CORN BORER QUARANTINE STOPS MOVEMENT OF CORN

Since August 8, the European corn borer quarantine has prohibited the transportation of corn, broom corn, sorghum and sudan grass from the quarantined area which comprises all or portions of 35 counties in the northwestern half of the State.

Fifteen stations have been established along the quarantine line where men are maintaining a constant vigil for violators of the quarantine. The stations are located at the following points: Sommerfield, Bakersville, Laurel Hill, Ben's Creek, Sproul, Roaring Springs, Curry, Water Street, Milroy, Vionda, Dewart, Muncy, Black Walnut, Nicholson, and Clifford. The Federal Department of Agriculture is maintaining additional stations to enforce the same regulation in Fayette and Greene counties near the West Virginia state line.

The quarantine regulations, adopted March 22, 1927, provide that "corn and broom corn, including all parts of the plant, all sorghums and sudan grass, shall not be moved or allowed to be moved from the area designated as quarantined, to points outside such quarantine area."

The regulations make clear that movement of products into the there are no restrictions on the quarantine area. Likewise, when articles enumerated in the quarantine have been manufactured or processed in such manner as to eliminate all risk of carriage of the corn borer, they can be taken from the area.

No greater progress has been made by any nation in any age than that enjoyed by the United States since the signing of the Armistice, Eight and a half years ago.

Klaus, Neffsville; offering; violin solo, Ariene Landis, R. D. 6, and Miriam Landis Heinman; Landis History and Poem, D. B. Landis, of Lancaster; vocal solo, Mrs. Noah H. Fravel, Cresona; business meeting singing, "God Be With You Till We Meet Again."

A poem, written for the occasion by D. B. Landis, was read by the author. Officers of the Landis family association are: Aaron B. Landis, president, Rohrerstown; D. B. Landis, vice president, Lancaster; H. A. Landis, treasurer, Lancaster; A. Blanche Landis, recording secretary, Lancaster; Mrs. Howard B. Landis, corresponding secretary, of Rohrerstown, Pa.; Albert R. Landis, R. D. 6, Lancaster; D. M. Landis, R. D. 7, Lancaster; Noah L. Getz, R. D. 1, Lancaster; Aldus F. Hersh, 935 E. King street, Lancaster; Walter B. Landis, R. D. 3, Lancaster; J. S. Landis, Manheim.

The Ebersole Reunion
Three hundred persons attending the third annual reunion of the Ebersole family at Elizabethtown College praised the program as the best yet presented. The children's hour, from 1 to 2 o'clock in the afternoon, was one unusual feature of the gathering. Directed by William Heller, Lancaster, the younger members of the clan were treated to an enjoyable hour of recreation.

In a close contest for honors as to the oldest person there, Mrs. David Ebersole, Elizabethtown, came out victor with a score of 85 years to her credit. Close rivals were: John Ebersole, Perry county, 82 years; and Samuel Ebersole, Bainbridge, 81 years. Officers chosen during the afternoon session are: President, John B. Ebersole, Mechanicsburg; vice president, Simon Garver, Hummelstown; secretary, Solomon Hoffman, Elizabethtown; corresponding secretary and historian, Albert Ebersole, of Bainbridge; treasurer, Benjamin A. Coble, Middletown.

The program committee for the 1928 gathering, to be held at Elizabethtown College, is: John B. Ebersole, chairman; Amos E. Shank, Simon Garver, Jesse Asper, Ephraim Ebersole, A. S. Ebersole and Benjamin A. Coble. Miss Alice G. Ebersole, of Highspire, is chairman of the memorial committee.

The morning meeting of the reunion opened with the invocation by Rev. John B. Ebersole, Elizabethtown. John B. Ebersole gave the address of welcome, followed by a piano solo, by Mildred Lillian Ebersole, of Bainbridge, gave a recitation. "What Is the True Purpose of Holding a Reunion?" was the topic of an address by Jesse Asper, Mechanicsburg. Group singing concluded the morning session. Dinner was served to most of the persons at the reunion in the dining hall of the college.

Killman Ebersole, Elizabethtown, was song leader at the afternoon session, following the children's hour. "What Is True Success in Life?" was discussed by Song Leader Ebersole, who is principal of the Elizabethtown High school, in an excellent address.

Officers were chosen for the coming year and reports of committees were heard. Prof. Albert Gerberich, Coatesville, presented the historian's report. A. E. Brinser, of Elizabethtown, concluded the afternoon session with a memorial to departed members of the Ebersole family. Continued

About 3 days before farrowing the sow should be confined to the pen, which should be about 7 by 7 feet in size and see that it is dry, well ventilated, and provided with a guard rail made by placing 2-by-4 inch pieces around the inside of the pen about 10 inches from the floor and from 4 to 6 inches from the sides. This will often prevent the sow from crushing a pig when she lies down. Remove all bedding, sweep the floor and sides and wash dry, bed the pen with good, clean, straw, short or chopped hay, and shredded corn fodder. Do not use oat straw, as it retains moisture and becomes foul too easily.

