**BARBER SHOP**  
OPEN EVENINGS AND SATUR-  
DAY AFTERNOON

F. W. Conrad  
No. 11 Lumber St., MT. JOY, PA.

A THANKSGIVING BACK-  
GROUND is exceptionally impres-  
sive to friend turkey. But your  
meal wouldn't be complete without  
famous and traditional drumsticks.  
So we extend Thanksgiving Greet-  
ings to all with a special holiday  
offer of DAYTON tires at prices  
heretofore unequalled. You'll be  
thankful for this opportunity.  
When in need of a tire, stop at  
Young's Tire Stores.

Young's Tire Stores  
130 East Main Street  
MOUNT JOY, PA.  
11 North Prince Street  
LANCASTER, PA.

**Xmas Is Near**

We wish to call your at-  
tention to Books today.

**Companionable Books**

"Yes, do send me a book for  
Xmas, not a bargain book bought  
from a haberdash, but a beautiful  
book, a book to caress—peculiar,  
distinctive, individual; a book that  
with first caught your eye and then  
pleased your fancy."

We have just such books. Books  
worthwhile. Call and look them  
over. Select your goods early and  
have the same set aside to be called  
for at your pleasure.

Chandler's Drug Store  
West Main Street,  
Sunday Hours, 8 to 9 and 5 to 7  
MOUNT JOY, PENNA.

**Paper Hanging**

Wish to inform the public I am  
in the Paper Hanging business again  
and will do work at reasonable  
prices.  
Have a large line of up-to-date  
samples to select from, and can save  
you from 25 to 40% on your paper.  
Your patronage solicited.

C. A. WEALAND  
23 E. Main St. MT. JOY, PA.  
Next Door to U. B. Parsonage

Two fellows in a conversation at  
Lee Ellis' pool room: "Get me a  
quart of pigeon milk, quick. Other  
fellow. "Aw, you can't fool me.  
A pigeon ain't big enough to give  
a quart of milk."

You all know that old bun about  
"Little Bo Peep, who lost her  
sheep." Well it served her right.  
She had no business going out with  
a crook.

Here's one that would pickle your  
Tom Cat's whiskers. A man living  
on East Donegal street went to a  
delicatessen store at Lancaster to  
get a park of phonograph needles.

That crowd of hunters who were  
up in Lycoming county for bear  
returned with a good bag. They got  
a few pheasants and nine blow-outs.

While talking to Henny Strickler  
the other day I asked him if he saw  
Eisel Tower while he was in Paris.  
He said: "Tower, nothin. We sold-  
iers never looked more than two  
feet off the ground."

A stranger came here yesterday  
and said: "How far will a dollar go  
in this town."  
I told him I didn't know how far  
it would go but I do know that it  
goes most darn fast.

A man on west Main street told  
me that he learned one big lesson  
since he's married. He says when  
a fellow marries while he's in pup-  
py love, he'll lead a dog's life as  
long as he lives.

While walking out North Market  
street the other day I heard a pecu-  
liar noise. I asked a kid what the  
noise was and he said: "Oh that's  
across the floor."

Now I know why so many people  
try to swim the English channel.  
They say it is a denice of a rough  
voyage.

A certain kid on East Main street  
said to his mother: "My Sunday  
School teacher said if I were good,  
I'd go to heaven and Dad said if I  
were good I'd go to the movies.  
Which one is lyn mother?"

A young fellow from Florin ap-  
plied at the Shoe Factory for a job.  
The boss said: "Have you ever done  
any hard work?"  
He replied: "I should say so. I  
courted a girl for two years."

Talk about good memories, they  
say Fred Schneider has 'em all stop-  
ped. In reviewing the past he says  
he well remembers that he and Lee  
Ellis were playing pinochle on the  
evening of Feb. 30, 1926.

Harry Darrenkamp came up street  
laughin the other day and when he  
told us the joke we all laughed.  
He said Charles Garber heated his  
barber shop with a coal oil stove  
that smoked, so he kept the electric  
fan in operation to blow the smoke  
out of the room.

**On Being Pematuro**  
Early to bed  
Early to rise,  
And your girl goes out  
With other guys.

Why should one be  
An early bird,  
When it only gets him  
A worm, my word?

Early to rise,  
And early to bed,  
But it's the bird out late  
That gets a head.

I got on a trolley car the other  
day and heard a loud explosion. A  
fellow with balloon trousers sat on  
a tack.

A man at Florin says that radios  
and women are exactly alike. If  
you don't believe it just try and  
get what you want when you want  
it.

I really can't understand why  
football is so popular when less  
than half the teams ever win any  
games.

Conversation between a New-  
town girl and her mother:  
"Mother dear, may I take a  
swim?"  
"Yes, my darling daughter;  
You look so much like a hickory  
limb,  
You'd better stay in the water."

A chap here in town who goes to  
Columbia to see a girl was asked  
the question: "Whose that girl  
you seem to be stuck on?"  
"Stuck on? Stuck with you  
mean."

Mr. Benj. Horst, on Mount Joy  
street, was out hunting last week.  
On the M. H. Kaufman farm, at  
Sporting Hill, he spied a big fat  
bunny and when he shot you should  
have seen the rags fly.

