STATE NOW OWNS 131278 ACRES

THE COST OF THIS LAND WAS
\$500,000; HAS CONTRACTS
FOR 56,130 MORE

To date the Game Commission has taken title to a total of 131,278 acres of land, the cost of which, not including title examinations and surveys, is \$441,943.53. The holdings constitute twenty-two blocks of land each of which will be known as State game lands and given a serial number. These lands are located in twenty-one counties. Primary refuges are now established on twelve of the twenty-two blocks. Ten of the blocks, at present, are in their entirety, open to public hunting. The board has made no plans for the creation of primary refuges within these ten blocks.

Lands conveyed to the Commonwealth during 1928 include tracts in Bradford, Tioga, Monroe, Venango, Carbon, Bedford, Westmoreland, Chester, Berks, Elk, and Jefferson counties, comprising a total of 98,638 acres, at a cost of \$157,004.51.

A total of 56,130 acres, costing \$236,969.40 are now under contract for purchase. These areas are located in Venango, McKean, Elk, Susquehanna, Sullivan, Cameron, Fayette, Bedford, Bradford and Lancaster counties. Those situated in Venango, McKean and Elk counties, will be conveyed to the Commonwealth within a few weeks.

Near Cities
During the past few years it has been the policy of the Game Commission to secure suitable lands as near to the centers of population as possible. In order to do this a higher average cost per acre must be paid, since such lands are naturally more valuable than cut-over forest areas which can be purchased in remote sections of the Commonwealth, and are far more adaptable to certain kinds of game.

The Game Commission is confining its efforts not only to securing lands in a few particular sections of the Commonwealth, but near every center of dense population throughout the State, in an effort to bring the game to the people. Such sen-

turies will continue to insure adequate hunting in these heavily populated areas.

The Board also is interested in adding new areas of remote forest lands to tracts which they already own, and often such purchases not only add excellent game territory, but help in many cases to straighten out heretofore very uneven boundary lines.

Many Rejections
In many cases lands offered must be rejected either because the Commission's holdings in that territory of the sufficient or the purchase price is too high. Occasionally offers are received for lands adjoining present State forest lands, and such offers are turned over to the Department of Forests and Waters.

In addition to the twelve primary refuges maintained on State game lands, there are twenty-three of these refuges on State forest and leased land. A refuge keeper is employed on each of these thirty-five primary refuges. Headquarters must be maintained for the refuge keepers. During the past few years it has been the policy of the Board to make the homes at refuge keepers' headquarters as comfortable as possible. Old houses are repaired where possible. New houses and necessary outbuildings are built at refuges where buildings are poor. The new houses are substantially constructed and equipped with bathroom and hot air heating system.

A BARGAIN—Who wants a tract of land fronting 100 feet on the highway between here and Florin and 540 feet deep? The price is very reasonable if sold soon. J. E. Schroll, Mt. Joy. mar 2-4f

Prepare Flower Supports

A number of perennials and other plants require staking. Chief among these are dahlias, campanulas, certain phloxes, asters, chrysanthemums, and gypsophylla. The stakes are most inconspicuous when painted green. They should be used next summer.

Kendig Brothers
