

HEAT FOLKS

IF YOUR FURNACE WON'T HEAT THO' YOUR COAL BILL GROWS BIG IN A WAY THAT WOULD SHOCK AND SURPRISE YOU PERHAPS YOU'RE NOT USING THE RIGHT KIND OF COAL—TELL THE HEAT FOLKS AND THEY WILL ADVISE YOU

Is your coal costing more than it ought?
There may be several things the matter.
Your furnace or range may need attention.
You may be using the wrong kind of coal.
You may not be getting all the heat out of the kind you have.
You may be losing money by waiting until a cold snap to order instead of buying when the price is low.
Whatever your problem is, we shall be glad to help you solve it.

TRAMP, TRAMP, TRAMP—a lot of our boys are "marching back" to the old job to replenish the losses they incurred by betting that the Yanks would win the World's Series from the Cardinals. Babe Ruth smashed half a dozen World's Series records thereby keeping his picture on the front page. We're not particular about getting on the FRONT PAGE, but we do want to acquaint you with the merits of every DAYTON tire. These DAYTON tires are better in the long run because of their resilient construction. Young's Tire Stores, the places where satisfaction rules supreme.

Faulty Elimination

Should Be Corrected—Good Elimination Is Essential to Good Health.

If you would be well, see to your elimination. Faulty kidney action permits toxic material to remain in the blood and upset the whole system. Then, one is apt to have a tired, languid feeling and, sometimes, a toxic backache or headache, and often some irregularity of secretions, such as scanty or burning passages. More and more people are acclaiming the value of Doan's Pills, a stimulant diuretic, in this condition. For more than forty years Doan's have been winning favor in the country over. Ask your neighbor!

This message everyone should hear who does not believe that the Bible is the inspired Word of God.
There are few such evidences in the Bible that witness to that effect. Come and hear what they are.
Prayer service Thursday 7:30 P. M.
You are cordially invited to all the services. Come for a warm hand of welcome greets you.

Cathedral's Fire Brigade
St. Paul's cathedral in London has its own private fire brigade and water service. The water service was installed shortly before the World War. Though the cathedral does not appear to the casual observer as being a building that would burn easily, being mostly of stone, there are hidden away in the thickness of its walls and elsewhere in its interior several hundred passages, corridors, rooms, staircases and cupboards composed largely of wood. The great outer dome, which is to be seen from the street, also is made of wood, encased with lead. Another reason for the fire brigade is the fact that most of the wood in the structure is many years old and unusually dry, making it excellent tinder in event a fire should start in the building.—London Tit-Bits.

IRON IMPORTS GROWING FAST

Low Wage Low Cost Products From British India Take Markets of Pennsylvania Furnaces and Curtail Employment in This State

HIGHER TARIFF VITAL TO PROTECT WORKERS

Germans and Belgians Under Sell American Steel-Makers. Strong Republican Delegation in Congress From Pennsylvania Necessary To Stop It.

Philadelphia, Pa., Sept. 29.—The Executive Committee of the Republican State Committee issued the following statement:

One of the startling features of the way in which European and other countries have desperately tried to give work to their millions of unemployed at the expense of Pennsylvania workmen and industries is the increasing flood of iron and steel products they have poured into the United States. These products of cheap foreign labor have forced their way into American markets notwithstanding the present tariff and already have affected prices and production in several branches of the industry.

Democrats of the South and Radicals of the West offer a further menace to the workers in the greatest industry in Pennsylvania by their determination to break down the present Fordney-McCumber tariff, which has helped the iron and steel industry of Pennsylvania by offering a barrier to the cheap products of low wage European and Oriental labor. This tariff enabled Pennsylvania workers to earn good wages, enjoy steady employment and to prosper. Even this tariff has revealed that it is unable to completely offset the low wages and desperation of starving Europe and Asia. Downward revision of the tariff would mean disaster to the wages, employment and prosperity of every Pennsylvania engaged in the iron and steel industry.
Pennsylvania will elect 36 Congressmen this fall and one United States Senator. Democrats of the South and Radicals of the West have formed a conspiracy to prevent the sending of a complete Republican delegation from Pennsylvania by spreading the propaganda of large primary expenses. The real intent is to elect, if possible, Democrats so that control of Congress may be gained and the tariff reduced with the idea of aiding Western farmers at the expense of Pennsylvania working people.

Imports of iron and steel products for the fiscal year ended June, 1926, reached the high total of 1,098,781 tons, an increase of 331,388 tons over the imports for the year ending June, 1925. This is the highest import movement for any fiscal year since that of 1903. Imports for June, 1926, were 124,215 tons compared with 108,731 tons in May. These were the highest for any single month since November, 1922. Of the imports during the 12 months ending June, 1926, pig iron represented 628,305 tons, or almost 60 per cent, while pig iron imports in June were 43,106 tons, or 34 per cent of the month's total. In June, 1925, pig iron imports were 35,657 tons.

Pig Iron From India.
The largest item of imports in June this year was pig iron. Germany led the principal source, sending 15,555 tons. Notwithstanding the counter-vailing order applying to imports of pig iron from the Tata Iron and Steel Works, India sent in June alone 10,775 tons. During the first six months this year British India sent into the United States 66,298 tons, Netherlands shipped here 44,434 tons, Germany 89,647 tons, the United Kingdom 80,071 tons, France 25,033 tons and other countries sufficient to make the total pig iron imports for the first six months 216,046 tons. There were 230,160 tons imported in the first six months of 1925.

