## JUNIOR-SENIOR DINNER

ment, the swankiest decorations be letters to ten senior boys they cup lemon juice. Sweeten to and the most breath-taking ban-will be most interesting. quet ever planned by aspiring Juniors to impress lordly Seniors.

with masculine as well as feminine mannikins—if it is to be a co-ed affair. The glee-club star tenor might croon a song written by the class composer with humorous verses apropos of the fashion whim of each member of the Senior class, while the junior member, impersonating that senior, parades across the stage, Be sure to burlesque the girl whose halo hat is worn so far back that it appears to be off-the-cough to do noor to the class of salmon, leaving it with these colors, and trays also painted with these colors, and trays also painted with these colors, will make most attractive waitresses. If the class treasury has undergone a period of depression, and if the class boasts talented cooks, they may prepare as well as serve, the banquet. The following menu is simple enough to do honor to the class of salmon with Russian Mask: Remove skin from four Mask: Remove skin from four Mask: Remove skin from four Most. 1 cans of salmon, leaving it whose halo hat is worn so far back that it appears to be off-the-head as well as "off-the-face" and the chap whose handkerchief-tie-and-hose color-scheme runs

Some Entertaining "Stunts" Let each department give to own stunt. For example, the history department might do some research into the "past" of the individual seniors, presenting a enlightening survey of four scho astic years. In similar vein, the science department might delve into the future and evolve a class prophecy.

#### China's Right to Title

of "Mother of Gardens" The late Ernest H. Wilson, who was undoubtedly the world's foremost authority on plant introductions from China and keeper of the Arnold arboretum of Harvard university, remarks that "China is, indeed, the Mother of Gardens, for of the countries to which our gardens are the most deeply indebted she holds the foremost place."

There is hardly a garden in this country or Europe that is not indebted to China for the plants that embellish it. The forsythia, the Yulan magnolias, the peonies, the parents of our modern roses, be they hybrid tea, rambler or palyantha; many of the azaleas and primroses, peaches, oranges, lemons and grapefruit have been brought to us from China.

The Portuguese reached China in 1516 and took back with them to their settlements in India the sweet orange, which was later introduced into Portugal. Mr. Wilson says that, so far as he has been able to discover, this was the first plant taken to Europe. From that time to the present era there has been a constant flow of new plant introductions from the East to Europe and America.-New York Herald Tribune.

#### "Latah" Sufferers Made

Victims of Odd Pranks An extraordinary disease called latah is prevalent in the Malay states. a contributor informs the Sydney Bulletin. To anyone who has never seen latah before, the gesticulations of the sufferers appear at first funny or offensive, until it is explained that a person afflicted with it will, if suddenly startled, fall into a hypnotic state and imitate the gesture of anything | bicycle home." in sight. For instance, an old woman suddenly startled by a bicycle bell will violently imitate the pedaling of a cy-

clist until she falls down exhausted. That the victims make these movents entirely against their will is evident when one considers the pranks that are played on well-known latahs. er in shark-infested waters, drop | hour

American Cliff Dwellers

Cliff dwellers, although of broade application, means in America that count, pa." toric race that built the houses and villages whose ruins are found in the southwestern part of the United States and especially in the valley of you how much a Russian ruble is the Rio San Juan and its tributaries. worth?" This river rises in the extreme south western corner of Colorado, and flows westward along the borders of adjoining states to a junction with the Rio Colorado. As to the origin of these known, but it is evident that centuries ago these valleys were occupied by a considerable, sedentary population, who had fixed homes and cultivated fields for crops of corn, beans, gourds and probably other things, by means of extensive systems of irrgation. They made pottery, cloth, basnothing metallic.

Origin of Word "Dogma"

Contrary to common belief, "dogma nor is it connected with "doctrine." "Doctrine" comes from the Latin "docere," "to teach"; "dogma" from the Greek "dokein," "to seem," whose nearest relation in Latin is "decet," "It is seemly," the ancestor of our "decent." "Dogma" at first therefore meant "that which seems to one," or "an opinion." But when the early Christian councils met to discuss the essentials of the faith, what they sought were the "opinions" held in common by all orthodox bishops. These were called "dogmas"; but since they represented the agreement of so weighty a concourse, the word soon acquired the sense of authoritative

Fortune in Croquet Box A manuscript worth hundreds of

dollars a page was found in the lumber room of an English castle.

One summer's day the guests of Lord Talbot de Malahide decided to play croquet and sent servants to fetch the mallets and hoops from their box in an old lumber room. The servants opened a box and, instead of mallets, found a mass of musty crumbling papers yellow with age.

These proved to be the manuscript writings of James Boswell, the greatgreat-grandfather of Lord Talbot, and among them were 107 pages of his famous Life of Johnson. Only 16 pages of this manuscript had been found be fore, and their owner was offered \$75,-

Score One for Henry VIII

A lady's position in the Fifteenth century wasn't particularly an agreeable one considering the fact that she sat in the balcony merely as a spectator at the royal feasts which her lord gave. Henry VIII, however, was a considerate old fellow, and allowed the fair sex to enjoy the elegant food. His queen, Catherine, presided at the head of one table, and he at another. The party being assembled, and the king and queen seated in their chairs of state, it was the custom to begin the ceremonial of royal banquets by presenting hippocras and wafers to the sovereign and his consort."neas City Star.

