PRODUCE & LIVE STOCK MARKET

CORRECT INFORMATION FURNISHED WEEKLY BY THE PENNA. BUREAU OF MARKETS FOR THE BULLETIN

MARKETS: Truck receipts of tomatoes on the local market were unusually heavy this morning, with prices showing a decided drop over yesterday's quotations. The quality of the tomatoes was fair, some stock showing the effects of the recent dry, hot weather. The best stock ranged from \$2.50 to \$3.50 per 5-8 basket, with a few early sales as high as \$4.00, according to the Penna. and Federal Market News Service.

The apple market was steady on good quality stock, while stock of poor quality sold slowly. Nearby Transparent's brought \$1.50 to 1.75 per bushel, with a few sales higher. Most offerings of nearby peaches were poor to ordinary and sold slowly at low prices. Most sales of Carmen ranged from 75c to \$1.00 per 5-8 basket. Blackberries held firm and sold at \$4.50 to \$6.00 per 32 quart crate, while huckleberries met a good demand and brought \$7.00 to 8.00.

Nearby beans were in lighter supply and prices ranged from 65c to \$1.25 per 5-8 basket on green, while wax sold at \$1.00 to \$1.50. Beets were dull and brought 1c to 2 1/2c per bunch and carrots sold at 1c to 3c. Cabbage was about steady with lighter supplies and sold at 25c to 40c per 5-8 basket. Sugar corn met a good demand and most sales ranged from \$2.25 to \$2.75 per 5-8 basket while cucumbers were weaker and brought 75c to \$1.

The potato market continued about steady and supplies were moderate. Nearby Cobblers brought 85c to 90c per 5-8 basket, a few sales \$1. Celery was steady and sold at 25c to 75c per bunch, while lettuce met a moderate demand and prices ranged from 50c to \$1 per 2 dozen crate. Peppers held firm on good stock and sold at \$1.35 to \$1.75 per 5-8 basket, and onions brought 85c to \$1.

MARKET: Beef steers and yearlings drab, weak to unevenly lower, compared with week ago 25c to 50c lower, grassy kinds off most, top heavies and medium weights \$15.25, best yearlings \$15.00, bulk \$13.25-14.00. Bulls steady, weaker undertone on the stock and cutters, bulk medium bulls \$10.25-11.25, heifers \$11.00-11.75, butcher cows \$8.75-9.50, cutters \$5.50-\$6.25. Stockers and feeders country demand very narrow, little action, steady to weak. Calves firm, top vealers \$17.50, few selects \$17.75.

HOGS: Strong to 25c higher. **RECEIPTS:** For today's market, cattle 12 cars, 2 Va.; 2 St. Paul; 2 Pa.; 2 Kan. City; 1 W. Va.; 1 Canada. 1 Tenn.; 1 Texas, containing 379 head, 696 trucked in, total cattle 1075 head, 29 calves, 152 hogs. Receipts for week ending July 13, 1929, cattle 58 cars, 15 Va.; 14 St. Paul; 9 Pa.; 4 St. Louis; 4 Canada; 2 W. Va.; 2 Kan. City; 2 Iowa; 1 Chicago; 1 Tenn.; 1 Ky.; 1 Indiana 1 Ohio; 1 Texas; containing 1741 head, 2275 head trucked in, total cattle 4016 head, 584 calves, 958 hogs, 536 sheep. Receipts for corresponding week last year, cattle 86 cars, 21 St. Paul; 18 Pa.; 14 Chicago; 4 Kan. City; 3 Buffalo; 2 Va.; 2 Iowa; 2 Texas; 12 St. Louis; 5 Canada; 3 Md.; containing 2754 head, 1298 head trucked in, total cattle 4052 head, 368 calves, 1206 hogs, 684 sheep.

CENTRALIZED RADIO HELPS IN TEACHING

The New Unit Takes Programs to School Rooms and to Hotel Guests.

Guests in hotels today are turning on a radio program in their rooms as easily as they switch on the electric light, pupils in schools are listening to valuable lectures given far away, and tenants in thoroughly modern apartments are connecting their receiving sets as easily as they connect their electric irons by use of one of the newest and most interesting radio developments. "Centralized radio" sprang into wide use immediately with its recent introduction by the Radio Corporation of America, whose engineers perfected it.

