BUICK for 1928

When Buick improves upon Buick—the standard for the year is set

Buick for 1928 introduces a higher standard of beauty and luxury than the world has ever known. Buick interiors are as modish as exquisite drawing-rooms—as harmoniously colored—and as comfortable. Buick's new Fisher bodies are low-slung without any loss of head-room or road-clearance.

And so, down to the smallest detail of construction, wherever refinements could be made, Buick has made them. Again Buick has improved upon Buick. Again the standard for the year is set.

BUICK MOTOR COMPANY, FLINT, MICHIGAN

Sedans \$1195 to \$1995 Coupes \$1195 to \$1850 Sport Models \$1195 to \$1525

All prices f. o. b. Flint, Mich., government tax to be added. The G. M. A. C. financing plan, the most desirable, is available. The model illustrated is the Five-Passenger Sedan, Series 20, \$1495. WHEN BETTER AUTOMOBILES ARE BUILT, BUICK WILL BUILD THEM

Penna. Weekly Industrial Notes

Real prosperity exists when business and industry are allowed to go ahead unmolested by radical or reactionary laws and regulations which interfere with production and employment of labor.

Allentown — \$200,000 home for nurses to be built at Allentown State Homeopathic Hospital.

Pittsburgh — Ordinance passed providing for repair and reconstruction of Ellsworth Avenue bridge.

Willow Grove — \$50,000 alterations will be made to Glenside Theater within next month.

Bristol — Preliminary surveys made for concreting Radcliffe Street.

Newtown — Newtown Trust Company organized here recently with capital of \$125,000.

Homer City — New fire siren installed on top of National Bank Building will be operated from Bell Telephone Company's exchange.

Monongahela — Highway No. 181 between this city and West Newton opened to traffic.

Finleyville — Large gas well of 3,000,000 feet on Dr. H. P. Finley farm maintains its pressure.

Monongahela — Pennsylvania Railroad Company repairs crossings at Seventh and Fourth Streets.

Emporium — Emporium Publishing Company publishers of "Press Independent" incorporated.

Ebensburg — Agricultural Fair will be held here September 5-10.

Mifflinburg — Kooltex Underwear Corporation purchases Hopp Carriage plant for factory purposes.

Hatboro — Preliminary surveys made for sewer system to be installed here.

Morrisville — Lincoln Highway west of Morrisville borough limits being rebuilt.

Mt. Pleasant — \$2,800 realized by local Volunteer Fire Department from street fair held here recently.

Bids receiving for improvement of Frick Avenue beginning at College Avenue and extending to west side of South Diamond Street.

Northampton — Clear Springs Water Company will expend \$50,000 for improvements and extensions.

Bradford — \$30,000 addition to be built to Option House Hotel on Main Street.

Lancaster — \$1,250,000 contract awarded for construction of new Pennsylvania Railroad station here.

Ft. Loudon — 45-gallon chemical outfit purchased by local fire department.

Jossup — Work under way paving and grading Moosic Street.

Galeton — New traffic light installed at corner of Main and Bridge Streets.

Avondale — Mushroom canning plant to be established between West Grove and Avondale.

Pittsburgh — \$26,000 contract awarded by Baltimore & Ohio Railroad Company for water facilities at Glenwood yards.

Lansdale — Contracts awarded at \$70,332 for extending sewer system here.

Duquesne — Property purchased for new athletic field by Duquesne school board.

Phoenixville — \$30,000 new town hall dedicated.

Connellsville — Stewart Gas and Oil Co. brings in greatest gas well in history of Washington county, flowing 12,000,000 cubic feet of gas every 24 hours.

Philadelphia — Plans making for doubling size of Philadelphia's airport at Island Road and Tincum Avenue.

Monongahela — White way lighting system extended over Donora-Webster bridge.

Muncy — Improvements completed at Muncy Woolen Mills. New equipment installed.

Harrisburg — Bids opened for construction of twenty road projects.

