The Mount Joy Building & Loan Association

The great problem confronting the average man and woman who long to own a home is often that of financing it. But millions of happy home owners, who have been confronted with this problem have proved conclusively that where the ambition is a worthy one the way can be found.

During the past year we have assisted in paying for six homes in Mount Joy and community.

Ambridge - Radio & Electric Supply Company moved to new quarters.

Norristown - Work on Montgomery County courthouse annex rapidly nearing completion.

Oil City - Sears, Roebuck & Company prepare for opening of store.

A DOMESTIC REVOLUTION

Automatic heat is causing a minor domestic revolution. Oil and gas burners are replacing old-fashioned furnaces. The once-despised cellar is being converted into a den, or a smoking or reading room.

The tremendous progress made in the past few years in automatic heating is indicative of the American genius for finding new and better means to perform old tasks.

Cull the Poor Layers

Although culling can be practiced as soon as the chicks are hatched, nearly 40 percent of an average flock of hens will probably have to be culled between June and September. By eliminating the poor producers which quit early in spite of proper feeding and management, less labor and feed will be needed to obtain equal returns from the flock.

Being sick is twice as depressing if your ailment has an ugly name.

STAGE IS ALL SET FOR AUTO CLUB PICNIC

Everything is in readiness for the annual picnic of the Lancaster Automobile Club to be held at Hershey Park, August 1. Indications are that it will be the biggest and best of the many successful outings held by the club.

Special provisions have been made for the kiddies, as well as for the adults who attend. Strips of tickets entitling children 12 years of age and under in the families of Club members to free rides and souvenirs now are being given out at Club headquarters, 10 and 12 South Prince Street, Lancaster. For the convenience of those who cannot arrange to call at the office, these tickets will be available at the park headquarters of the Lancaster Club on picnic day. These tickets entitle the children to free rides on the miniature railway, the merry go round, the ferris wheel and the aeroplane swing, and to a lollypop, a balloon and an Eskimo pie.

One of the outstanding features of the picnic, which this year will be held in conjunction with the Motor Club of Harrisburg, will be the baseball game between the Williamsport and Harrisburg teams of the New York-Pennsylvania State League. This is a regularly scheduled league contest transferred from the Harrisburg grounds to the park diamond especially for the Auto Club picnic. The game will start promptly at 2 P. M. Admission will be free.

Concerts in the morning and afternoon by the Lancaster Military Band, swimming in the fine new pool, addresses by a number of men prominent in organized motordom throughout the State and Nation and dancing in the evening to the music of C. Lloyd Major's orchestra also will be on the program.

In line with the general growth of the Club an augmented list of prizes will be offered this year. There will be 125 awards, twenty-five \$5 gold pieces, fifty \$2.50 gold pieces and fifty Official A. A. A. Tour Books.

All motorists and their friends, whether members of the Auto Club or not, are cordially invited to attend the picnic.

ADDITIONAL SUPPLIES FOR THE GENERAL HOSPITAL

Supplying eighty additional hospital beds with linens will be the increased work of the Women's Auxiliary of the Lancaster General Hospital when the new wing opens during the late summer. The new building, which will be used for maternity cases, will make room for increased number of patients in the main building.

The Auxiliary assumes the responsibility of supplying the Hospital with linens and patients' garments. During the past year twelve thousand garments were supplied. The hospital considers the service rendered by the group of Auxiliary societies as one of its greatest assets. The sixteen county Auxiliaries supply many of the necessities and are generous with their gifts of dainties to the patients in the wards.

The increased service rendered by the Hospital calls for greater service from the Auxiliary. Mrs. B. Frank Witmer, chairman of the membership committee, invites all newcomers into the vicinity, who are interested in hospital service, into Auxiliary membership.