A WISE OWL

the delivery of all printing.

Air Treatment for  
Inflating Udders  
Simple Method for Prevent-  
ing Milk Fever.

(Prepared by the United States Department  
of Agriculture.)  
Though most dairymen are familiar  
with the successful air treatment for  
inflating udders of dairy cows to pre-  
vent fatal consequence from milk  
fever, a simple method for preventing  
the disease is not so well known. This  
malady chiefly affects well-nourished,  
fleshy, heavy-milking cows and gen-  
erally follows closely the act of  
calving.

A preventive treatment suggested  
by the bureau of animal industry,  
United States Department of Agricul-  
ture, consists in allowing a susceptible  
cow to retain in the udder for 24  
hours after calving all the milk ex-  
cept the small quantity required by  
the calf. The milk should be taken if  
possible from each quarter. Disten-  
tion of the udder by the retained milk  
naturally follows, as in the air treat-  
ment, and acts as a preventive against  
milk fever. In the Island of Jersey  
and at the Blitmore farms, North Car-  
olina, where this practice is common,  
the number of milk-fever cases has  
greatly decreased.

Sanitary conditions also should be  
looked after, such as a supply of pure  
air and clean stabling, with plenty  
of clear, cool water and laxative  
feeds, such as grasses and roots. The  
method described is a means of pre-  
vention, not a cure.

In cases where the disease has al-  
ready developed the most practical  
method of treatment is to inject  
sterile atmospheric air into the udder  
in order to distend it artificially. The  
treatment is best performed by means  
of milk-fever apparatus made especial-  
ly for the purpose.

**Horse Is Paid Tribute  
in New Motion Picture**

The horse is paid tribute by the  
United States Department of Agricul-  
ture in a new educational motion pic-  
ture, "The Horse and Man." The film  
acknowledges the service which the  
horse has rendered the human race  
throughout the ages, recalls some of  
the important roles he has played in  
the drama of American history, and  
directs attention to his economic im-  
portance in modern industrial life.

In spite of the fact that gasoline  
has driven the horse-drawn turnout  
from our boulevards, and the belief  
which exists among most city dwell-  
ers that the horse is doomed to fol-  
low the dodo, there are still more than  
15,000,000 horses providing power for  
American farms. The popularity of  
polo, the bridge path, the race track,  
and the chase is widespread and is  
increasing.

Indian ponies, cow horses, cavalry  
mounts, race horses, high steppers,  
truck horses and bucking bronchos,  
share honors in "The Horse and  
Man." The film is one reel in length.  
Copies may be borrowed for short pe-  
riods, or may be purchased at the  
laboratory cost. A complete list of  
the department's films, with informa-  
tion on the method of distributing  
them, is given in Miscellaneous Cir-  
cular 27-M, which may be obtained on  
application to the department at  
Washington, D. C.

**How to Thin Fruit**

The best way to get the fruit thinned  
properly is to take your boys or the  
hired men out to the orchard, show  
them how to do the job and then go  
back to the house. It is awfully hard  
for the owner to take off all of the  
fruit that ought to come off and to  
continue to do so until the task is fin-  
ished. If you stay on the job, there is  
great danger that you will change  
your mind and leave more fruit on the  
trees than they can possibly mature  
properly.

**Keep Calf Off Pasture**

Keep the young calf off pasture  
until it is three months of age. Fresh  
grass is too laxative in nature and  
when added to a milk diet, scours  
often result. Feed limited amounts of  
alfalfa hay or prairie hay but liberally  
of grain to the young calf. Whole oats  
or cracked corn and bran or equal  
parts of the three grains make good  
calf feeds. Limit milk feeding to one  
gallon or less at a feed.

**Farm Hints**

Lightning rods on your buildings  
are a good investment.

A dairy cow must have all the fresh  
clean water she wants.

Can the culls—that's all boarder  
hears are good for, anyhow.

Poultry culling is easy to learn,  
takes little time and pays big divi-  
dends.

Bare land is abhorrent to Mother  
Nature. Better let her raise trees on  
it for you. White pines are good to  
set.

The man who succeeds welcomes  
the small opportunity and turns it into  
what is afterwards known as "a  
streak of luck."

Destruction of weeds on ground be-  
ing prepared for wheat will pay big  
dividends. Weeds grow rapidly and  
use large amounts of water and plant  
food needed for wheat.

The energy used in dancing the  
Charleston is equivalent to that used  
in running a 440-yard race.

The average liquor expenditure  
for every non-abstaining family in  
England last year was \$175.

Americans purchase annually  
5,000,000,000 worth of goods on  
the installment plan.

Buick Thermostatic  
Control provides smooth  
Engine Performance at  
0° or 90° in the shade

Thermostatic Circulation  
Control is a new reason  
why the Buick engine is  
so easy to start and so  
pleasant to drive, in all  
kinds of weather.

Summer conditions pre-  
vail all year, under the  
Buick hood. At 90°, or at  
zero this valuable Buick  
improvement reduces the  
warming-up period to less  
than three minutes!

For this, and many other  
vital reasons, the 1927  
Buick is the Greatest Ever  
Built. The engine is vi-  
brationless beyond belief.  
Drive it and see what that  
means.
