

Shoot to Kill THE PESKY FLIES

Just insert the handy atomizer in a bottle of Mcness Kilfly and blow the vapor into the room. It harms nothing but flies. They drop dead in a hurry. Sweep them up and enjoy complete freedom from the annoying pests.

Mcness' KILFLY

is simple, sure, safe, easy to use. Won't spot nor stain. Why be bothered with flies when it is so easy to get rid of them without chasing them or catching them with sticky paper or poisons. The Kilfly Way is the easy way—the right way. Try it. I will gladly demonstrate Kilfly when I call.

In case I have not called on your home or have just been to your home send your order for Kilfly by mail or telephone. Kilfly comes in 11 oz. bottles, price 50 cents and in quart cans, price \$1.25. Hand atomizer, 40 cents. Mcness Kilfly kills flies, cockroaches, bed bugs, moths, mosquitos, ants and fleas.

The Produce and Live Stock Market

CORRECT INFORMATION FURNISHED WEEKLY BY THE PENNA. BUREAU OF MARKETS FOR THE BULLETIN

Potato Prices

There has been an upward trend in potato prices since the middle of June, according to the State and Federal Bureau of Markets. Comparatively light supplies in terminal markets, due to a let-up in shipments, as well as the presence of much inferior quality stock have helped hold good barreled potatoes around the \$6.00 mark. Prices in city markets have been double and in some instances, three times those of the same week last season. The prevailing range was \$5.50 to \$6.50 per barrel. The last report from Eastern Shore of Virginia quoted these potatoes at \$5.75 to \$6.00, or, an advance of 40-50c over the previous week's sales. Prices for Eastern Shore of Virginia U. S. No. 1's in Philadelphia ranged from \$6.25 to \$6.50 on Wednesday, while similar stock from New Jersey in 150 pound sacks at \$4.50 to \$5.00 of the Jersey stock, however, was undersized.

The total movement of potatoes during the fourth week in July was 2,880 cars, nearly 1,700 less than shipments for the previous seven days. About 700 cars less moved from the Eastern Shore of Virginia, and Kansas' output decreased 50%. Ships from New Jersey and the Long Island section of New York were more active.

Ga. Peach Season Closing

Peach markets have been more or less unsettled, as the success of supply shifts from Georgia. Elberta sold in consuming centers at \$2.25 to \$2.75 per crate or bushel basket, practically the same range as the previous week. The market in Philadelphia was steady with the same stock quoted at \$2.00 to \$2.75. California lead last week's shipments of peaches, 767 cars moving from the Northern District and 809 from the Central District. Georgia forwarded only 1,195 cars, or less than 50% of the number rolled the week before. The total output of the country compared favorably with the previous week but was about 140 cars less than during the same period last season.

Wheat Shipping Light

Pennsylvania farmers have started to market their wheat but shipments to Philadelphia are light compared with former years. The quality of the wheat is generally good with over 40% grading No. 2 Red Winter, according to the State and Federal Bureaus. There was one car of unusually high quality wheat from Lancaster County that graded No. 1 Red Winter. There was much less garlic in the shipments than at this time last year. Relatively little smut was reported in the shipments to Philadelphia, but many mills have complained of smutty wheat, especially in Lehigh county. Excessive moisture was the chief factor in lowering the grade of most cars. None of the cars reported contained any Angoumois moth. The majority of the shipments were from Lancaster and Lebanon counties, while Delaware, Dauphin, Berks, Chester and Lehigh were also represented. Most mills in Pennsylvania report a fair demand for wheat and are paying \$1.30 to \$1.50 per bushel. The highest prices are being paid by mills in Lycoming county.

Cucumbers Plentiful

All sizes and grades of New Jersey cucumbers are very plentiful on the Philadelphia market. The crop is ripening rapidly due to weather conditions, and the supply is greater than the market can readily utilize. Lime beans are coming mostly from New Jersey, although the Eastern Shore of Virginia and Delaware are also shipping. Supplies of this vegetable are increasing but the demand is slow at present prices. Nearby egg plants, peppers and corn were weaker and apples were especially dull.

