

# A MODERN DAIRY AT MOUNT JOY

We wish to inform the public that we have leased a suitable building in the rear of the Central House, Mount Joy, where we have installed one of the most modern and up-to-date dairy plants to be found. Included in the

machinery is a filter, pasteurizing machine, etc.

We will receive our supply from some of the best dairy herds in the vicinity of Mount Joy and will serve

## CLEAN, PURE, FRESH MILK and CREAM DAILY

Good, not only for the baby, but grownups, too. Fresh pasteurized milk and cream, at very economical prices.

We suggest that you give our products a trial and we feel certain you will be one of our customers.

Not only milk and cream but other dairy products, especially butter.

These vital food necessities are obtainable here in a pure, fresh, sanitary condition, good for everyone and excellent for invalids and children.

### Rules Covering Seedling Demand

**NEW LAW PERMITS CHARGE FOR PACKING, DELIVERY TO OFFICE AND MAY NOT BE SOLD**

Conditions governing the distribution of forest tree seedlings and transplants were announced today by the Department of Forests and Waters. The conditions imposed are in accord with the act passed at the last session of the General Assembly which permits sale at a price to cover the cost of packing and delivery to the post office or express office at the nursery. The rate charged is \$2.00 a thousand for seedlings and \$5.00 for transplants.

Three other conditions stressed by the Department are as follows:

1. The trees must be planted in Pennsylvania for wood production or watershed protection.
2. The trees must not be offered for sale or removed from the land until they are large enough for use as wood products. The act provides that if they are sold for ornamental purposes the applicant shall be liable to a penalty of three times the value of the trees sold.
3. The planter will protect the trees as far as possible from fire, grazing and trespassing.

The trees must be planted in accordance with the most practical modern methods. Complete planting instructions will be supplied by the Department of Forests and Waters.

**Permit Thinning**

The minimum shipment will consist of 1000 trees, and the minimum of any one kind will be 500 trees. This will enable forest tree planters to set out as small a tract as three-fifths of an acre by planting two kinds of trees in a mixture 5 by 5 feet apart, and a full acre if the trees are spaced 6 by 6 feet apart.

The department cannot supply trees to individuals for wind breaks, hedges, table trees, potted trees, or any other ornamental planting. Trees that are available for distribution are grown solely for reforestation and are not suitable in size and form for other purposes.

**MARKETS**

Wheat, per bushel ..... \$1.25  
 Corn, per bushel ..... \$1.16  
 Eggs, per dozen ..... .96-.98  
 Butter, per lb. .... .40  
 Lard, per lb. .... .14

**Improve Fruit Trees**

One of the important methods used to improve fruit trees is called budding. This is the time of the year when the work should be done.

Gilbertsville — Concrete being poured on road project from this place to Layfield.
