

Nation's Art Treasures Enriched Rare Italian Violins and Cellos Brought to United States

© Kadel & Herbert

Photo by Pacific & Atlantic

EVEN in the midst of wedding preparations, Leopold Stokowski, famous conductor of the Philadelphia Orchestra, found time to examine and become enthused over the most famous violin collection in America—that of Rodman Wanamaker, just brought from Italy to this country where it will be permanently held. "The collection is a wonderful addition to the nation's art treasures," said Mr. Stokowski.

The chief instrument in the collection is the "Swan," the last violin made by Stradivari, in 1737, the year of his death—and the most famous of his violins. Other noted instruments are a Montagnana violin; two violas, a Goffriller and a Guadagnini; two

cellos, a Teichler and a Ruger; three other Stradivari, the Joachim-1723, the Dancla-1710 and La Chesnay-1687. They will be used in concerts at the Wanamaker auditorium in New York and Philadelphia. The collection is valued at a quarter of a million dollars.

Stokowski has been conductor of the Philadelphia Orchestra since 1912. Largely through his efforts the orchestra has reached pre-eminence in the musical world.

Stokowski's marriage, on Monday, January 11th, to Miss Evangeline Brewster Johnson of New York City, came as a great surprise to all but a few of his intimate friends.

Cow Testing Associations Invaluable Aid to Milk Production

Elimination of non-productive cows from milk herds increases net profits.

Getting more milk from fewer cows is the aim of the cow testing association. Hundreds of cases have demonstrated in a most striking manner that the weeding out of non-productive milk cows and better care for the producing members of the milk herd pay big dividends.

This point was strongly stressed in an exhibit at the International Dairy Exposition held at Indianapolis last October. An actual instance was given which disclosed the following facts:

A milk producer had a herd of six milk cows producing 27,000 pounds of milk annually. He joined a cow testing association. The first step taken was to weed out the non-productive cows, that is, those cows yielding insufficient milk to net a profitable income over and above feed cost.

The weeding out process left only four cows in the milk herd. But these remaining cows were fed according to their individual requirements. No sanitary or beneficial feeding measure was neglected. During stabling months, they were given plenty of clean bedding; stables were kept clean; the long hair on flanks of udders were kept clipped. The

cows were brushed or wiped with a damp cloth before each milking. Utensils were sterilized. The stable was well ventilated and plenty of clean, pure water was given the cows.

A year from the time the member joined the association, his records showed an increase in milk to more than 23,000 pounds from the four cows as compared to 27,000 pounds from six cows prior to this period. There was more than a corresponding increase in butterfat.

The cow testing association consists of about twenty-six farmers who co-operate and employ a trained tester to test their cows for economical production of milk and butterfat. The tester spends one day a month on each farm and obtains a complete record of each cow's milk and butterfat production, feed consumed, feed cost, growth, and income, and income over feed.

The first cow testing association in the United States was that organized at Newaygo County, Michigan, in 1905. Since then, there has been a fairly constant growth until 1925 shows a tally of 732 cow testing associations with excellent prospects of the number doubling within the next three years.

Changed Methods in Handling Milk

When proper sanitary measures are neglected the bacteria in a drop of milk look like this. When sanitary precautions are taken there are few harmful bacteria in milk. The white specks are bacteria.

How much do the farmers and dairymen of the United States pay in toll to bacteria in milk? In process of arriving at the answer to this question, representatives of leading milk and dairy products companies of New York recently met with officials of the State Agricultural Experiment Station, with the Department of Farms and Markets and the College of Agriculture at the Experiment Station, Geneva.

The bacterial count is being used more and more as a basis for determining how much per pound a farmer is to be paid for his milk. Getting the bacterial count under a given figure means millions of dollars annually to Uncle Sam's dairymen. Dairymen, themselves, are alive to this question, and where the milk produced is a material part of the income from the farm, complete sanitary precautions are being taken to insure a low bacterial count in the milk.

Precautions start at the beginning of milk production and continue clear through until the time the milk is in the hands of the consumer. To begin with, properly ventilated, easily cleaned stables are provided; plenty of bedding is given the cows; platforms are built the right length to accommodate the particular breed of cows that are kept; the gutter is built wide and deep; the animal is clipped about the udder and flanks period-

Health and Home

CAMPING AND PROBLEM OF FOOD

There is no healthier sport than camping. During the warm and balmy spring and summer days, it is real recreation. To get out in the fresh air and sunshine, free from worry and care, enhances the health of anyone, be he office man, salesman or what not.

