ADVERTISING

Advertising and not competition is now the life of trade, according to the advertising experts who met to attend the International Advertising Association convention. The delegates at this meeting heard a number of interesting things. Among these was the statement by Charles Stelzle, New York expert, to the effect that if churches do not advertise their "wares"—spiritual upbuilding and moral betterment for both the individual and humanity—they cannot hope to arouse interest among the masses and fulfill the obligations placed upon them as parties to the general spiritual movement.

Advertising is no longer a theory. It is a science. And it pays.
