

FOR THE CAR YOU DRIVE TODAY

Mobilgas

THE NEWEST GASOLINE

By the makers of Mobiloil

...modernized by Vacuum's Process

YOU'VE seen cars change in the last five years. You've seen tires fatten, brakes grow on all four wheels, motometers move from the radiator to the dash.

But right under your very toes motors have been changing too. You wanted them peppier. They are. You wanted them nimbler. They are. The work gasoline has to do now is different. Fuel requirements have changed.

That's why we made Mobilgas and modernized it by Vacuum's Process of distillation so that it would be up to its different job.

We introduced Mobilgas just a few short months ago. It has caught the public fancy as a better fuel would.

Switch to Mobilgas for just one week and prove to yourself just how good it is. It doesn't cost a penny more.

EDUCATING THE MOTORING PUBLIC

VALUABLE INFORMATION FOR MOTORISTS FURNISHED THE BULLETIN BY LANCASTER AUTOMOBILE CLUB

Elaborate plans are being made by the Lancaster Automobile Club for its series of Spring and Summer monthly meetings to be held in various parts of the county. The first will be at Lititz on Friday evening, April 18, when, in addition to the regular business session, a concert will be given by the Boys Band of the Lititz High School.

This band, under the direction of Professor Demmy, of Lititz, is one of the outstanding school musical organizations in the county. It is comprised of more than fifty youthful musicians and the program arranged for the Auto Club meeting is one that will please every taste.

A number of matters of interest not only to members of the Club, but to all motorists and to the county in general will be discussed at this meeting. All who are interested in motoring and motor affairs, whether member of the Club or not, are invited to attend. Paul H. Bomberger, who represents Lititz and vicinity on the board of directors of the Auto Club, is in charge of arrangements for the meeting, which will be held in the spacious school auditorium. Ample parking space will be available.

Meetings of the Auto Club are countywide in scope and those held in the various towns during the Spring, Summer and early Fall are not confined in attendance to people from that immediate vicinity. Many travel from distant parts of the county to be present at the meetings, participate in the discussions and enjoy the entertainment that is provided.

Keystone Automobile Club A total of 900,495, 620 gallons of gasoline was used by motor vehicles in Pennsylvania last year, producing a tax revenue to the State of \$33,280,629.08, according to figures compiled by William S. Canning, Engineering Director of the Keystone Automobile Club. Combined with \$29,160,600 from registrations and operators licenses the total received from Pennsylvania motorists was \$62,441,319.08. "The average cost per vehicle, for registration and gasoline levy," said Mr. Canning, "was \$35.19, of which \$18.77 was the tax paid on an average of 507 gallons of gas per vehicle. It is interesting to compare this with the figures for New Jersey, where the total for registration and gasoline tax was \$29.82, of which \$12.04 was paid on an average of 602 gallons of gasoline per vehicle.

"Average registration fee per vehicle in this State was \$16.42, compared with \$17.78 in New Jersey, which received \$14,803,015.62 from that source in 1929. Pennsylvania's total registration for the year was 1,774,923 motor vehicles, compared with New Jersey's total of 831,514 vehicles.

"In the first six months of the year, when the Pennsylvania gas tax was three cents per gallon, the gas receipts were \$8,217,587.10 on a consumption of 273,919,572 gallons. Indication of the tremendous increase in travel during the summer and fall is given in the record of gas consumption in the last six months of 1929. A total of 628,576,048 gallons was used, producing at the tax rate of four cents a gallon a revenue of \$25,063,041.92.

"New Jersey, with a total consumption of 499,800,706 gallons, collected \$9,996,014.13 on the basis of a two cent tax."

Harden Plants before Setting Plants from the greenhouse or hotbed should be sufficiently hardened before being set in the field by gradually lowering the temperature and reducing the amount of water supplied. Cabbage plants will have a reddish tinge when they are hardened sufficiently to be transplanted into the field.

