

OIL BIDS OPENED, ACTION DEFERRED

(From page 1) Mr. Miller stated that there have been several requests for the opening of Church Lane, from South Market street west to Poplar. The Street committee was empowered to act.

Mr. Hawthorne, of the Water committee reported the completion of laying the water main on South Jacob street, plugs flushed and recommended cleaning the reservoir. The latter was left in the committee's hands.

The Finance committee reported the approval of all bills which were later paid.

Pumping Engineer Shatz reported having pumped 24,000 gallons in 8 hours by steam and 4,300,000 gallons in 430 hours by water power.

Chief Pennell, of the Fire Department, reported two fires during May. Secretary Leib, of the Board of Health reported one case of scarlet fever, one of mumps and two nuisances during the month.

Special Officer Elmer Zerpey, in his report, stated that he traveled 855 miles about town during May.

Mr. Peter Kraybill, on Donegal Springs Road, appeared before Council and complained that the assessment on his property is too high as compared with other properties in his neighborhood. He said he discussed the matter with the West Ward assessor and also appeared before the County Commissioners on appeal day. The matter was placed in the hands of the finance committee to take it up with the assessor and see what adjustment can be made.

The report of H. N. Nissly, treasurer, was as follows: Balance in Boro account, \$881.76; Water account, \$3,307.56; Interest, \$648.00.

The bond of James H. Metzler, tax collector, to the amount of \$28,000.00 with the directors of the First National Bank and Trust Company as surety, was presented and accepted.

Mr. Miller suggested experimenting with traffic on Main street by eliminating two or all of our traffic lights some Sunday. His suggestion was favorable to Chairman Murphy provided stop signs were placed at street intersections. This plan may be tried at some future date.

Bids on road oil were then opened. The Atlantic Refining Co. bid 7.18 cents per gallon, same as last year for the same kind of oil. The Schock Independent Oil Co. bid 5.6, 5.7 and 5.8 cents per gallon on light, medium and heavy oil. The matter of purchase was discussed at length and finally left in the hands of the Street committee with power to act.

Bills were then paid to the amount of \$956.70 and Council adjourned.

UNWESSED MADE HERE

(From page 1) Organizations in line in Mount Joy town Boy Scouts, Girl Scouts, Hummelstown, Mt. Joy and adjoining places, borough council, ministers, Sons of Veterans, Spanish American Veterans, Forsters, Red Men, Ladies' Legion Auxiliary, Fire companies from Rheems, Mount Joy and their apparatus, and other organizations.

This feature of the day was preceded by Memorial Day ceremonies in Florin, Lincoln, Mount Joy, Eberle and Salunga cemeteries. The observance continued throughout the entire day, starting at 8:30 in the morning, and continuing until about 10:30 Thursday night, during which an evening concert was given by the Emigsville band, of York, under director W. Howard Eberle.

Hon. Aaron B. Hess, of Lancaster, Speaker of the House of Representatives of the State Legislature, delivered the Memorial address in the park, stressing the significance of Memorial Day.

Following is the program: Prelude, Emigsville band; Star Spangled Banner, audience; Prayer, Rev. William H. Beyer; vocal selection, Keystone Quartet of Harrisburg; reading, Lincoln's Gettysburg address; Rev. C. B. Seigelken, D. D.; vocal selection, Keystone quartet of Harrisburg; selection, massed drum corps; oration, Hon. Aaron B. Hess; Vocal selection, Keystone quartet of Harrisburg; American audience; selection, Mannheim band; benediction, Rev. H. S. Kiefer; taps.

TESTING ROADSIDE WATER SUPPLIES

Laboratories for testing roadside water supplies along state highway routes will begin work next Monday, the state health department announced today. In addition to the regular inspections along the main and secondary roads, the tests will involve water in parks of all types, and picnic grounds. This phase of the testing has been inaugurated for the first time this year.

It wouldn't be a bad idea if the Department officials tested the large spring on Jno. E. Schroll's property, east of town, as passersby very frequently stop there for water. Of course very few drink it as the dye from Brown's Mills is flowing into this spring again.

