## Harrisburg Pike May Be Widened

PLANS WERE FILED WITH THE STATE HIGHWAY DEPART-MENT TO MAKE THOR-OUGHFARE 120 FT.

Plans for widening the state ighway between Lancaster and Harrisburg to 120 feet have been submitted by the State Highway Lancaster and Dauphin county commissioners. The Lancaster com-missioners have field the plans.

Commissioner P. Edward Clark has pronounced the move as a piecautionary one, explaining that after such plans have been announced and filed any person building within sixty feet of the center of the highway on either side will be liable for their own damages when the widening is acutally done.

Persons who already own properties within that radius can collect damages when the work is done. At the present time the county is liable for such damages when roads are improved and widened but it is expected that in a few years the state will shoulder that burden. The move, therefore can be interpreted either as a protection for the county

applicable on that highway.

Start the new year right by starting a systematic record of your farm business. No business man or manufacturer would even attempt to start the new year without keeping a complete and accurate record of their business. Many of them have less capital invested than the average farmer has in his farm, livestock, and equipment.

Some one has said too many farmers do too much work with their hands and feet and forget to use their heads. Every farmer, no matter how large or how small his farm, can keep a farm account to the great profit of his business.