Potatoes were in moderate demand and prices held firm. Eastern Shore of Virginia stock was quoted at \$6.50 to \$6.75 per barrel. Southern peaches were plentiful and met a slow demand. Prices were generally lower except fancy bushel stock. Cantaloupes moved at lower prices. Onions were more liberal with a moderate demand. Offerings of lettuce were light and the market stronger. Pennsylvania cabbage held steady under limited supplies.

Egg Market

The Philadelphia egg market was steady with extra firsts quoted at 38c and firsts in new cases at 34c per dozen. Firsts in second hand cases sold at 32c and seconds at 30c to 31c per dozen.

MARKET: Better grades beef steers and fat heifers, fair active other classes slow. Compared with week ago, beef steers, steady, stronger tendency on better grades, top \$10.75, average weight 1230 pounds, bulk of sales \$7.50 to \$9.25, bulk cows \$3.25 to \$4.75. Steers and feeders broader de-stocked and in feeders, medium grades, light weights predominating, bulk of sales, \$5.25 to \$6.50. Calves, firm, top vealers \$13.00, few selects \$13.25.

HOGS: Inactive.

RECEIPTS: Receipts for today's market.—Cattle 25 cars: 13 Virginia; 4 Kansas City; 3 St. Paul; 2 Tennessee; 1 Pennsylvania; 1 Chicago; 1 North Carolina; containing 713 head, 20 head trucked taining 713 head, total cattle 753 head, 48 calves 95 hogs. Receipts for week ending August 1st, 1925: Cattle 173 cars—74 Virginia; 30 St. Paul; 16 Chicago; 9 Kansas City; 7 Tennessee; 2 Penna.; 2 N. Carolina; 1 Pittsburgh; 1 Buffalo; 1 Ohio; 1 Kentucky; 1 Delaware; 1 New York; 1 Indiana; containing 4979 head, 152 head trucked in, total cattle 5131 head, 223 calves 181 hogs.

Medium to fair	\$4.75-5.25

MARKETING HINTS FOR HOUSEWIVES

When you read the market reports of the United States Bureau of Agricultural Economics or hear them over the radio, of what does it make you think when you hear that apples are plentiful? I think grandmother used to make; brown Betty with rich cream, apple pie about two inches thick and round flay apple dumplings.

These are just a few of the apple desserts and there are many more just as good. New York and Delaware farmers are shipping truckloads of summer apples into Philadelphia and prices are low. You can buy the Yellow Transparent, an apple with a smooth green skin that becomes yellow as it ripens. These are fine for cooking and when ripe are a fair eating apple. Then there is the Starr with the dark green skin, blushed with a dark red. These make excellent baking and cooking apples. The Williams Early Red is probably the best eating apple that comes into the market during the summer months. It is a beautiful red apple striped with yellow and has an unusually fine flavor. In some sections of New Jersey, the growers spread a heavy layer of straw under the trees and allow these red apples to remain on the tree until they fall. The straw breaks the fall and prevents bruising and the apples have a much higher color and finer flavor than when picked earlier.

Red Astrachan apples are also offered; these are those yellow apples with the dull red stripe. They have an acid or tart tang that makes them especially desirable for cooking and for jellies.

Prices on all grades and sizes are reasonable but you will always find that the smaller ones are the cheapest. It is the small sizes that sell slowly, forcing dealers to reduce their prices to the lowest that will move them. Buy for eating and for cooking and for eating and baking purchase the larger ones.

It is claimed that there are styles in food, just as there are styles in clothing and I have read that apple pie is a dish of the past that restaurants in some of the larger cities are omitting it from their menus. I don't believe that apple pie, that is good apple pie, will ever lose its popularity. Buy some of these summer apples and concoct one of those deep pies and try it on the family.

MINING PROBLEMS DIFFERENT

A gold mine is not an everlasting proposition—not is any other type of mining. The owners of a mining property are usually amply repaid on their investment before it is exhausted, but a new property must be developed or our metal supply falls off.