The reception of any one of four programs in rooms of hotels, schools, libraries, clubs, hospitals or other buildings is supplied through wall speakers no more conspicuous than a well hung picture. The programs may be heard also through separate loud speakers easily connected with a wall plate or through headphones when it is not desired that they be heard throughout the room. The development is equally interesting to the pampered guest of a huge metropolitan hotel and to pupils in isolated schoolhouses, who now can listen to educational features hitherto available only to pupils in the largest cities.

Principal of Oyster Bay, Long Island, school operating centralized radio.

This type of centralized radio, known as audio frequency, is not to be confused with the conventional radio receiver and amplifier connected with scattered loudspeakers or headphones. Reception with the new audio frequency is as perfect in every room as if an excellent radio receiving set were placed there.

The RCA audio centralized equipment takes the form of the necessary units mounted in standard switchboard fashion, one receiver with amplifying, distributing and outlet equipment constituting one channel, required for the reception and distribution of one program. As many as four channels, giving the listener a choice of any one of four programs, may be mounted on the central switchboard. The equipment is operated from the usual electric lighting circuit. The receiver for each channel is tuned to a given station and the tuning dials locked in position to prevent tinkering. A time clock switch may be set to start the programs at any designated hour and to turn them off.

The centralized equipment may be placed beside the telephone switchboard, behind the desk in a hotel, in the office of a hospital superintendent, in the office of a school's principal or in any place that is convenient. Photograph records may be played in the absence of programs.

The other type of centralized radio meets the different problem of persons who desire to use their own receiving sets in apartment buildings. It is known as radio frequency and does away with the necessity for unsightly roof antennas and lead-ins on the walls of modern buildings. It is not a mere lead-in, but is strictly a radio frequency transmission line which does not pick up additional signals or interference. One efficient antenna some 50 to 75 feet above the roof takes care of all, so that tenants merely have to plug in their radio receiving sets on a wall socket. A large percentage of the best type of big apartments now are being equipped in this way.

FLEEING MAN CAUGHT BY A RADIO PICTURE

Constantino Queruben has a chance today to share a certain pride with the old crook character in Bayard Veller's famous play, "Within the Law," in that he introduced a new era in criminal history. Veller's character boasted that he was the first man to use a Maxim silencer in shooting his victim. Queruben was the first man captured by detectives by means of a radio photograph.

The chase after which Queruben is being taken back to New York to face charges of swindling and forgery extended over 5,500 miles and ended in Honolulu harbor. The sleepy Filipino was roused from his berth at 5 o'clock on a recent morning and identified positively by a facsimile radio photograph, taken from an original in the files of the Bureau of Information in New York Police Headquarters and projected 2,800 miles across the Pacific Ocean by the Radio Corporation of America.

Control Bad Weed

Horse nettle grows in pastures, meadows, gardens, and cultivated crops in many counties of the state. Keep the shoots cut down to completely starve the rootstocks. In large areas, frequent cultivation, as in check-rowed corn, with hand hoeing for stray shoots and after cultivation, is a good control method. Smother crops or summer fallow will also control this pest.

HOME HEALTH CLUB

WEEKLY LETTER WRITTEN EXPRESSLY FOR THE BULLETIN BY DR. DAVID H. REEDER

After Appendicitis: In considering the treatment of any condition of sickness it has always been my rule to first find the cause. To my mind, it's the only logical way. Many people seem to think that if they have had an operation for appendicitis they are forever immune and need have no further fear along that line, but I say emphatically, and I think you will agree I am right, that after an attack of appendicitis even though you have been successfully operated upon and the appendix removed, your troubles have only just begun unless you remove the cause. What was the cause of appendicitis? The thoughtless will say inflammation of the appendix. No, inflammation in the appendix is appendicitis, but what causes the inflammation? Constipation, yes, that is the prime cause. If you were never constipated you would forever be safe. Appendicitis is only one of the results of the retention of fecal matter in the colon for too long a period.