Forest Receipts Gain
A total of \$5,166,609.39 came to the federal government during the last fiscal year through sales of timber, permits for grazing, and other uses of the national forest. The figure represents a gain of \$10,948.87 over the preceding year. Twenty-five per cent. will be turned over to counties and States.

The United States Department of Agriculture always advocates the use of both purebred sires and while a good purebred sow will cost more than a scrub or grade, experience has shown there is a distinct saving of feed in fattening purebreds as compared to grades.

The railroad would like to see automobile trucks taxed heavily, but the railroad operators should look a little further ahead—it won't be long before airplanes carrying perishable freight will be the hottest competition the railroads have ever had.

What is a Diuretic?

One Can't Feel Well When Kidneys Act Sluggishly.

THE part played by the kidneys and their importance to bodily health should be clearly understood. Sluggish kidneys do not thoroughly cleanse the blood of poisonous wastes. Such impurities are apt to make one dull, tired and aching with often a nagging backache, drowsy headaches and dizziness. A common warning of imperfect kidney action is scanty or burning excretions. Doan's Pills aid the kidneys in their eliminative work. 50,000 users have publicly recommended Doan's. Ask your neighbor!

LOCAL POULTRYMEN GET PROFIT POINTERS

The showing of the poultry picture "On the Trail of the Golden Egg" at Wolgemuth Bros.' warehouse, Florin, was worthy of the attentive interest of a representative crowd of local poultry raisers. Through a series of interesting and splendidly photographed scenes on the big poultry experimental plant at Larro Research Farm the audience was shown the extreme care taken to insure accuracy in the test work.

We saw enormous laying houses with their trap nests and other thoroughly practical equipment for recording egg production and feed consumption. We saw giant incubators in operation. A wonderful brooder house with ample room for 15 lots of chicks at one time.

We saw the specialists in charge of this great farm weigh baby by grams instead of the conventional chicks on delicate scales that weigh at ounces.

We went through the laboratory, the feed room, the egg room, and many other equally interesting places on this unusual farm.

We were shown how seemingly small increases in efficiency could be responsible for enormous increases in our income from each ton of feed consumed. For instance, by decreasing mortality 2% and adding 2 ounces to the average weight of baby chicks, our income from one ton of chick starter would be increased \$58.00. It was splendid entertainment and instruction and Wolgemuth Bros., local feed dealers, through whose courtesy the film was shown are to be commended for their thoughtfulness in arranging for a local showing.

Crop Prospects for 1927
The crop prospects for 1927 show how a season that is decidedly unfavorable for some crops is extremely favorable for others, says the State Department of Agriculture in reviewing the estimates on the production of various crops this season.

For example, unless the weather is very favorable during early September the corn crop will probably be the smallest since 1909 while the hay crop, with one exception, will be the largest since the Civil War. Because of the unfavorable spring, the acreage planted to corn is the smallest since 1899.

The wheat crop will be about 3,700,000 bushels below the five-year average, 1922-1926, while the oats crop will be more than 2,000,000 bushels above the five-year average. The acreage of wheat is the smallest since the Civil War, while the acreage in oats is the same as last year and only 12,000 acres under the average for the past five years.

The tobacco estimates indicate the smallest acreage since 1915 and the smallest production since 1908. The total apple crop will probably be the smallest since 1921 and be about 333,000 barrels less than the five-year average. The peach prospects indicate a crop of 932,000 bushels, somewhat more than half of the average for the past five years.

The quantity of whole milk produced in this country last year is placed by the United States Department of Agriculture at 120,766,487,000 pounds compared with 116,505,395,000 pounds in 1925, an increase of more than four billion pounds. The quantity of milk used for household purposes is estimated at 56,417,000,000 pounds compared with 54,325,776,000 pounds in 1925. This increased consumption of milk has been due to its greater use by the city population.

4800 Dog Owners Prosecuted
Exactly 4800 dog owners were prosecuted for violation of the State Dog Law in Pennsylvania up to August 1, according to the latest report from the United States Department of Agriculture, State Department are reported from every county except Cameron, Luzerne leading with 389.

The report also shows that 461,145 individual dog licenses had been issued during the same period in 1926.

Washing eggs reduces their keeping quality and results in losses, especially if they are to be placed in storage. All very small, very large, or very dirty eggs should be used at home or sold to local consumers and not included with those shipped to market.

Don't feed your cows tar corn. Grind it either with or without the cob. They fail to digest about 20 per cent of the corn when fed whole.