In the calendar year 1924 the United States imported 209,109 tons of pig iron. This increased to 441,425 tons in the calendar year of 1925 and in the fiscal year of 1926 these imports had risen to 528,305 tons.

The effect of these imports of pig iron from countries of low wages where every effort is being made to reduce unemployment has been to take the New England and Atlantic Coast markets from the merchant blast furnaces of Pennsylvania and back up upon other markets the tonnage which ordinarily would be consumed along the Atlantic Coast. The effect upon this particular branch of the iron industry has been serious even under the existing tariff. Should the rates in the Fordney-McCumber act be reduced as the Democrats propose and an even greater flood of Indian, German and English iron be allowed to pour into the United States, disaster to the blast furnace industry in Pennsylvania would follow. It is significant that imports of pig iron from India, where wages are at starvation standards, have been received in Philadelphia, the metropolis of the most efficient iron producing state in

China consumes more firecrackers in a year than any other nation. They are used in connection with social, religious and military functions, as well as births and funerals and peace demonstrations after quarrels.

Under a recent ruling, cows may walk the highways of Panama devoid of 'head or tail lights, bells, or other warning devices.'

Moving Pictures Long Ago

Moving pictures are not so very new. The English diarist, Ralph Thoresby, writing as long ago as 1670, says: "I called to see the moving pictures, a curious piece of art; the landscape looks as an ordinary picture fill the clockwork behind the curtain be set at work, and then the grass move and sail distinctly upon the sea fill out of sight; a coach comes out of the town; the motions of the horses and wheels are very distinct, and a gentleman in the coach salutes the company; also a hunter and his dogs keep their course until out of sight."—New York Times.

The Tight Cork

Some things that bother housewives and housefathers, too, can be very easily remedied. Remember the times you have tried in vain to remove a tightly wedged cork from a bottle? The solution, as provided by Science and invention, is so simple it is almost funny. Simply wind a heavy piece of cord twice around the neck of the bottle, leaving long ends. Grasp the ends and pull them back and forth. When the friction becomes great enough the neck will become so hot that the cork will be automatically ejected.

Silly Craze For Wealth

When the desire of wealth is taking hold of the heart, let us look around and see how it operates upon those whose industry or fortune has obtained it. When we find them oppressed with their own abundance, luxurious without pleasure, idle without ease, and despised and hated by the rest of mankind, we shall soon be convinced that if the real wants of our condition are satisfied, there remains little to be sought with solicitude or desired with eagerness.—Doctor Johnson.

New Light on History

Julius Caesar and his friend Cassius were walking in the forum one day when they met a couple of pretty slave girls. Julius, as was his wont, gave them a glad hello as he passed along.

"Who was them gals?" asked Cassius.

"I don't know," said Julius, "but I'm forum."

It was at that moment that Cassius decided that something must be done to free Rome of this monster.—Detroit News.

Fox's Race With Train

For three miles a silver fox ran ahead of a logging train at Klamath Falls, Ore., racing over the ties in the glare of the headlights. Seeing that the animal was nearing exhaustion and would not leave the track, the engineer stopped the train. The fox allowed him to pick it up and release it in the brush. Later the engineer learned that the fox had been bred in captivity, had escaped from a neighboring fox farm and was worth more than \$1,000.

United States in Increasing Quantities

During June this year imports were 2,206,955 square feet, having a foreign value of \$762,575 and an American value of \$1,525,150, compared with imports of 1,818,684 square feet in June 1925, having a foreign value of \$816,357 and an American value of \$1,032,714. During May this year imports were 2,205,886 square feet, having a foreign value of \$727,787 and an American value of \$1,555,574, compared with 1,584,720 square feet in May 1925, having a foreign value of \$759,793 and an American value of \$1,519,586. In April this year imports were 3,318,110 square feet, having a foreign value of \$1,100,386 or an American value of \$2,200,772.

During the first five months this year imports of plate glass from Belgium and Germany came into the United States in such a steady stream that it was estimated that the total imports for the calendar year of 1926 would reach the surprising total of 25,000,000 square feet or more than one-sixth of the entire production of the United States. In 1924 total imports were 16,750,000 square feet and in 1925 approximately 16,000,000 square feet.
Captain Charles W. Brown, President of the Pittsburgh Plate Glass Company, in a recent statement said: "The greatest menace to the plate glass business at present is from the heavy and increasing importations of foreign glass. April importations were more than 2 per cent of the entire year's requirements for plate glass in the United States. It is a well known fact to those familiar with the plate glass industry that our present tariff gives inadequate protection, and the advantages of our foreign competitors are further increased by the decline in the value of the franc. There are several industries in the country which are suffering severely from foreign importations. It is inevitable that many manufacturers will be obliged to curtail production or close down."

Keep Envelope Full

Those engaged in industry in Pennsylvania together with the thousands of farmers and business people whose prosperity is dependent upon the employment and prosperity of the workers are realizing more than ever that Republican tariff policies must be continued if Pennsylvania is to retain her supremacy and prosperity. Any break in the solid delegation of one United States Senator and 36 Congressmen to be elected this fall may be looked upon as a partial repudiation of the Republican policies which have made Pennsylvania great and her citizens the most prosperous and contented of any state. Maintenance of Pennsylvania prosperity, employment and wages make it vital that the entire Republican ticket be elected.

There is universal approval in Pennsylvania of the Republican slogan, "Keep your pay envelope full. Vote the entire Republican ticket November 2."
