## PRODUCE & LIVE STOCK MARKET

CORRECT INFORMATION FURNISHED WEEKLY BY THE PENNA. BUREAU OF MARKETS FOR THE BULLETIN

The demand for apples on the wholesale markets was very light this morning and the market was extremely dull. There has been a fair demand for fancy stock until a few days ago but today the demand for any kind of apples was very light. Most stock in 5-8 baskets sold at 40c-65c with a few exceptional lots of Grimes selling higher while poorer stock sold at 20-35c. Bushels sold at mostly \$1-1.25, with extra fancy Stayman and Delicious selling as high as \$1.50 while poorer stock sold at 50-75c according to the Pennsylvania and U. S. Market News Service.

Cranberries sold at \$2.25-3.75 per quarter barrel crate. Anise sold at 40-65c per bushel. Beets were in light supply and brought 3c-5c per bunch while carrots were in liberal supply and sold at 1 1/2-2c. Brussel Sprouts were in moderate supply and brought 10-20c per quart. New Jersey Italian green sprouting broccoli sold at \$1.50-2.50 per bushel.

Cabbage was dull and nearby 5-8 brought 25-40c. Escarole sold slow baskets sold at 20-35c while savoy at 25-40c per bushel while kale was firm and brought 40-60c. Most lettuce was of ordinary quality and sold at 25c-75c per crate. Mushrooms met a good demand and Pennsylvania 3 lb. baskets white sold at \$5-\$10.00, a few higher, but buttons 60-75c, spots and opens 50-75c.

Parsley was in light supply and curly sold at \$1.50-2.00 per bushel while root parsley brought \$1.00. Parsnips sold slowly at 75-85c per bushel. Spinach was in light supply and most good stock sold around 75c per bushel with some extra fancy selling as high as 90c and poorer stock sold at 25-50c. The demand for turnips was slow and 5-8 baskets white sold at 25c.

Sweet potatoes met a very slow demand and New Jersey 5-8 baskets No. 1 reds and yellows sold at 40-85c while No. 2s brought 30-40c. The demand for potatoes was slow and Pennsylvania 100 lb. round whites brought mostly \$1.75-1.90, fancy \$2.00, poorly graded 1.50-1.65, while No. 2 stock sold at \$1-1.10.

Market: Beef steers and yearlings closing about steady with week's 25c to 50c advance, numerous sales heavies \$9.50, top yearlings \$9.00, bulk of sales \$7.75-8.50. Bulls, she stock and cutters practically unchanged, bulk fat heifers \$6.50-7.25; beef bulls \$5.75-8.50, butcher cows \$5.00-5.75, cutters \$2.75-3.50. Stockers and feeders fairly active on country account, stronger undertone at close, \$8.25-8.50 paid freely for medium and heavy kinds, bulk light stockers \$6.75-7.50. Calves steady at week's 25c to 50c decline, top vealers \$13. Hogs: 25c to 50c lower for week, top 180-230 pound weights \$10.50.

Receipts: For today's market, cattle 13 cars, 6 Chicago; 3 Va.; 2 St. Paul; 1 St. Louis; 1 Md.; containing 365 head, 69 head trucked in, total cattle 434 head, 82 calves, 684 hogs, 218 sheep. Receipts for week ending November 8, 1930, cattle 216 cars, 95 Va.; 43 St. Paul; 14 Chicago; 12 W. Va.; 11 Tenn.; 11 North Carolina; 7 St. Louis; 5 Md.; 4 Penna.; 4 Pittsburg 4 Mich.; 1 Kansas City; 1 Buffalo 1 Kentucky; 1 Indiana; 1 Ohio; 1 New York; containing 6840 head, 391 trucked in, total cattle 6231 head, 725 calves, 2337 hogs, 615 sheep. Receipts for corresponding week last year, cattle 239 cars, 64 Canada; 59 Virginia; 58 St. Paul; 20 Chicago; 8 Maryland; 7 W. Va.; 7 Tenn.; 3 Pittsburg; 3 Mich.; 2 Penna.; 2 Buffalo; 2 Ohio; 2 New York; 1 St. Louis; 1 Indiana; containing 7125 head, 191 head trucked in from nearby, total cattle 7-316 head, 411 calves, 2736 hogs,