Scranton — Paving of Hill Street and Quincey Avenue to start soon.

Easton — Annexation of West Easton considered.

Scranton — New movie theater will be erected in 500 block of Lackawanna Avenue.

West Chester — Contracts awarded for building two bridges in Chester County.

Oil City — Ground broken for new theater building at corner of Seneca and Duncomb Streets.

Monongahela — \$700,000 Monongahela National Bank Building now under construction at Liberty and Sixth Avenues and Wood Street.

Upper Darby — New fire plug installed at corner of Sprout and Franklin Roads.

Honesdale — Honesdale has twenty-eight manufacturing plants.

Hambury — First National Bank & Trust Company opened here recently.

Catasauqua — Construction of new school building under way.

Philadelphia — New safety lights installed at several street crossings here.

Lancaster — New grade school

HOG CHOLERA CALLS FOR YEARLY IMMUNIZATION

It has been suggested that efforts should be made to eradicate hog cholera in the United States. While eradication is desirable, according to U. G. Houck, in charge of hog cholera control, United States Department of Agriculture, the general distribution and prevalence of the disease and the enormous expense make such a gigantic undertaking inadvisable, especially while large sums are being expended by the Federal and State Governments for the elimination of the southern cattle tick and the eradication of bovine tuberculosis, dourine, and scabies of cattle and sheep.

The eradication of hog cholera would require the application of no less comprehensive and rigid measures than those adopted for the eradication of foot-and-mouth disease in this country, and our hog industry is in no condition to withstand such measures. Furthermore, says Doctor Houck, we have an effectual, practical preventive treatment against hog cholera, which is not the case with tuberculosis and some of the other diseases with which we are contending. Therefore, it seems advisable to continue present efforts to minimize losses through the proper use of the preventive treatment rather than to attempt the complete eradication of the disease.

A feeling of security was largely responsible for the severe and widespread outbreak of cholera last fall. Herds were comparatively free from the disease for a time and the owners became negligent and failed to treat their hogs. With so large a percentage of the hogs in the country susceptible it was only natural that the outbreak spread rapidly far and wide.

Control of the disease is best maintained by keeping the entire herd immune at all times. The nature of serum production is such that it can not be hastened to meet emergencies. Ordinarily about 55 days are required to produce and test a quantity of the product ready for marketing. Severe outbreaks like that of last fall create a shortage in the serum supply with the result that many herds are infected before they can be treated.

Fragrant Fertilizer

Fragrance is normally associated with the fertilizer industry. Many farmers have judged the potency and value of a commercial fertilizer largely by the desirability of a gas mask for use in handling it. Research by the Bureau of Soils of the United States Department of Agriculture has discovered a fragrant fertilizer, derived from the by-products of the manufacture of cocoa and chocolate, that carries with it the pleasant aroma of a newly opened can of cocoa. This pleasant source of nitrogen for plant food. It contains about 4 per cent of nitrogen which is the equivalent of 4.9 per cent of ammonia.

Keep Rooster Out

Male birds with the flock are not necessary to get a good egg yield. It is important, however, that the breeding males have comfortable quarters between hatching seasons. Quality of the eggs is improved when the roosters are removed from the flock.

The value of timber, along with other economic considerations, according to the Forest Service, United States Department of Agriculture, is causing land-owners more and more widely to study the possibilities of profitable reforestation.

Whitewash Should Stick

One ounce of alum added to a gallon of lime whitewash increases its adhesive quality. Flour paste answers the same purpose, but a preservative, such as zinc sulphate, should be added.

building will be erected on Reservoir Street.

Waynesburg — Union Deposit and Trust Company and Citizen National Bank merged.

East Stroudsburg — Work on new armory here to start in September.

Montrose — \$125,000 hotel to be erected in Montrose.

Oil City — Plans making for city park and memorial on Central Avenue between First and Front Streets.

Philadelphia — \$16,000 improvements to be made to Central Presbyterian Church.

Philadelphia — \$7,269,880 contract awarded for South Broad Street subway.

