RESOLUTIONS OF RESPECT
Whereas, it has pleased Almighty God to summon unto himself our beloved brother, Ephraim Hertzler, His devoted servant, member of the Christian Endeavor the Sabbath School, always having the best interests of the church his organizations and fellowmen at heart.
Whereas, the loss of our esteemed brother will be felt keenly by the church and the community in which he resided, to all of which he gave his services most generously let God be praised for the good work wrought by his faithful servant, whose soul we commend to God eternally,
Resolved, that we hereby record our great sorrow and loss in the death of our noble Christian brother and our humble submission to the will of him who doeth all things well, and
Resolved, that we extend our sincerest sympathy and condolences, to the family in their bereavement, praying that the father of all comfort may sustain them in his hour of grief, and,
Resolved, that a copy of this letter be sent to the family a copy placed on the minutes of Sunday School and Christian Endeavor, also a copy be printed in the Conference Herald and Mount Joy Bulletin.

Narrowing Gulf
The gulf of California, the narrow arm of the sea just south of our southwestern border, seems to be gradually disappearing from the map. Recent surveys show that the peninsula of Lower California is widening and that the gulf is growing more shallow each year.
The phenomenon was first noted more than 200 years ago by the Jesuit priests who were the earliest colonizers of the peninsula. About thirty years ago a scientifically inclined inhabitant planted a number of palm trees about ten feet from the shore and one hundred yards inland. Twenty years ago there was considerable crossing the gulf, but now navigation with large boats is somewhat dangerous.

Recollections
An absent-minded man called upon his equally absent-minded doctor, and they spent a pleasant evening together, playing chess and exchanging political views.
Finally came the hour of parting, and the visitor exclaimed:
"You know, doctor, I came here specially for something. Oh, yes, now I recall it. Our maid has fainted and we want you to see her right away."
"That reminds me," replied the doctor. "Your wife wanted you on the telephone a while ago. The maid has passed away."

Humors Are Hormones
Another belief of the old-time doctors has been upheld. What they called "humors" in the blood has proved to be the modern "hormones" which are secreted from certain ductless glands and not from the heart and liver as once believed. The old-time doctors claimed the disposition of their patients and some of their ills were due to these "humors." Scientists now admit that they were not far wrong and declare that the "hormones" play an enormously important part in determining the disposition of an individual.

Old Time Legal Date
Lady day was originally the name for all the days in the church calendar marking any event in the virgin Mary's life, but now restricted to the feast of the annunciation, held on the twenty-fifth of March each year. Lady day was in medieval and later times the beginning of the legal year in England. In 1752 this was altered to the first of January, but the twenty-fifth of March remains one of the quarter days; though in some parts old Lady day, on the sixth of April, is still the date for rent paying.

How to Get Into Print
When we tell somebody that if we had sufficient money we'd stop writing, the invariable comment is, "Oh, you might stop for a little while, but you'd be at it again soon." Maybe so, but maybe we couldn't get anything printed. Well, if we had to get our name in print again, if the urge were too strong, we know what we'd do. We'd write one of those Letters to the Editor—of any paper at all. The letter would begin, "I wish to express my appreciation of your editorial."—F. P. A., in New York World.

Rose Champion
Tyler, Texas, claims to lead the world in rose growing.
Seventy-five carloads of rose plants, numbering 25,000 roses to the car, were shipped during the present season to various parts of the United States.
Most of the roses are grown under contract and yield the growers about 20 cents apiece. It is estimated that the yield for the present season will be \$250,000.

Radio Idea Old
Radio communication is not an invention, nor in reality a discovery. The theory was known long before anybody was able to apply it in practice. Numerous inventors were trying to devise apparatus that would make the theory work. For this reason, several different practical systems of wireless telegraphy appeared about the same time. Marconi had the good fortune to be first, but he distanced his nearest competitors by only a short time. It was only by accident that electrical communication by wire was perfected before electrical communication without wires, as both are implied in the electrical knowledge that preceded them, and inventors were working in both fields for many years before anybody in either group succeeded.

Fountain Gushes Wine
In the town of Marino in the Roman Campagna there is a fountain which occasionally flows with wine. For an hour in the vintage season of each year the thirsty may freely fill their pitchers.
The custom of free wine is an old one. In the market place near by stands a gigantic basket filled with clusters of grapes, its diameter almost as great as that of a small-town gas tank. The basket belongs to the town and whatever of its contents is left is made into wine for the free fountain in the following year. Great crowds gather for the celebration.
Charles A. Hamilton
Charles A. Hamilton, thirty-three of Rapho township, near Salunga, died Monday afternoon, after an illness of six months, of complications.
