Avoid Freezing Milk

Don't let the milk and cream freeze. The creaming ability of milk is injured by freezing and it is difficult to get a good test with frozen milk. It is also difficult to accurately test cream which has been frozen. It makes poorer butter because of the partial destruction of fat globules. There is also considerable loss in weight when milk freezes due to not being able to get all of it out of the can.

C. G. Stoll Takes On Added Duties

NATIVE OF THIS BORO GIVEN ANOTHER PROMOTION BY WESTERN ELECTRIC COMPANY

The many friends of Mr. Clarence G. Stoll, a native of this boro, and a son of Mr. and Mrs. John H. Stoll, will be pleased to learn of his recent promotion. Mr. Stoll has been in the employ of the Western Electric Company for a number of years and is certainly "making good."

The following appeared in the Hawthorne Microphone, a newspaper published by the Western Electric Company, at Chicago, Ill.: "At the last meeting of the Board of Directors held just before the holidays C. G. Stoll, Hawthorne Works manager, was promoted to general manager of manufacturing in charge of the Company's manufacturing and made a member of the Board of Directors."

R. C. Dodd, formerly Hawthorne operating superintendent and assistant works manager at Kearny, succeeds Mr. Stoll as president of the Graybar Electric Company. As a consequence of these changes, three new names appear on the Board of Directors: J. B. Odell, C. G. Stoll, and G. S. Pratt, the company's general attorney, replacing A. L. Salt, now president of the Graybar Electric Company, J. W. Johnston, retired, and Frank A. Ketcham, who has been made executive vice president of the Graybar Electric Company.

Mr. Stoll, in addition to his new duties as general manager of manufacturing, will retain his present duties as Hawthorne Works manager. Mr. Stoll's Company History

Like most of our officials, General Manager Stoll has climbed from a modest position. He began his Western Electric career on the student body of the Clinton St., where his first job was soldering jacks in the Factory Cabling Department. A few months later he was transferred to New York, where he spent some time in the Switchboard Wiring, Tool Inspection, and Engineering Departments. His training on these jobs won for him promotion to head of the Apparatus Design Department at New York.

In 1917 he came here to take charge of apparatus design work at Chicago. In October of the same year, practically all apparatus design work was concentrated at New York, with Mr. Stoll as head of the engineering department.

In 1908 he took over the Engineering of Methods Department of the New York shops and three years later was promoted to acting head of the manufacturing branch, being placed in full charge in July, 1912. In November of the same year, he sailed for Europe to become shop superintendent of our Antwerp factory.

When the World War broke out the Belgian factory was closed and in June, 1918, Mr. Stoll returned to America and took over the European Automatic Department here at Hawthorne. In March, 1916, he became superintendent of the Operating Branch, and in October of that year, took over the superintendency of the Technical Branch. He became assistant general superintendent of Hawthorne in 1920. In February, 1923, he was put in charge of all departments at Hawthorne and given the title of Works Manager.

His new duties as general manager in charge of manufacturing include the management not only of Hawthorne, but also of our new works at Kearny, New Jersey.

"JIM" NEAL TREATS HIS FRIENDS TO RABBIT

On Monday Mr. and Mrs. David Zerphy, of this place, received a box containing twenty-one fine large rabbits from Mr. and Mrs. S. J. Neal, of Linneus, Mo. With the box came instructions to deliver a rabbit to each of the following: Jno. E. Schroll, Arthur R. Hendrix, Wm. Hendrix, Wm. Dillinger, Chas. Webb, Mrs. Elizabeth Good, F. H. Baker, Wm. Beamesderfer, David Zerphy, Rev. George Kercher, Dr. A. F. Snyder and D. J. Gable.

"Jim" is quite a hunter and on numerous occasions has shot thirty rabbits in eight hours. An unusual part of his hunting is that he shoots them with a rifle. He frequently takes rabbits to Linneus, a resort town where they sell for ten cents each, being so very plentiful out there.

135 Cows With Tuberculin Gems

THE RESULTS OF THE FIRST TESTS ARE REPORTED BY COUNTY FARM BU. REAU

Tests made at the beginning of last week by State Examiners resulted in 435 cows being found infected in Colerain township this county, with tuberculosis, according to reports from the Farm Bureau Saturday.

The animals will be condemned and sent to Reading, Phoenixville and Philadelphia for butchering under federal supervision for either meat or fertilizer, depending upon the condition of the cows upon arrival at the slaughter houses.

Farmers who lose cows because of infection as indicated by the tests will receive indemnity from the state and federal government. In addition, some shipping milk to the Abbott Milk Co. of Philadelphia will receive an additional indemnity of \$15.

The state examiners this week injected serum into animals of 60 herds in Colerain township. Those cows which developed swellings were pronounced infected.

Farmers of the township claim that the big problem resulting from the tests is replacement of the cows, since they are difficult to obtain at reasonable prices to pass the tuberculin tests.

Better prices will be received by dairymen whose herds pass the tests, the Abbott Company having already offered several cents more for certified milk from tested herds. The losses sustained by dairymen in the section where animals were tested do not affect the local milk supply, as the product goes to other markets. Protests are expected, however.
