### New River Highway Will Aid Tourists

#### BEAUTIFUL ROADWAY ALONG SUSQUEHANNA WILL PROVIDE FINE TRIP TO HARRISBURG

Plans for the new road, which will probably be built by the state during the summer will assure the tourists of Lancaster county a new and shorter route to Harrisburg in addition to the present highway by way of Elizabethtown and Mt. Joy. The Middletown Automobile Club and the River Road Association are fostering the plan for the highway which will give to Lancaster and Dauphin county a beautiful route along the Susquehanna river, practically all the way from Harrisburg.

A meeting was held on Wednesday night to make plans for the furtherance of the movement. The attendance was not as large as was expected and another meeting will be held on Wednesday, February 10.

During the meeting this week, plans for the doing away with two covered bridges now at Chickies, to be replaced by a single open bridge were among the most important discussed. It is believed that this improvement will be provided for in the construction of the road.

**Start on June 1**

It is hoped that work on the road will be started by June 1. The surface will be concrete, it is said. The road will follow the Susquehanna river closely all the way from Harrisburg to its limit at Washingtonboro.

In Marietta, it may pass over the Swatara creek, by way of the county bridge, and then be routed in a southerly direction, passing over Northumberland street. It probably will pass under the Pennsylvania railroad in a subway, eliminating a dangerous crossing at Young's Lane.

The road, when completed will not only be of value for tourists as a highway and drive along the river, but of genuine value as a means of traveling between Lancaster and Harrisburg, either using the Columbia or Marietta pike as the final stretch. While it will not be as short as the present Harrisburg pike between the two cities, it will be a far more pleasant trip to travelers who enjoy the vistas of nature.

This was done and it was discovered that the large bone in her left arm near the shoulder was fractured and that the arm was out of joint at the shoulder. Mr. J. L. Swart, a well known farmer residing a short distance southeast of town, lost two fine large fat steers one night last week. He has a number of pigs in a stable and killed both of the steers and is that one of the porkers tried to crawl out beneath the stable door, which opened. The steers took advantage of the open door and as the barn yard gate was not closed, they strolled in many directions.

Two of them got in the railroad tracks, about one-fourth of a mile from the barn and started coming up through the cut. About that time a train happened along and killed both of them. One was found near the freight warehouse with a large hole in its side but only a quarter of the other could be found. Evidently the balance of the steer was caught on the engine and carried away.

This is quite a loss to Mr. Swart.