Cull Out Poor Cows Dairy leaders say that if each farmer who makes his living from milking cows would sell just one unprofitable cow to the butcher the problem of the dairy industry would be solved. Another way is to fatten the cow for slaughter on the farm.

what animal was most noted for its fur. The fellow said: "De skunk; de more fur you gits away from him de better it is fur you."

They tell me that Bill Miller, here in town, was actually lost up at Florin the other day. Of course, Art Garber says that could very easily happen—Florin's a good sized town.

Anybody wants to hear some real good fishing stories, Messrs. Ream, Garber, Mumper, Mumma, etc. have a lot of new ones on tap since they returned from camp Ream.

I know one thing—George Mumper told me that if we always got what was coming to us, some of us would certainly have to take a lot of punishment.

I wouldn't have cared so much about that remark but he looked right at me when he said it.

To me it had the earmarks of a dirty crack. A WISE OWL

Like many other things, matters even change around one's home nowadays. A man told me that when he reaches the age where he likes to stay at home his children begin to crowd him out.

An industry at Lancaster advertised for a foreman. Here's the ad.

Man wanted — Experienced in handling girls; must do heavy lifting.

Met a fellow coming down Main street yesterday and walking so peculiar. I asked him what was wrong and he said his wife made the shirt he is wearing and he must walk that way to fit it.

Believe me he's lucky. I know plenty of women haven't even time to sew buttons on shirts, much less make the shirts.

A good one just leaked out recently. A certain lady here who keeps boarders has this sign on the bath tub.

PLEASE CLEAN TUB AFTER BATHING LANDLADY

But then that isn't any worse than the heading in a newspaper just several days ago. It read:

BOOTLEGGERS IN JAIL EAT COUNTY POOR

A lady on Marietta street was about to whip her little son for something he had done when the boy said: "Mother you may'n't whip me. Didn't Doctor Snyder say you weren't to take vident exercise."

Little Mary, who had fallen ill, begged for a kitten.

It was found that an operation was necessary for the child's cure, and that she must go to the hospital. Her mother promised that if she were very brave she should have the very finest kitten to be found.

As Mary was recovering from the influence of the anesthetic, the nurse heard her muttering:

It's a rotten way to get a kitten."

They tell this one on Charlie Bennett, the East Main street butcher. On a recent visit to the Zoo at Philadelphia he told one of the fellows with him that the only difference between a rhinoceros and a hippopotamus was that one had a radiator cap and the other hadn't.

You'd scarcely believe it but a lady here thought you could buy chains for your auto at any chain store.

If some fellow wants to make some easy money he should get the checking concessions for hats in the political ring in Lancaster county.

Here's a little poetry written by our office devil: Half an inch, half an inch, half an inch shorter; The skirts are the same of mother and daughter. When the wind blows each one of them shows Half an inch, half an inch more than she oughter.

Not to be outdone by this young chap about the office, one of the older fellows wrote this one: Mary has a little skirt, So neat, so bright, so airy; It never shows a speck of dirt, But it surely does show Mary.

At last we have a way to nail the many lies so frequently told by fishermen. A man in Texas invented a device which one attaches to a fishing rod and when you pull out a fish it immediately registers its weight. By this new method fishermen can always tell the exact weight of the big ones they catch which get away. Can't lie about the big ones after that. But fishermen are so accustomed to telling yarns that it will take more than such a device to stop them.

Some time ago a man here took his little son along to Philadelphia. When they returned home the boy's mother asked him what kind of a show his father took him to.

The boy said: "Don't know, mother but we seen a lot of ladies, with stockings on up to their necks."

Believe me he had that boy somewhere outside of movies. I asked him about it and he said he thought they had movies at the "Troc."

Jack Miller asked one of our local colored fellows if he knew

LIFE'S RAINY DAYS ARE SURE TO COME

You know how it is: if you carry your umbrella, the sun is sure to shine; but you unprepared and you are just as sure to get a drenching. So it is with life; the man who makes provision for the morrow, never seems to get in difficulties, and YOU call him lucky. But this is not luck, for his forethought has made it impossible to be caught unawares, and what would be a misfortune for you is but an incident to him.
