Penna. Weekly Industrial Notes

Weatherby — Rural Mail Delivery Route No. 1 here extended about one mile.

West Chester — Bids opened for reconstruction of creek road from Downingtown to this place.

Wilkes-Barre — Mertz Bus Service Co., operating bus between this place and Philadelphia.

Collegeville — \$53,526 contract let for widening bridge across Perkiomen Creek here.

Wilkes-Barre — New G. C. Murphy Company 5-10 cent store opened in remodeled building at Franklin Penn Avenue.

Pottstown — New Holy Trinity Russian Greek Orthodox Church at Lincoln Avenue and Hale street dedicated.

West Manayunk — Philadelphia Suburban-Gas & Electric Company completes installation of gas mains here.

Bala-Cynwyd K Bala Avenue being paved from City Line to Montgomery pike, Cynwyd.

Perkasie — First unit of First Evangelical Church at 5th and Market streets completed at approximate cost of \$45,000 dedicated.

Philadelphia — 66 new houses will be built at cost of \$264,000 at Charles and Edrick streets.

Philadelphia — Contract let for erection of large addition to Philadelphia Fire Association's building at 4th and Walnut streets.

Lewisburg — Reading Railroad Company installs 2 electrical stop lights at University Avenue.

Harrisburg — Bus Co. will construct \$200,000 new warehouses here.

Brookville — Progress being made on construction of new addition to Brookville Public School at Church and Barnet Streets.

Brookville — Bids will be received for resurfacing East Main street in Brookville and Pine Creek township.

Lansdale — Bids opened for paving 3 Lansdale highways.

Homer City — New 5-10c and \$1 Store building being erected at Main and Elm streets near completion.

Smethport — Construction work in progress on new Shawmut Railroad station at Mechanic and Water streets.

Hatfield — Bids received by Hatfield Joint School Board for erection of Home Economics building.

Waynesburg — Work will commence soon on new sewage disposal system here.

Bristol — Work progressing on erection of highway being connected between here and Tullytown.

Shenandoah — \$213,000 contract signed for construction of new road between here and Ringtown.

Waynesburg — Low bid of \$34,944 received for construction of new reinforced concrete bridge to replace old structure spanning Ten Mile Creek east of here.

Waynesburg — First National Bank & Trust Company installs ornamental street lights around building at High and Washington streets.

Souderton — New building will be constructed here by Union National Bank & Trust Co.

Brownsville — New Union Station here will be ready for occupancy by November 15.

Lanesboro — Progress being made on road from end of concrete highway here to Starrucca Borough.

Brownsville — Hardware Company moves into new location in Barr House building.

Elizabethtown — Work commenced concreting Lancaster Pike between Dauphin-Lancaster County line and borough limits here.

Lewistown — New truck purchased for street work here.

New Wilmington — Mercer-New Wilmington road being oiled.

Greenville — Curb being laid on Main street paving.

Philadelphia — 8 stores and 12 apartments will be built on west side of Ogontz Avenue at cost of \$185,000.

Mexico — \$77,297 contract let for paving 48,846 lineal feet road between here and Thompsonstown.

Glenside — Undergrade crossing on Easton road rapidly nearing completion.

Show All the Time

The good livestock show man commences to show his animal as soon as he enters the ring and he never ceases until the ribbons are placed. Never let the animal go to sleep in the ring, say livestock specialists of the Pennsylvania State College, and remember that this is good advice for the showman also. Keep one eye on the judge and the other on the animal being shown.

Pottstown — \$29,550 contract let for furnishing steel reservoir to be erected at Fern Hill pumping station, and construction of foundation.

ANNOUNCES NEW LINE OF SPEAKERS AND RECEIVERS

A new line of Radiolas including superheterodyne receivers utilizing AC radiotrons throughout, for simplified electric operation with self-enclosed loudspeakers of the improved dynamic type, and a new loudspeaker of artistic design, is announced by the Radio Corporation of America. Pointing out that "years of intensive research and constant development by the leading radio organizations have served to confirm the soundness of basic principles represented in the superheterodyne circuit," the announcement reads, "Now, with the application of AC tubes to the superheterodyne circuit, following the example set with the improved tuned radio-frequency circuit, broadcast reception takes another step forward towards the ultimate of perfection."

The new AC superheterodyne receivers are introduced in three models to be known as Radiola 60, a popular priced table model, Radiola 62, a console cabinet with enclosed dynamic speaker and Radiola 64, a larger console cabinet with a dynamic speaker of greater power.

The table type AC superheterodyne, model 60, includes seven UY-227 radiotrons and one UK-171-A power radiotron. The circuit comprises two stages of tuned radio frequency amplification, a second (power) detector, and one stage of power audio frequency amplification. Rectification of the current for the B and C requirements is accomplished by a UX-280 radiotron. A voltage switch is provided to take care of variations in line potentials of 105 to 125 volts. Both receiver and power supply unit are housed in a two-toned walnut cabinet. In the center of the panel is a bronze escutcheon plate framing the selector dial and concealing the bulb which illuminates the dial and tuning control. Operation of this new superheterodyne has been received to its simplest form by means of a single tuning control. In addition there is a power switch and volume control.

"The use of a power detector tube according to the announcement, is a new and revolutionary development which makes it possible to obtain much greater volume without overloading or distortion than from a detector tube in the usual type of circuit. This power detector also prevents overloading of the following audio stage.

"The unusually great output of the power detector tube is the equal of the first audio stage in the usual type of receiver with the result that the output from the UX-171-A Radiotron in the power audio stage of Radiola 60 is as great as is obtainable from receivers having two stages of audio frequency amplification. The utilization of but one stage of audio frequency amplification in conjunction with the power detector makes possible a new degree of tone quality."

"With every consideration of purse, location and operation adequately met," concludes the announcement, "the new apparatus represents the culmination of eight years of unremitting research, engineering and production since the first radio program was placed on the air."

Health Talk

WRITTEN BY DR. THEODORE B. APPEL, SECRETARY OF HEALTH

"Life, which health departments and physicians are doing so much to conserve and prolong, is being daily thrown away through the seasonal enthusiasm of the vacation time on the part of the individual," said Dr. Theodore B. Appel, Secretary of Health, today.

"It does seem a shame that thoughtless people will deliberately cross crossings uncautiously, pass motors on hills and do many other foolish driving tricks, the result of which is serious accident or death.

"It is also a pity that a number of so-called expert swimmers are doomed to go down for the third time every summer during the vacation months. Swimming, while one of the healthiest sports, should always be handled with care; strangely enough, it is the person who is sure of himself who often goes to the bottom. This kind of an 'expert' will venture where the less experienced will be extremely cautious.

"To keep the roadside eating stands sanitary, to insure healthy drinking water by the side of the highways, to insist upon cleanliness and proper facilities at motor camps all go for naught if the vacationist permits his enthusiasm to overcome his judgment and an accident or calamity results.

"According to available statistics more people were killed through motor accidents in the last six month's period than ever before in the history of vital statistics; and Pennsylvania, with its dense population, occupies a high position in this unenviable record.

"With respect to swimming fatalities the statistics also disclose that despite bathing beach protection too many will venture away from it, either because of their swimming conceit or desire for exclusiveness, and drown in consequence.

"The sad part of the story lies in the utter helplessness of officials to do anything about it. With hazards of this character, health departments can do nothing but preach.

"It is entirely proper to be enthusiastic about the vacation but handsome dividends are paid to those who keep their enthusiasm under proper control. Therefore permitting the excitement of vacation sports to get the better of you, remember that an outing is due you not only this year but every year for a long time to come. Live to enjoy them."
