DUEER TAXES LEVIED ON PEOPLE OF WORLD

Humorous Levies Relic of Feudal Times.

Washington .- A delegation from the irgin islands recently appeared bere a congressional committee and pealed for the removal of the exort tax on sugar.

"That an export tax is unconstitunal is a matter of common knowlince the Virgin islands belong to the Inited States, some may question why e delegation should peacefully plead the removal of the levy when it uld be attacked as unconstitutional om the time of its imposition," says bulletin from the headquarters of e National Geographic society in

"But the Constitution does not say hat there shall be no tax on articles exported from the United States and s possessions. It declares that "No exported from any state." And, acording to the courts, state in this ase, means a state, not a possession. Export Tax Odd to Us.

"While an export tax seems odd to citizen of the United States, it cannot compare with some of the humorous levies in foreign countries," con-

"Since feudal times the kings of England have received miscellaneous articles as taxes on valuable property. "Two knives, six horseshoes and sixty-one nails are sent to the king's

court by the city of London each year for the use of a parcel of land near the famous Strand, while a school occupying a piece of property near the Tower bridge, sends a bunch of roses. The land is worth \$10,000, but as long as the roses are 'paid,' the school is permitted to continue in peaceful possession. Peppercorns (pepper berries) are paid by the Royal academy for its London site.

"To hold his land the owner of Aylesbury manor provides three geese if the king visits Aylesbury in the summer and three live eels if he goes there in the winter. The owner is Straw on the bedroom floor was one graphic office of the Navy department. of the luxuries of feudal times

"The tenant of Copeland manor is required to hold the king's head should he get seasick while crossing the stormy waters of the English channel

from Dover to Whitsand bay. "A crossbow is contributed by the lord of Bryandon, Dorset county, is bound to make a yearly presentation of a stringless bow and an unfeatharrow for his majesty's use

should he decide to war with Wales. "Instead of paying an assessment in money, knights, to whom large parcels of feudal land were granted, were bound to perform 40 days' service in the king's military establish ment and to equip themselves for

"Property owners in England a few hundred years ago also accounted for the number of hearths and chimneys in their buildings, for each one of them was levied upon. Windows also were taxed and today one occasionally sees evidence of the evasion of this

levy where old windows have been bricked up. Blocks of Salt Paid Taxes. "For centuries blocks of salt were sent to the rulers of China from the provinces bordering the sea to pay taxes. Rice and silk vied with salt in importance. Today, in some parts of the republic, rice supplements sil- than that period without food, water ver in payment of levies. In ancient some tribes sent elephants' ernment. teeth while the Cantonese, it is related, made payment in crabs, frogs,

snakes and crickets. "Travelers from one city to another in China soon became familiar with other ways of raising revenue, than that collected from land owners. Likin 'squeeze' stations, which might be compared with our nearly obsolete toll gates, are met with at frequent intervals along the highways. Eight of these stations are encountered during the 84-mile trip from Shanghai o Soochow. At each station one's ffects are ransacked and, while every rticle is not taxed at each station, pefore the traveler reaches his destieation at least three levies have been paid on each article.

"Tibetan taxes are usually paid in goods. Sheep, wool, meal and native loth are principally used. In one ection of the hilly country, the grass and water the Tibetan cattle consume are taxed, but not the cattle."

Brain Work and Sugar

Brain workers lose more sugar from experiments in Czechoslovakia. It is not known just why this happens, but it is thought it may be through some process in the liver. Brain workers are particularly liable to colds, and picture. the Czechoslovakian physicians suspect this may be due to the reduction of their blood sugar.

MACE SYMBOL OF HOUSE AUTHORITY

As Much Part of Chamber as the Members.

Washington.-A ceremonial mace, the symbol of constituted authority rooted in the customs of the ancient Roman republic, is as much a part of the sittings of the house of representatives as the members are themselves

Whenever the house is in session, it is mounted in a marble pedestal to the right of the speaker's chair. If the members are meeting as a committee of the whole on the state of the Union it stands in a lower pedestal near by. It is never unguarded, and for more

than eight years has been in the custody of A. C. Jordan of Lyons, Kan. tall, stalwart, genial assistant sergeant at arms, whose duty is to maintain order on the floor.