The impression that existing mines are everlasting is a dangerous idea. The hazards of mining are great and the rewards should be great.

The industry cannot be compared with manufacturing or farming from a production or valuation standpoint.

Legislation or taxation which tends to reduce the incentive for mining or its possible profits to the usual commercial rate of return would ruin mining, for no one would venture money on such a basis.

CLAIMS HEN LAID 12 EGGS IN ONLY THREE DAYS

George Rice, well known Port Trevorton citizen, claims ownership of all cham egg layers who produce two eggs in three days, a record that cannot be surpassed anywhere, according to the owner.

Mr. Rice insists that he has only one chicken and when he went to the pen a few days ago he found six eggs in the nest. He looked again the following day, and there were three; the day after that three more eggs were in the nest.

Mr. Rice is candid in his claim, and residents of the community have absolute faith in the remarkable feat.

Two New Houses

Two newly built houses on South Barbara street, Mt. Joy, each side has 6 rooms and bath, light, heat, open stairways, 3 porches, concrete walks, slate roof, and hot water in every respect. Come and see them. J. E. Schroll, Mount Joy.

Many Trees Were Planted in Penna.

136,002 WERE SET OUT IN LANCASTER COUNTY DURING THE PAST YEAR DEPARTMENT SAYS

Figures compiled by the Department of Forests and Waters show that 136,002 trees were set out in Lancaster county during the spring of 1925. This is the largest number that have been set out in one spring planting season since the Department began to distribute trees to private planters. In spite of the prolonged early summer drought, reports show that most of these trees are growing well and in time will produce fine lumber.

In Lancaster county, 48 tree planters set out 136,002 forest trees, and in Dauphin county 61 owners of forest land planted a total of 103,097 forest trees. Clearfield county stands first among the 67 counties of the State with 54 tree planters, who planted 718,490 trees. Cambria county ranks second with a total of 522,900 planted trees and Indiana county comes third with 435,745 trees. Berks county continues in the lead in the number of persons who set out trees. During the past spring 90 tree planters set out a total of 325,704 trees in all parts of Berks county. Cambria county is second with 87 planters, and Monroe third with 84 planters.

Secretary Stuart is pleased with the progress that forest tree planting is making in Pennsylvania. The Department of Forests and Waters is putting special efforts to enlarge the nurseries so that the tree planting needs in all parts of the State may be met. A larger number of trees would have been planted in the past few years if the nurseries had been able to supply all the demands.

In spite of the nursery shortage, the total output for the past spring during the past spring was 8,236,840 trees, which is more than seventy times greater than the total number of trees planted 10 years ago.

The growth of forest tree planting by private owners of forest land during the last 18 years is shown in the following table:

Year	No. Trees Planted
1910	66,374
1911	25,360
1912	66,854
1913	47,770
1914	108,985
1915	115,577
1916	1,471,875
1917	1,812,977
1918	2,186,899
1919	3,139,531
1920	2,543,374
1921	3,041,710
1922	5,457,817
1923	3,670,821
1924	8,577,464
1925 (spring)	8,236,840

Total 40,549,748

A conservative estimate shows that the 8,236,840 trees set out by private planters during the past spring will reforest approximately 8,200 acres of idle land, and when these trees reach maturity they will produce about 290,000,000 board feet of lumber which is urgently needed by the people and industries of the State.

NEW MILK SALES ACT EFFECTIVE AUGUST

The new milk sales act, effective August 4, brings the sale of milk by producers under the supervision of the Pennsylvania Department of Agriculture in order to insure producers that the milk is weighed correctly, that the sample for butterfat is taken properly and finally that the test is accurately reported.

Notice has been issued to all milk and cream dealers, testers, weighers and samplers in Pennsylvania by James W. Kellogg, director and chief chemist, Bureau of Food and Chemistry. In this notice, Mr. Kellogg states, "All milk and cream dealers who have not already obtained their permits for the calendar year 1925 under the old law are requested to make application for permits for the balance of 1925 on the proper form enclosed. The charge for dealers' permits is \$5.00.

