TOBACCO GROWERS HAVE BRIGHT OUTLOOK

The outlook for the Pennsylvania tobacco growers has not been as bright at any time in the last five years as it is today, says the Bureau of Markets of the Department of Agriculture at Harrisburg in its annual review of the tobacco situation in this Commonwealth.

Stocks of Pennsylvania tobacco held by manufacturers and dealers are twenty per cent smaller than in the fall of 1926 and are the smallest held since the autumn of 1921. Stocks of tobacco produced in areas competing with Pennsylvania are also smaller.

On the other hand, the production in the United States of five-cent cigars has increased 11 per cent while the output of all cigars has increased one per cent. Since a large portion of the Pennsylvania tobacco goes into five-cent cigars, it is particularly encouraging, states the Bureau, that during the year ending June 30, 1927, the production of five-cent cigars passed the 3 billion mark for the first time since 1918.

Washes, Carries Coal. Woman Gains 18 Lbs. 'I wash, iron and carry coal and don't get tired since taking Vinol also, I have gained 18 pounds.' Mrs. S. Cortese. Vinol is a delicious compound of cod liver oil, iron, etc. Nervous, easily tired, anemic people are surprised how Vinol gives new pep, sound sleep and a BIG appetite. The very FIRST bottle often adds several pounds weight to thin children or adults. Taste delicious! E. W. Garber, Druggist. (1)

Home Health Club

WEEKLY LETTER WRITTEN EXPRESSLY FOR THE BULLETIN BY DR. DAVID H. REEDER

Christmas Candy: During the last one third of a century I have told my readers of the Home Health Club, many facts about health. 'How to get well. How to keep well, and how to keep young,' has always been the slogan of the Home Health Club and I expect the work to continue.

I may not be writing these articles for you at the end of another third of a century as I would have passed the century mark by quite a margin but my son David will be ready to take my place if necessary, in about three years more and two, perhaps three more of my sons are expecting to take up the work as soon as they can qualify.

Well, what's that got to do with Christmas candy, the youngsters want to know. Quite a bit, some of the older ones say. It's better than candy to know that the Home Health Club is to continue indefinitely. You may have refused to buy any Christmas candy because I have said so much about refined or white sugar and its effect on the tonsils.

Yes, highly refined sugar and tonsils are used daily to make candy and is responsible for many cases of diseased tonsils but there are many kinds of good wholesome candy to be had and it surely is a great help in sweetening up the disposition of some people. One excellent kind of candy that may be safely eaten even by people suffering with chronic Bright's disease, is home made chocolate fudge.

The milk chocolate nut bar to be found in all places selling candy is also a very wholesome form of sweet and very nourishing.

In my own case about the only time I realize that I have a stomach is when it gets decidedly empty and when I am too busy to go for lunch I find that a few of my own Beauty caramels, an almond nut bar of milk chocolate and a glass of water will answer the purpose very well.

Such a lunch will do very well once in a while but should not become a regular habit. Here is one however, which may be used daily, especially by people who habitually overeat.

Six or eight nice clean dates and then two good ripe apples, a glass of water and then lean comfortably back in your easy chair, put your feet upon the desk, close your eyes and rest for ten minutes. After that you can do more work in the afternoon than you did in the forenoon and you will not be too tired to eat a good wholesome dinner at night. If you are doing hard manual labor, eat a couple ounces of nut meats before eating the dates.

All readers of this publication are at liberty to write for information upon any subject pertaining to health. Address all communications to Dr. David H. Reeder, 3131 Main Street, Kansas City, Mo., giving full name and address and at least six cents in postage.

LARGE PROFIT FROM BRIDGE TO CAMDEN

The Delaware river bridge had its most profitable period during the last six months of 1927, when it earned \$1,229,925.85 in tolls, it was revealed today.

This amount has been distributed to the city of Philadelphia and the State of Pennsylvania, which received \$307,481.46 each, the remaining \$814,022.93 going to the State of New Jersey. Since it has been in operation the bridge has never been taxed to more than one-fourth of its capacity, and its earnings have doubled the estimates of the engineers.

537 CARLOADS OF APPLES GRADED BY STATE INSPECTORS

Five hundred and thirty-seven cars of apples were inspected at 32 shipping points principally in Adams, Franklin, Cumberland, York and Wyoming counties this year by the Bureau of Markets, Pennsylvania Department of Agriculture.

Due to adverse weather conditions throughout the growing season, the apple crop was smaller and contained more defective fruit. As a result, the number of cars inspected was only half the number of last year. Likewise, the percentage of U. S. Fancy and No. 1 grades was smaller than in any year since the service was started in 1923, amounting to 63 per cent of the cars inspected as compared to 78 per cent in 1926 and 79 per cent in 1925.

Give Plants A Drink When watering plants, do it in the morning and give the soil a thorough soaking. Use water that is not so cold that it will chill the plants. With the aid of a funnel the work may be done with neatness and dispatch.