There is no better way to boost your business than by local newspaper advertising.

America in Lead as User of Labor-Saving Devices

Hand-Tasks Still Popular in Europe; Continent Has Yet to See Its First Suction Cleaner for Heating Plants and Chimneys.

Americans traveling in Europe, and residents of this country whose early lives were spent abroad, think of the Old World as more than the site of superb museums and art galleries, historical and religious shrines and magnificent pleasure places. They also dwell upon its quaint and picturesque ways of doing things, and the prevalence in everyday affairs of survivals of medieval manners.

Ancient cottages and manors—such as Haddon Hall where Dorothy Manners lived her high romance, and the delightful farmhouses of France, from the crevices of whose thatched roofs, moss and wild flowers grow—present a delightful contrast with the mechanical-looking, "silk brand-new" dwelling house in this country.

Wood and stone still are carved by hand, and the smith still beats out graceful shapes in iron, for the embellishment of the home; and, despite the encroachment of the machine age, many things which modern America accomplishes mechanically still are arts of handicraft in Europe.

Old "Sweeps" Picturesque. But, while all this has the great advantage of being picturesque, it has disadvantages, too. For instance, there is the matter of chimney cleaning. In America the giant vacuum-cleaning machine has all but supplanted the old-time chimney sweep, whereas in Europe this dirty but extremely necessary job still is done entirely by manual labor.

Any morning the American traveler in Europe, be he in England, Germany, Switzerland or anywhere else, may see one or more of those strange figures in black hood, silk hat or tall-peaked cap, with brooms and brushes, ropes and rods over their shoulders, ladder and soot bag under arm, sauntering down the street, calling their trade to the housewives.

Elsewhere on this page are shown pictures of chimney sweeps of several European countries. By way of contrast, also, is printed a photograph of one of the thousands of mechanically-operated giant "chimney-cleaning blimps" used throughout America, which does everything that any chimney sweep can do and a great deal more quickly and efficiently.

The Holland Institute of Thermology describes the suction cleaner for heating plants as an enlarged edition of the household vacuum cleaner adapted to the heating field. Usually it consists of a 40-horse power motor, mounted on a truck, a huge canvas bag, and what appears to be many sections of flexible stovepipe. The motor operates a fan which

(1) The typical English chimney-sweep, and (2) here's one not so typical—Mrs. Hannah Poole of Hollywood, Worcestershire, (not California!) the only woman who ever took up this ancient craft; she does it to support herself and her aged father. (3) Swiss sweeps wear silk hats—just because they always have. (4) This is the giant vacuum cleaner, modern America's improvement upon the old-world sweep. (5) And this is how a crew of German chimney-cleaners appear as they set out for a day's gambol over the housetops.

working through a "snake" formed of several sections of pipe attached to first one and then another of the heating plant openings, draws the accumulated dirt and soot out of the heater into the huge bag, which is then taken to the city dump and emptied. The suction method is the best yet devised for cleaning both chimneys and heating plants, because it reaches the many nooks and crannies in the modern heating system that are beyond the reach of human hands. But one of the larger types of cleaners should be used for best results, since a small, improvised affair may lack both motor power and suction to do a spick-and-span job.

Motor-created suction not only cleans the entire heating plant more completely and thoroughly than is possible by hand, and does it in a fraction of the time required by the manual method, but also does it without fuss, muss, dust or dirt—even while the decorator or laundress is working. It that is desired.

Dirty and sooty heating plants are fuel wasters. With hot water and steam boilers, soot covering the boiler heating surfaces means loss of fuel. Soot-covered surfaces keep the heat away from the heat pipes so that it is wasted out of the chimney. Tests by the United States Bureau of Standards have shown that one-eighth of an inch of soot on the heating surfaces of a central heating plant will reduce the plant's efficiency 28 per cent, while one-quarter of an inch will cut it down fully 48 per cent. So a thorough cleaning of the heater can easily save one or two tons of coal in the course of a winter.