Mrs. William N. Appel is president of the Lancaster Auxiliary. The presidents of the sixteen county branches are: Mrs. L. Rupp, of Akron; Mrs. Frank Coleman, of Chestnut Level; Mrs. C. S. Duttenhofer, Churchtown; Mrs. H. U. Case, East Petersburg; Miss Arlene E. Case, East Petersburg, Juniors; Mrs. J. F. Mentzer, Ephrata; Mrs. H. L. Batten, Leacock; Mrs. Ralph Snavely, Leaman Place; Mrs. Sara K. Jenkins, Litz; Mrs. H. C. Stauffer, Manheim; Mrs. B. C. Atlee, Millersville; Miss Mary E. Newpher, Mount Joy; Mrs. J. W. Zehring, Mountville; Miss Anne J. Uren, Rohrerstown; Mrs. J. H. Reitz, Rothsville, and Mrs. H. G. Johnson, Strasburg.

Protect the Potatoes

Flea beetles can be controlled by spraying with arsenate of lead or calcium arsenate, say State College entomologists. Add three or four pounds of the material to 100 gallons of bordeaux mixture.

Take Care of Flowers

Flowers require plenty of water and proper cultivation. Remove surplus water to insure the beautiful blossoms. A dressing of bone meal is beneficial.

SHE MAKES BIG GAIN BECAUSE OF A LOSS

Mrs. Amy Boulter of 135 West Eighty-third street, New York, a widow with two young sons, just has been handed a certificate for two hundred shares of stock in the Radio Corporation of America. The stock replaced two hundred shares of original no par value common stock represented by two certificates which were lost after Mrs. Boulter put them in the mail on May 22, 1923. The transaction which just has been completed was the happy end of a long wait by Mrs. Boulter for the expiration of the legal period in which the shares represented by the lost certificates might have been presented for exchange.

MRS. AMY BOULTER

Many times in those years while she was supporting herself and her sons by nursing and renting some of the rooms in her apartment, Mrs. Boulter says now, she wished she could sell her stock.

When the time of waiting was up a few days ago Mrs. Boulter found that the \$811 she invested through a broker on the installment plan in the then new enterprise of radio had grown to approximately \$20,000.

America's Great Debt

to Alexander Hamilton

Without any question it was Alexander Hamilton who laid the foundations for the material prosperity of the United States.

He was the founder of our whole financial system. As our first secretary of the treasury in President Washington's cabinet, Hamilton devised the governmental funding system, the internal revenue bureau, the sinking fund, the national bank, the federal mint and currency system.

He was the father of the protective tariff and was the first to propose and vigorously defend the doctrine of the "implied powers of the Constitution."

He was first to advocate internal improvements and the building of roads and bridges.

Talleyrand, one of his old friends, passing Hamilton's window very late one night, wrote:

"I have seen a man who made the fortune of a nation and labored all night to support his own family."

After his death his private affairs were found to be in a terribly tangled condition and it was only through a special act of congress that his widow was supplied with funds.—Thrift Magazine.

YOUNG OFFICIALS IN YOUTHFUL INDUSTRY

The announcement the other day of the list of officers for the Radio-Victor Corporation of America, just formed to handle the sales and distribution of the products of the Radio Corporation and the Victor Talking Machine Company, shows a preponderance of youthful officials in this company which combines the interests of two of the biggest and youngest industries.

David Sarnoff, executive vice-president of the Radio Corporation, who is chairman of the Board of Radio-Victor, is 38 years old. Incidentally, he climbed to his present high position from a start as a messenger boy. An average of well under middle age is maintained by the other officials: J. L. Ray, President; I. E. Lambert, Vice-President and General Counsel; A. E. Roach, Vice-President in charge of Production, Service and Traffic; H. C. Grubbs, Vice-President of the Victor Talking Machine Division; Quinton Adams, Vice-President of the Engineering Products Division; Meade Brunet, Vice-President of the Radiotron Division; E. A. Nicholas, Vice-President of the Radiola Division; E. C. Grimley, Treasurer and Comptroller, and Francis S. Kane, Secretary.

When it's job printing you need, anything from a card to a book, we are at your service.

