### Prepare The Child For September

**NOW IS THE TIME TO HAVE CHILDREN VACCINATED AGAINST SMALL POX—HEALTH CENTER GROWS**

The irregular attendance of school children cost United States \$175,000,000 a year.

The evidence furnished by health authorities that the majority of time children lose from school is due to correctable physical defects.

Every father and mother who is to "launch his and her child this fall or his eventful journey thru the land of education" should see that the child is physically fit.

Many children who cause their parents untold worry can trace their troubles to the child not being well, when he entered school.

It is just as futile to start a child to school with diseased tonsils, bad eye-sight, poor hearing, etc. as it is to start on an automobile trip with (Turn to Page 4)