But due to the entirely inadequate means of food preservation and refrigeration found in the majority of camps, there is the ever-present danger of sickness from infected foods. The utmost care must be taken in order that this may be avoided. Butter and eggs should be bought only as used. The milk is a problem in itself. Perhaps the solution lies in the use of a milk other than market milk, in order that purity and sterility may be assured. For such use, evaporated milk is ideal. Many people are wont to confuse evaporated and condensed milk but there is no similarity between the two. Condensed milk is a combination of sugar and milk and can be used only when both of these substances are desired. Evaporated milk is merely pure, fresh milk with about sixty per cent of the water removed.

Many people are wont to confuse evaporated and condensed milk but there is no similarity between the two. Condensed milk is a combination of sugar and milk and can be used only when both of these substances are desired. Evaporated milk is merely pure, fresh milk with about sixty per cent of the water removed.

Following are recipes for a few dishes that are best adapted for camp consumption because of ease of preparation, purity and food value.

Tomato Soup.
1 pint tomato pulp 1 1/2 cups water
or canned tomato soup 1/2 cup salt and pepper
1/2 cup evaporated milk 1/2 tsp. soda
1/2 cup water 1/2 tsp. pepper
Bring tomato pulp or soup to the boil, add the seasonings and soda. Heat the milk and water and combine slowly with the tomato mixture.

Stirred Eggs.
1/2 cup evaporated milk 1/4 tsp. paprika
1/2 cup water 2 tbsp. fat
1/2 tsp. pepper Grated cheese
Beat the eggs, add the milk, water and seasonings. Melt the fat in a fry-pan. Add the milk and water mixture until the mixture is creamy. When almost done, sprinkle with grated cheese. Serve on slices of bread, toast or crackers.

Married at Elkton.
John G. Holliger, of East Petersburg, and Elsie G. Frey, of Manheim, were married at Elkton, Monday.

Considering Sale Plan.
A large number of tobacco growers around Manheim and Lititz will hold a meeting to consider a sale plan for their 1925 tobacco crops.

BELL SYSTEM HAS 700,000 OWNERS

More "Partners" Than Any Other Business in the World, Says D. F. Houston

DAVID F. HOUSTON was Secretary of the Treasury under President Wilson.

"The Bell System is owned by more people than any other organization in the world. If we counted all of the holders of Bell System stock and of Preferred and Common Stocks of the Associated Companies the number would be fully seven hundred thousand—a city almost the size of Cleveland and larger than Pittsburgh. If these security owners were their families were living in one community, they would form a city larger than Philadelphia.

"At the present time, any one can purchase Bell System Stock at any Bell Telephone office. It can be purchased for cash or at \$10 per month per share. This method is helping many people to save money and at the same time to become part owners of one of the largest and most necessary businesses in the world."

MRS. ELIZABETH GROVE PAST CENTURY MARK

Mrs. Elizabeth Grove, who resides in East Donegal township, is one of the oldest residents of Lancaster county. She has reached the age of 100 years and 8 months. Mrs. Grove was born at Strasburg, Lancaster county, May 27, 1825, and moved to Marietta when about 25 years of age. She has been living in Marietta ever since, and is the widow of the late Daniel G. Grove. She was Miss Elizabeth Miller, before marriage, and is a member of the Cross Roads River Brethren church of one of the largest and most necessary businesses in the world.

Many New Year's Days

The Athenians began the year in June, the Romans first in March and afterward in January, the Persians on August 11, the Macedonians in September, the Mohammedans in July.

Personal Magnetism

Watches are sometimes very seriously affected by the magnetism of their wearers. In most cases those who have this effect are dark complexioned.

Meeting of Woman's Institute Representative Miss M. M. Lancaster, would like all members of Mount Joy to attend a meeting at Y. W. C. A., at Lancaster, on Thursday evening, Feb. 25.

Local Doings Around Florin

(From Page One)
day the body was shipped to Blain, Perry county, for interment.