"All milk and cream testers and weighers and samplers are required to obtain a certificate of proficiency from the Department of Dairy Husbandry at State College and make application for a license on proper form enclosed for the balance of 1925, the charge being \$3.00 each. Milk and cream testers who have already obtained their licenses for 1925 will not need to obtain new ones under the new law, but all weighers and samplers will be required to obtain licenses in order to weigh and sample.

"Testers and weighers and samplers may take examinations to obtain certificates of proficiency from the Department of Dairy Husbandry at State College, who will arrange places and dates where examinations can be taken. These certificates must accompany each application for licenses. Upon receipt of applications with checks made payable to the State Treasurer for the amounts required the Dealers' permits and licenses will be issued. These will be required to be renewed on or before January 1 for 1926."

WORK UPON HIGHWAYS OF STATE TOTALS 386 MILES

New construction and replacement work completed this year on highways under control of the State, totaled 286.4 miles at the first of this month, officials in the department of highways announced. Of this amount 279.7 miles are new construction and 6.63 miles replacement. On July 1, 1924, new construction and replacement work completed on July 1 totaled 78.62 miles.

Patrol cutters, upon sighting ice-bergs, allow themselves to drift with the white mass. For days they are required to keep this position until the berg finally dissolves or is no longer considered dangerous.

Goats are sometimes driven over the plowed fields of the Nile Valley to help break the clods.

SILVER SPRING

Mr. and Mrs. John S. Gibble spent Monday at Mount Joy.

Miss Idella Leese is home for a few weeks nursing her father.

Mrs. John Knight spent Sunday with her sister, Mrs. John Ginder.

Miss Emma Musser spent Sunday with her brother Michael Musser. Mr. and Mrs. Galen Wade attended the funeral of Henry Ginder.

Mr. John S. Gibble and mother, attended the funeral of Henry Ginder.

Mr. Frey, of Lititz, spent a few days with his daughter, Mrs. Michael Musser.

Mr. and Mrs. Monroe Waser and family spent Saturday evening at Elizabethtown.

The Cordelia Lutheran church held their picnic on Saturday and had a large crowd.

Mr. and Mrs. John Stively and Mr. and Mrs. Samuel Little spent Sunday evening at Landisville camp.

Master John and Kenneth Henne spent a few days in this vicinity visiting their aunts and grand-parents.

Mr. Regnal Leifried and lady friend, Miss Grace Brandt, spent

Sunday at York, with his parents. Mrs. Romaine Stively and Miss Anna Hubely spent Saturday and Sunday at Columbia visiting Miss Wright.

Mr. and Mrs. Aaron Waser and daughter, Esther, of York, spent Sunday with Monroe Waser and family.

Mr. and Mrs. Clayton Diffenderfer and two sons, Alvin and Warren spent Saturday evening at Landisville.

Mrs. Samuel Gibble and two grandsons, Ray and Junior Gibble, spent Monday with her daughter, Mrs. Gallen Wade.

Mr. and Mrs. Milton Erb and son, Marvin, Mr. and Mrs. Enos Gibble and children, Ruth and Howard, spent Sunday with John Gibble and family.

Mrs. John F. Waser, Mrs. Alice Henne and two sons, John and Kenneth, Mr. and Mrs. Clayton Diffenderfer and two sons, Alvin and Warren spent Sunday at Red Lion visiting friends.

Mr. and Mrs. Clayton Diffenderfer, Mrs. John S. Gibble, Mrs. Alice Henne and two sons, John and Kenneth, and Mr. John Galbach went to the mountains for huckleberries and took dinner at Lake Spring. All had a fine time.

Wheat Cleaning

Mr. Farmer—We are again prepared to grade and clean your wheat.

Our method is first to run it over a mill and grade the wheat and then to run it over a separate mill to remove the cockle and other inert matter.

Our work is thorough and satisfactory in this process and we guarantee you absolutely clean wheat.