Grow Profitable Lambs

Wether lambs that have been docked sell for highest market prices than do undocked ram lambs. It is good business to follow the practice which is most profitable.

Mr. Reinhold, a farmer and butcher of near Mt. Pleasant church, will open a meat market at Elizabethtown Sat-

> Two drunks in an argument in the park Decoration Day evening. One insisted that it was farther from here to Philadelphia than it was to the moon because you could see the moon and not the City of Brotherly

Two men were talking on a boat. "You can tell a girl's character," the first man said, "by her clothes." "Oh, no, George," said the other man. "Oh, dear, no. Girls have more character than that."

Two little boys were talking. One said to the other: "Aren't ants funny little things? They work and work, and never play?" "Oh. I don't know about that," re-

plied the other. "Everytime I go on a picnic they are there."

One on Dad Two modern little girls, on their way home from Sunday School, were solemnly discussing the lesson. "Do you believe in the Devil?" asked one. "No," said the other promptly. "It's like Santa Claus; it's your

I just discovered one that happen. ed to a fellow from town recently. He was operated on at a Lancaster Hospital and just before the operation he asked the surgeon to see his operator's license.

Here's a fishing story just a little too good to let go unoticed. Recently Paul Stoner, Cappy Mumma and Clyde Mays went over to the river fishing. They got there long before daylight, baited their lines and threw them in. Not a single bite and when daylight broke they discovered their lines laying on dry land. They had not thrown in far enough.

Since we're telling fishing stories, this one may not be out of tune. A. Hobgood, member of the Kinston Nature Society, Kinston, N. C., fishing for pickerel and caught a found. twenty-four pound fish, dressing it, he discovered a two-pound chub inturn. It contained a perch weighing running." half a pound. Inside the perch was the minnow used for bait.

The fellows were all attention down at the Grey Iron when Stoner told their experience and Cappy Mumma climaxed it with this one. He said one time while on his way to Drytown he stopped on the cov- Grey Iron can tell a better one. ered bridge near the printer's sum-

Camels Find Refuge in

Swampy Spanish Plain Spam may pass through troublous rimes but there is one community in that country which is not likely to be disturbed whatever happens. This is the strange colony of wild camels which have made a home for them-selves in the lower reaches of the adalquivir river. Many years ago an attempt was made to introducamels for agricultural work in southern Spain. The plan was not a sucess, and those camels which did not die strayed off to fend for themselve A few of them found a retreat in the vast alluvial plain through which the sluggish stream of the river winds its way to the Gulf of Cadiz.

One could hardly imagine a situa tion more unlike that to which a camel normally is accustomed. The land is largely water-logged and covered with a dense growth of reeds and rushes many feet in height. From the human point of view, the district is extreme ly unhealthy, although animal life flourishes.

At the least sign of danger the animals retreat to the swamps, where the ground is so soft that it is impossible for a man to follow. Of course, the broad feet of the camel, which help the creature to walk on loose sand, have also stood it in good stead in these marshes, where a horse or a cow certainly would never be able to travel safely.-Manchester (Eng.) Guardian.

#### Diggers Uncover Grave

of Bronze-Age Chieftain The 4,000-year-old grave of a Bronze age chieftain is among the many interesting relics discovered in the course of digging pits for brick works at Schleinbach, near Vienna. Twenty one different caches, graves and liv ng caves from the Second century B. C., have been laid bare. The chief tain's grave has been reconstructed a it was first discovered and placed o exhibition in the Lower Austrian mu seum in Vienna. It contains two skele tons lying face upwards, stretched out close together, in contrast to the skele tons of ordinary tribesmen found i 11 other graves. These were placed drawn up and bound in chains weight second body in the grave was doubt less that of the chief's wife, believe to have been buried alive.

Penguins Prefer Ice

When eight penguins arrived recently in Europe to be transferred to a Continental zoo, they caused great trouble because they found the climate too warm. The penguin, whose home is in the Antarctic, loves cold weather and officials tried to devise a means of keeping them cool. All plans failed until a big "ice box" was built for them, and a "house" of heavy planks, with a roof of heat-resisting tar paper, was erected in the box. Each day, 500 pounds of ice, cut in layers, was spread on the floor, and then the birds were quite happy. They slept on the ice-standing up, as is their way! Shrubs and greens surround the "house," and there was a lake where the birds could satisfy their natural

Quaint Rental Payment

for English Freeholds The ancient ceremony of rendering quit-rent services by the city of London took place before the king's remembrancer, Sir G. A. Bonner, at the Law Courts building recently. One of the services is in respect of a piece of land-the location of which cannot today be identified - called "The Moors," near Bridgnorth, Shropshire. The other is by "the tenants and occupiers of a tenement called "The Forge,"-on a piece of land once used by the Knights Templar for their tournaments and now covered by the Law Courts building. The ceremony dates back more than 700 years, when rents were paid in kind instead of in cash. The city solicitor rendered ser vice in respect of "The Moors" by cutting two small bundles of faggots with a hatchet and a bill-hook. Thereafter, he counted out, one by one, six horse shoes and 61 nails in respect of "The