Made in 1842 of ebony fasces, or rods, three feet long, representing the states, bound with thongs of silver and surmounted with a silver globe and spreading eagle, the mace of the cised, including summary expulsion of a disorderly member.

Usually, when the assistant sergeant at arms is called upon to restore order, he is able to do so merely by marching through the disturbed aisles carrying the mace or by holding it over two excited members. If a misbehaving member fails to heed that display of authority, however, he Feb. may lay it beside him. That act automatically expels him, and formal reinstatement would have to be obtained for him to resume his place in the membership.

Mr. Jordan is glad he has never had to lay down the mace.

Naval Bureau Lists All Floating Dangers

Philadelphia, Pa.-While seas quietly lap the shores of the world, a vigilant maritime patrol, unknown to May 4 H. H. Engle, License most "landlubbers," busily stalks the silent but treacherous foes to com- May 4 T. M. Breneman, mercial shipping.

Icebergs, floating debris, land abutments, drifting buoys, derelicts and opaque fogs are constant menaces to also bound to put clean straw on the navigation against which war must king's bedroom floor three times a be waged. The nerve center of operayear if the sovereign stops there.

Straw on the bedroom floor was one grouple effect of the hydro-

This bureau tries first of all to keep finger on the whereabouts of all dangers to shipping about which it is imperative, in safety's cause, to know. An elaborate intelligence service, enlisting co-operation of hydrographic services of other countries, assists the ancient city of Chichester, while the bureau to chart known impediments to water traffic and send out warn-

Constant communication with ships Constant communication with ships sale of ground at sea, advising them of newly sighted June 9 M. B. Hossler, derelicts, rafts and other things, is maintained. The bureau supplies all June 9 H. H. Engle, licnavigators with information and asks their reciprocation by advising of the longitude and latitude of icebergs and other straylings. It immediately disseminates the news over all ocean June 14 Brown Bros., Con-

Meanwhile the navy and coast guard annihilation squadrons are notified and patrols sent to visit the scenes of drifters and remove them.

Animals Well Treated

Washington.-Animals being taken to market for slaughter are now treated better than ever before, according to the Agricultural department.

A decided decrease in violations of the 28-hour law, which prohibits confinement of animals in cars longer and rest, was announced by the gov-

Only 227 cases were reported last year, compared with 402 violations in 1920 and 700 cases the previous year. Transportation companies and their employees have improved conditions under which domestic animals are handled in interstate commerce, the

Former Star Broke

New York .- Mrs. Sybilla T. Pope, former actress, once chatelaine of former actress, once chatelaine of homes that cost \$100,000 a year to Oct. 16 W. Fenstermacher, maintain, is living in a hall room, broke. She is suing her former husband, Charles T. Pope, for support.

Lesson of Forgiveness

Almost all lovers of art are familiar with Leonardo da Vinci's great picture, "The Last Supper." His biographer. Nov. tells us that while at work on his great masterpiece the artist quarreled with a man and vowed to take vengeance upon him. While in this vengeful mood he sketched the face of Judas, but when he started to paint the face he blood during their toil than do of the Master he found he could not nanual workers, according to recent give it the expression he so desired until he had gone to the man against whom he had vowed vengeance and sought his forgiveness. When this had Nov. been done, he was able to finish the

Extension of Life Is Worth Billions

New York.—The increase in earning power of our population in this generation for men alone amounts to \$2,300,000,000 a year. Accurate data on the earning capacity for women is lacking, but estimates made by statistical experts of the Metropolitan Life Insurance company put the total increase in earning power since 1901 at \$3,500,000,000.

This gain in ability to earn money has come about as the result of the recent improvement in extension of life, the experts declare. In 1901 a male at birth was considered to have a potential worth of \$7.553 but in 1924 the value of the average boy was calculated at \$9,333.

The gain of \$1.780 potential value at birth is due to the longer life an individual can now be expected to live with a consequent longer period of earning capacity