The removal of the appendix does not cure the constipation, in fact, many claim that it is made worse and that the function of the appendix has been to secrete a lubricating fluid, you turned traitor and had it removed from the post duty with a sharp knife. What are you going to do about it? Are you going to stand guard from now on throughout all your life and see that every meal you eat has the necessary elements to prevent constipation and from now on throughout your whole life will you promptly obey the call of nature and allow the colon to dispose of the waste matter as soon as a demand is made?

You know very well you will not do these things, you never have and you are not going to start a revolution now, that you are no longer in danger of appendicitis. You do not realize and I suppose I cannot make you realize that peritonitis is even more dangerous than appendicitis. No, it's not the doctor's fault, that is simply his name for a condition in which there is inflammation of the entire peritoneum. Yes, sometimes they operate for that also, but that is another story and the operation does not cure constipation and does not remove the cause.

To constantly take physic upsets the stomach, irritates the liver and in time the experience of all the chronic sufferers show that the physic fails, loses its effect even though the dose is increased from day to day. Now what's the answer? One answer is that we now find that constipation has long been present in all cases of cancer and that people who are never constipated, never have cancer. Remember that pills and salts do not cure, simply relieve. Eat right and get the habit of very free daily or twice daily bowel movements. That's the answer.

All readers of this publication are at liberty to write for any information upon the subject of the health at any time. Address all communications to Dr. David H. Reeder, Mainway Building, 31st and Main Sts., Kansas City, Mo., giving full name and address and at least six cents in postage.

A NATURAL ADVANCE

Those who assign the so-called "boom" in industrial stocks to speculation alone, overlook the basic elements that cause a rise in security prices.

Price in everything is controlled by the relation of supply to demand. We lead the world in wealth, in industrial development, in wage standards and in practically all material phases of modern civilization.

We have more people with a desire to invest, than there have been suitable investment opportunities. It is the old case of demand exceeding supply. Consequently, prices of the better class of securities have risen.

Not every stock which has soared is worthy of its cost. But, in general, the rise in the prices of good American securities is the natural result of our industrial growth and a standard of wages and living that makes every citizen a potential capitalist.

A simple way to increase the number of bee colonies in an apiary, when each colony is to be divided in two, is to remove the lower hive-body containing the queen and brood to a new location: A hive containing empty combs is placed on the old stand, and a queen-cell containing a queen almost ready to emerge, is placed between the combs in a cell-protector, the second story being put in place. A hive-body with full combs of honey is put on the removed hive containing the queen, for the winter food supply. To prevent the return of too many bees of the new colony to their old location, the entrance of the new hive should be closed with green grass. As this dries the bees are released. When out-apisaries are maintained, original hive can be divided into two equal parts, the queenless portion given a queen-cell, and one part moved to another apiary to prevent its return to the old stand. Colonies should be increased before early August.

U.S. makes Dollars SMALLER PLYMOUTH makes them LARGER

IN WASHINGTON, the government presses are turning out smaller dollar bills. In Detroit, the huge Plymouth plant, largest of its kind in the world, is turning out a motor car that makes the dollar bigger in purchasing power.

Not in all automobile history has another such value appeared in the low-price field.

There has never been another low-priced car to compare with the improved Plymouth in full-size roominess—in Chrysler-designed stylishness—in Chrysler-like briskness and smoothness—in all-around quality, plant, largest of its kind in the world, is turning out a motor car that makes the dollar bigger in purchasing power.

In every respect, Plymouth is the biggest thing in its class. Compare—you'll be astonished how much bigger in value Plymouth has made the dollar.

Six body styles, priced from \$655 to \$895. All prices f. o. b. factory. Plymouth dealers extend the convenience of time payments.

THE COUNTRY NEWSPAPER OF GREAT VALUE ACCORDING TO STATEMENT OF NOTED EDITORIAL WRITER—PROVEN BY FACTS

Arthur Brisbane, one of the best minds of the time, says:

"H. Z. Mitchell's 'Sentinel,' published at Bermidji, Minn., wins the prize as best weekly in the National Editorial Contest. This is a good time to remind the public in general, and national advertisers in particular, that country weekly newspapers are the most important organs of public opinion and protectors of public welfare.

"And, their advertising per mill line, is not excelled by any publication, of any kind.

"The reader of a country weekly buys everything from shingles on the roof to cement in the cellar floor, and every advertiser has in him a possible customer."