Upper Darby — Building permits issued here during recent week totaled \$95,990.

Donora — Site purchased for new post office building to be erected here.

Harrisburg — New system of markers for state highway detours and temporary route initiated.

Briefly Told

Under any plan of feeding hogs, free access to good, pure, water and a mineral mixture containing salt is necessary at all times.

More than forty-five per cent of the windmills of Holland have been removed or demolished since 1926, according to a report from an official mill association in that country.

Oily cloths used in polishing floors and woodwork are a serious fire risk and should either be destroyed immediately after use or kept in a tightly covered fire-proof container.

Sent to the United States Department of Agriculture for Farmers' Bulletin 1471-F, "Canning Fruits and Vegetables at Home," before you are confronted with a large garden surplus.

In building a poultry house it is safe to allow about 4 square feet of floor space per bird. The lighter birds, such as Leghorns and Anconas, usually require less floor space than Plymouth Rocks, Rhode Island Reds, and Wyandottes.

Whipped cream is not only a pleasantly luxurious addition to a dessert, but a food in itself. It is not needed after a rich, hearty dinner, but is appetizing and suitable after the lighter type of meals served in summer time.

A terrapin with 'H. E. C., 1873' carved on the shell was found on a farm near Salem, Virginia. H. E. Caldwell, of Roanoke, says he remembers carving his initials on the back of a full-grown terrapin in April, 1873.

The Navy hospital ship S. S. Relief, reports an unusual caller, a sea lion, which climbed up the patient's gangway by himself. Examination disclosed a deep cut, which was treated by a surgeon. The patient swam off but returned later for a call of thanks.

An appointment existing in London since 1570 is that of 'rememberer.' The holder of this office who must be a lawyer, is paid between \$7,500 and \$10,000 a year, his duties being to sit beneath the gallery of the House of Commons and 'remember' legislation affecting the city of London. He must also act as medium for communication with the royal family or cabinet.

Chinese Elms Thrive Where Other Shade Trees Live

For shade or as a windbreak the Chinese elm has proved its value in most sections of the United States. The United States Department of Agriculture introduced this tree nearly twenty years ago and now recommends it as useful and widely adaptable. It is particularly valuable in regions of light rainfall and extremes of temperature where few trees thrive. Trials indicate that the Chinese elm grows even more rapidly in the relatively dry area of the Middle West than in the moist regions of the Atlantic coast. Trees here weathered the severe winters of the northern tier of the States and have made satisfactory growth near Yuma, Ariz., where few shade trees are able to survive the dry climate.

This elm grows with numerous slender, almost wiry, branches. The leaves are elliptical and smaller than those of the American elm. Leaves appear early in the spring and the tree is one of the last to lose foliage in the fall. It is free from injury by plant diseases and insects and grows rapidly. At the Fort Hays Experiment Station in Kansas Chinese elms developed in four growing seasons from shoots three feet tall and the size of a lead pencil to trees from 15 to 25 feet in height, with trunks from 16 to 19 inches in circumference.

Several nurseries in the South and West have realized the value of this importation and offer plants and seeds for sale.

House Pullets Early

House the laying pullets early. Normally developed pullets have completed their molts and start heavy production when about six months old. Put them in their laying quarters when they are about five months old, or when they first start to lay. Early housing enables the pullets to get accustomed to their new surroundings before they start to lay, and removes a common cause of fall molts.

Alfalfa Has Sweet Tooth

Unless the soil is sweet it is practically useless to attempt to grow alfalfa. If there is any doubt in the matter, samples of soil, not over four inches deep, should be taken from several parts of the field, mixed together and a composite sample sent to your county agent for test. He will report whether lime is needed and the approximate amount per acre.

Wait for The NEW FORD

SPEED!
DURABILITY!
LOW COST!

Beautiful, low, smart lines!
Lightning pick-up—
Comfort!

Those are some of the features of the new Ford car. You'll know it's a truly modern car the minute you see it.
