or poisons.