### Boosts Golfer Toward Coveted "Hole in One"

In the history of the world it is not likely that any game or pastime has been given quite so much serious attention as the game of golf. Half of the men and women who have played golf seem to have invented some sort of a gadget to improve the possibility of making a perfect score and if all the inventions of this character were placed end to end they would probably reach to some place or other and back again several times. An enthusiastic Englishman points with pride to a device which he has invented to enable the player to determine whether he and his club are in exactly the proper position before attempting to bang the ball. He has a small stand containing an electric light operated by a dry battery and this is placed with great care upon the ground. In the head of his club he has a mirror inserted and when he takes up his position in front of the ball and holds his club in exactly correct angle, the light from the lamp will be reflected through the mirror to the eye of the player. Then, if the wind is just right and no one sneezes just as the play is about to be made, the player may make a hole in one, or he certainly will have the excuse that he tried.

### Butter and Cheese Not the Only Milk Products

Though you might not think it, the back collar button you are wearing, and quite likely your shirt buttons, were provided by a cow which is still placidly chewing the cud in some green field. Things are not what they seem, for "bone" studs, "bone" buttons, "ivory" combs and brushes and all kinds of small hard white fittings have often nothing to do with either bone or ivory.

They begin their existence as nothing more solid than milk. At certain times of the year more milk is produced on the farms than can be sold for drinking purposes or made into butter and cheese. But there are factories ready to take any surplus. Milk contains a substance known as casein, which can be separated from it by chemical processes. By pressing all moisture out of casein and treating it in various ingenious ways, a hard white solid is produced which can be molded readily into any desired shape and has excellent wearing properties.

### Slavery

The first slaves were prisoners of war. When an army was defeated, such of the defeated men as surrendered belonged to the conqueror by right of conquest, and so also did the women and children, and the entire wealth of the subdued region. From this custom arose the maxim, "To the victor belongs the spoils." So slavery dates from the first battle after which man awoke to the fact that he gained nothing by putting those he had conquered to the sword, but might gain by making use of their services as slaves. So far as we know slavery began in the East, not in Africa. The first colored persons brought to America, or rather to the West Indies, were brought in October, 1592, by John Hawkins. These were either bought or forcibly seized and transported. There were 300 in the first shipment and at that time three ships were employed in the trade.—Literary Digest.

### Treachery's Reward

One of the early legends of Rome describes the treachery of Tarpela, daughter of one of the Roman leaders, says an article in a Boston paper. Tempted by the glitter of the bracelets which the Sabines wore on their left arms, she offered to betray the citadel if they would make her gifts of these. Willing to profit by her perfidy but hating her because of her treachery, the Sabines kept literally to their promise to give her what they wore on their left arms as she opened the gates. They threw their heavy shields upon her and crushed her to death.

### 12 Noon and 12 Midnight

Twelve o'clock noon is almost universally written 12 m., the m. being the abbreviation of meridian, the accusative of the Latin meridies, which means midday. The proper designation of midnight is 12 p. m. But it is often seen written 12 n., for noon, and 12 m., for midnight. These abbreviations are confusing and should not be used. To avoid confusion, the abbreviations should be dispensed with and the designation written 12 noon and 12 midnight.

### No Matter

A friend of Betty's mother was visiting them one week end and she and Betty became fast friends. One evening, on attempting to raise a window shade in her room, the friend tore the blind completely in two. Betty, noticing her dismay, remarked comfortingly: "Don't worry about that, Alice, we're going to move soon anyway."

### Courtesy Imperative

Courtesy is an asset that is absolutely essential in business. Remember, "the customer is always right." The chances are that the customer is wrong and that you are right, but this never excuses impoliteness on your part.—Grit.

Gluten	41.00-42.00 ton

### HOME HEALTH CLUB

WEEKLY LETTER WRITTEN EXPRESSLY FOR THE BULLETIN BY DR. DAVID H. REEDER

Frost Bites: Perhaps a bit early in the season for some parts of the country and yet this article should be timely warning that prevention is far and always better than cure. A few years ago while in the north I was compelled to walk about two miles when the wind was blowing fiercely from the north and the thermometer stood at 20 degrees below zero.