At Bankers' Convention.
Mr. D. M. Wolgemuth, president; Mr. J. Wayne Augst, treasurer, and Mr. S. Nissley Gingrich, trust officer of the Florin Trust Company, attended a convention of State Bankers at Harrisburg on Monday.

Removed to the Hospital.
Mr. Ephraim Hertzler, of this place, who is suffering with bladder trouble, was removed to the General Hospital at Lancaster on Sunday evening for treatment.

Personals.
Mr. William Dommel, who was ill, is improved.

There are still quite a number of cases of measles developing here. Mr. and Mrs. William Hassinger spent Saturday at Lancaster.

The Florin Trust Company was closed Monday, Washington's birthday.

Mr. Victor Haldeman, of Collingswood, N. J., called to see his mother here on Monday.

Mr. D. E. Wolgemuth, local dealer, received his first carload of anthracite coal Monday.

Mr. John Carson, one of the right-hand men at the Pennsylvanian here, enjoyed a trip to Altoona Sunday.

Mr. and Mrs. Christian Wolgemuth and Mr. and Mrs. Amos Wulst spent Sunday with Mr. and Mrs. Benjamin Herr.

Mr. Albert Fike and his gang of painters are now decorating the interior of the Masonic Homes at Elizabethtown.

Mr. Harry Grosh, a member of the State Police, who is stationed at Butler, Pa., spent from Saturday to Monday here with friends.

Mr. Leonard Walker, our obliging station agent here, attended a banquet of the various P. R. R. agents at Hotel Brunswick, Lancaster, on Saturday.

Mr. and Mrs. James Moose, of near Andersonburg, Perry county, are spending some time here with their son, Mr. and Mrs. D. Roy Moose.

Mr. and Mrs. Harry Eberle, of New Providence; Mr. John Shank, of Maytown, and Mr. and Mrs. Albert Greenwald were Saturday guests in the home of Mr. and Mrs. Benjamin Herr.

Novel Way of Feeding.
A large airplane passed over the mountainous sections of Blair county last week and scattered two tons of feed for the starving wild game. A deep snow prevents birds and animals from feeding at the usual places.

Saturday, March 20—On the premises at 109 East Main street, Mount Joy, large lot of Household goods by Elizabeth W. Rupp. Gible, auct.

Boys' week will be observed at Lancaster during the first week in May.

Picked From Our Weekly Card Basket

(From Page One)
trice Pennypacker.

Mrs. I. A. MacDannald has returned from a week's visit to her daughter, Mrs. H. S. Garling, of Norwood Station, Pa.

Mr. and Mrs. Roy Heinzelman and children, of Middletown, spent Sunday here as the guests of Mr. and Mrs. Irvin Smith.

Mr. and Mrs. Howard Shickley and son, of Philadelphia, visited his father, Mr. Amos Shickley, on East Main street on Monday.

Mr. and Mrs. Harvey Curgan, of Philadelphia, were guests of his parents, Mr. and Mrs. Wesley Curgan, for several days.

W. D. Chandler and grandson, Donald Smith, spent Sunday at Lancaster, as the guests of Mr. and Mrs. Harry E. Brenner.

Miss Bertha Misemer, of Harrisburg, spent several days here as the guest of Mr. and Mrs. George Brown, on West Main St.

Miss Virginia Newcomer, of Goucher College, Baltimore, Md., spent the week-end with her parents, Mr. and Mrs. H. S. Newcomer.

Mr. and Mrs. Morris Cunningham, of Lancaster, visited the former's parents, Mr. and Mrs. Alex Cunningham, on Thursday evening.

RHEEMS MAN CHARGED WITH RECKLESS DRIVING

Charges of reckless operation of an automobile were preferred on Friday against John H. Harbold, Rheems, by Martin Klingseisen, 501 Rockland street, Lancaster. He was arrested by Constable Walter Harman and gave bail for a hearing before Alderman Burkhardt on Thursday afternoon at 3 o'clock.

Klingseisen alleges that several weeks ago Harbold crashed into his automobile on the Harrisburg pike, damaging the machine and severely injuring a young daughter of the prosecutor. The local man also claims Harbold refused to offer aid after the accident.

Boys' week will be observed at Lancaster during the first week in May.