NEGLIGENT DOG OWNERS WILL BE PROSECUTED

Two hundred thousand unlicensed dogs roamed the streets and fields of Pennsylvania before the present State Dog Law was enacted eight years ago, according to the Pennsylvania Department of Agriculture. These roving dogs killed or maimed thousands of domestic animals and poultry. The sheep industry had been practically wiped from many sections. Wild game depredations by dogs exceeded all illegal killing. Mad dogs were a serious menace to human life.

Today the number of unlicensed dogs is very small compared to the number licensed and each day the number is being reduced. Sixteen thousand, two hundred and sixty-five, worthless dogs were disposed of last year and 9,906 during the first six months this year. Almost 450,000 dogs are now licensed, 15,000 more than for the corresponding time last year, and only 40,000 less than for all of 1928.

Splendid co-operation by many cities and boroughs, persistent and thorough effort by the dog law enforcement agents of the Bureau of Animal Industry, and prompt action by most dog owners have brought action by far-reaching benefits to Pennsylvania. The sheep industry is coming back. Damages caused by uncontrolled dogs are decreasing. Last year damages paid amounted to \$71,336, compared to \$210,774 in New York state which has about the same number of sheep as Pennsylvania. The mad dog menace is being lessened. Good dogs are enjoying a better standing in the community.

Thus, the real purpose of the dog law which is to protect property, human life, livestock, poultry, and good dogs from the ravages of the worthless, uncontrolled dog, is being accomplished.

WHO WILL BE THE GOAT?

The stage is being set in San Francisco for a big municipal ownership campaign for the city to acquire the private street railway. All the changes will be rung to create feeling against the private company in the endeavor to get the people to put up the millions necessary to acquire the line. What a joke it would be if the private company, instead of opposing the movement, would simply say:

"Gentlemen, we refuse to be the goat. This is not our battle. It is the people's battle. If the city wants the line it can get it by paying us a price arrived at as the law and the courts provide. Let the responsibility for establishing municipal ownership rest on the proponents of the proposition without opposition from us, for in the last analysis it is the people who are stricted when government goes in having their rights and liberties retro competition with its private citizens. It is the people who will put up the bond money, it is the people who will make up the losses in the taxes due to tax-exempt municipal enterprises, and it is the people who will hold the sack for any mistakes made by political management.

"If the people think that city officials can run the line better than private owners, that is their affair. If the voters wish to put up millions to buy the line and lose other millions in taxes which we now pay but which a municipal line would not, that is also their business.

"If citizens think they can get cheaper fares merely by the process of municipal ownership, that is again their business although it is self-evident that a municipal dollar will go no further than a private dollar in purchasing labor and material.

FOLLOWING RAILROAD SAFETY PRACTICES

Automobile builders are adopting all-steel bodies for reliability and safety. Recently Fraulein Stimes, daughter of the great German financier, took a 50,000-mile motor trip through 27 countries. Twelve thousand miles were over roadless country; in some instances blasting was necessary to get through. Temperatures varied from 120 degrees below zero in Siberia to the intense heat over rocks, up almost impassable mountains, in snow and sand.

The specially constructed all-steel bodies survived the journey without damage. It was one of the most rigid tests of automobile construction ever made.

While the ordinary driver experiences no such difficulties, the all-steel body is of equal importance to him as a safeguard in collisions and accidents.

Truly a Great Improvement

Now Women Wash Either Way

with New **AutoMatic Washer** **DOO-DISC**

WASHES A FEW PIECES OR A TUBFUL

Only \$99.50

Pay \$9.50 down and we'll deliver this most modern of all washers to your home — then \$2.50 weekly conveniently pays the balance

THIS OFFER FOR A SHORT TIME ONLY

Now - for the first time, you secure the two most efficient washing principles in one washer - an overhead agitator for full washings and the heavier and more bulky pieces and which when reversed, may, if you prefer, be used as an underneath or submerged agitator for washing a few pieces, or a tubful.