I was not prepared for such weather but a physician must go and there was no way but to walk. My nose, right cheek and right ear were frozen white. Before going into a warm house I stopped in a shed and rubbed the frozen parts with snow. As soon as the frost was out I went in and rubbed an ointment called Plantiodide which prevents inflammation and swelling. I had no further trouble or after effects and I used the application only three times.

That was prompt prevention. What is termed "frost bites" or chilblains by medical men is really a form of inflammation of the skin and deeper parts produced by long exposure to cold and having a tendency to terminate in gangrene. The toes and neighboring parts of the lower extremities, the fingers, ears, and nose are most frequently affected. Anemic or thin blooded persons and those debilitated from insufficient nourishment or fatigue are most liable to suffer than are strong healthy well nourished people. The first stage or process of frost bite is a transient redness, accompanied by hyperaesthesia and tingling. A sort of purple lividity follows and the sensitiveness to pain diminishes. Following this rapidly is the blanching or whitening without feeling or absolute insensibility of feeling. Coagulation has then taken place, the whitening surface is frozen hard. If the process is very severe dry gangrene is soon established and the parts shrink up and blacken. An inflammatory line of demarcation shows later. Several excellent remedies for the successful home treatment and cure of chilblains have been given in the club notes of this department but as there are many sufferers who have not had access to them I will describe the best methods that have been used by the Home Health Club people.

One letter came in this morning which follows: "I send you this receipt that I have never known to fail to cure chilblains. I was a sufferer from chilblains myself so thought I would send it, hoping it may do some good. One ounce laudanum, one ounce salomonia, one half ounce distilled soft water. Rub this on parts affected."

Another, from Memphis says "I note a request for a remedy for chilblains and I know this is sure as I have seen it cure where there were festering sores. Take a lump of alum about the size of the fist, dissolve in a vessel to keep until the case is cured. Every night and morning heat, and hold the feet in it fifteen minutes with water enough to come to the ankles. It is surprising how it will cure the worst case."

A third from a good doctor tells of a simple and inexpensive method which is easily applied. It is as follows: "Wait until the frost has killed the leaves on the little scrub oak and the leaves are dry. Then gather three gallons of these leaves taking those that are hanging on the bushes put them in three gallons of water, and boil half an hour. Strain off the water and as it is cool enough not to scald, put the feet in the tea and let them remain until the tea is nearly cold then wipe the feet dry and retire. Repeat this same treatment the next morning and the frost bites will not again trouble you."

All readers of this publication are at liberty at all times to write for information pertaining to the subject of health. Address Dr. David H. Reeder, 3 E. 31st St., Kansas City Mo., with at least 6 cents postage.

Arthur Brisbane, one of the best minds of the time, says: "H. Z. Mitchell's 'Sentinel,' published at Bermidjii, Minn., wins the prize as best weekly in the National Editorial Contest. This is a good time to remind the public in general, and national advertisers in particular, that country weekly newspapers are the most important organs of public opinion and protectors of public welfare.

"And, their advertising per mill line, is not excelled by any publication, of any kind.

"The reader of a country weekly buys everything from shingles on the roof to cement in the cellar floor, and every advertiser has in him a possible customer."

London's Finest Sculpture  
Many are of the opinion that the finest piece of sculpture in all of London's great collection is the Quadriga at Hyde Park corner. This statuary is more admired and commented upon by discerning visitors than any other similar monument in the English metropolis. The group which was erected in 1911 is the largest in England and the existing weighs 38 tons. Each of the four horses, which are twice life size, weighs six tons and the winged figure of Peace, which tops the group, is 14 feet in height.

Identified  
"A man is easy to read," said Roberts to nobody in particular as he and a few of his friends lounged in the window of the club one evening. Just then a street car stopped in front of the window and Perkins and his wife and sister got off.

Why Some Stay Single  
"Mary," reproved the lady of the house, "you did not come in last night, although I let you have the latch key for the purpose. I don't like that."

"I know, madam, but the key wouldn't fit and so I had to go to my cousin's."  
"It didn't fit? Why, I must have given you the one I usually let my husband have so that he will have to wake me when he comes in."