Soot and obstructions in the heater and chimney interfere with efficient heating and are a source of fire hazard. Defective flues and heating plants comprise one of the chief causes of fire loss in the United States. Suction cleaning removes obstructions, brings to light defects in the furnace, smoke pipe or chimney and discloses any fire danger there.

A thorough cleaning of the furnace puts the finishing touch on the spring housecleaning. A dirty and sooty heating plant makes a house difficult to keep clean and raises the cost of cleaning it. In the ordinary house three-fourths of the dirt comes from the outside atmosphere through cracks around windows and doors, and one-quarter from the heating system.

Lights Housekeeping Load. When the heating system is defective, however, the amount of dirt from the heating plant increases until it equals the amount that comes in through the windows. Cleaning of the heating plant saves labor in dusting, lowers laundry costs, preserves hangings and furnishings and reduces the necessary frequency of changing wall and ceiling decorations.

Spring rains seeping down the chimney onto the soot-laden smoke pipes will corrode and ruin them. Removing the soot by the suction method minimizes this damage.

An erroneous, though popular, impression is that a heating plant in which some other fuel than coal is used does not get dirty and dusty. Oil leaves a greasy and grimy deposit on the inner parts of the heating plant, and so does gas. The vacuum process is effective in removing these drawbacks to heating-plant efficiency.

Thus, on the score of economy in fuel and labor, and as a lightener of the housewife's labor, the modern mechanical heating system clearly represents the march of progress away from the hand methods of the old country chimney sweep. That is why countless American women have the suction cleaner spend an hour or so on their premises and then dismiss all worry about the heater until the next fall.

LOCAL DOINGS AROUND FLORIN

(From page 1) Mr. and Mrs. Roy Moose and family spent Decoration Day at Perry Co. Mr. Fred Keener, of the U. S. Navy, is spending a thirty day vacation here.

Mr. and Mrs. John Cosgrove and family spent Monday at Lancaster. While cutting meat Mrs. Clarence Nissly accidentally cut an ugly gash in her finger.

The Florin base ball team will play the Lancaster Moose team at Lancaster on Sunday. Elsworth Brandt, truck driver for the Bachman Chocolate Co., is enjoying fifteen days vacation.

Mr. and Mrs. Benjamin Brubaker spent Sunday at Lancaster with Mr. and Mrs. Elias Eshleman. The Church of the Brethren will hold their regular services in the school house on Sunday morning June 9th.

Mr. and Mrs. George Vogle and Mr. and Mrs. Harry Gebhart and family spent Sunday at Harrisburg visiting relatives.

Messrs. Howard Barnhart, Daniel Brubaker, Eugene Garber and John Masterson spent Sunday at Camp Eshleman, in Perry Co.

The Ladies' Aid Society of the United Brethren Church will meet at the home of Mrs. John Henry at

MAN CRITICALLY INJURED IN CRASH

(From page 1) proaching, the latter's Ford zig-zagging on the road. He drove to the right of the road so as to give Peffley all the room he could but as they were about to pass, Peffley's Ford crashed directly into the side of the truck, knocking it completely off the concrete highway against the fence. The left side of the truck was damaged and the Ford was completely demolished.

Peffley was badly injured and was immediately removed to the General Hospital in the ambulance. There it was found his left arm was shattered and his skull is probably fractured. Surgeons hold little hope for his recovery.

Officials of the Herr Music company said they received a telephone message that Samuel Eaby, 65 years old, Salunga, one of their employees who was on the truck, had been injured. Mr. Eaby, however, did not appear at either hospital for treatment and store officials left Lancaster shortly after noon in an attempt to find the man. The truck driver was not hurt.

HOME -- SWEET -- HOME

Governor Fisher, in addressing the Pennsylvania Real Estate Association held at Pittsburgh October 28th, 1921, made this statement: "The reports for the year 1920 show that the Building & Loan Associations of the State of Pennsylvania had assisted in building and purchasing 60,364 homes. If all those who have been assisted in securing homes were to sing 'Home Sweet Home' it would swell into a grand chorus from one end of the State to the other. If each of these homes would accommodate on an average four persons they would be sufficient to establish a city of 240,000 inhabitants."
