Double-Thumbed People

in Old Spanish Village A strange village, Palazuelos, ha

The strangeness of this hamlet lies in the fact that most of its people have six-fingered hands, two thumbs on each one. Few of the villagers ever have reached the outside world because the mountain trails are impass able to wheeled vehicles. So the world knew nothing about them until recently. Intermarriage caused by extreme isolation is believed by some anthropologists to be the cause of the double thumbs. Other scientists call attention to the fact that since most of the men work in stone quarries and have done so for generations their labor has tended to broaden their thumbs until finally Mother Nature

produced an extra member. The villagers do not regard their double thumbs as a deformity but consider them a mark of distinction. While a comparatively simple operation would remove the extra thumb of any child and give it a normal hand,

Scarlet From Persia

"Few of us know that we owe our most vivid hue-scarlet-to Persia," says a writer in the Manchester (Eng land) Guardian. "Scarlet is the Persian 'saqalat,' and is believed to have been applied to have been applied first of all to cloth of that color imported into Europe from Persia. Easterners knew how to produce scarlet some 2. 000 years ago, obviously, or we should not have had the Biblical phrase Though your sins be as scarlet, they shall be as white as snow.'

"In the East Christ once was regarded as the patron of dyers, even by followers of Mohammed, and the Persians, who were skilled textile colorists centuries before Manchester came into being, knew a dye-house as 'Christ's workshop' as late as the Seventeenth century."

"Catch" Problem The "banker's problem," the one

that leaves a dollar in the bank after one has made several withdrawals and has finally taken out the deposit, is somewhat after this style: "A person deposits \$50, then makes a withdrawal of \$20, leaving a balance of \$30; a withdrawal of \$15, leaving a balance of \$15; a withdrawal \$9, leaving a balance of \$6, and finally a withdrawal of \$6, leaving no balance. Total of these balances is \$51, which is \$1 more than was deposited." The answer to this is that there is no reason why the total of balances should equal the total deposits, but the final balance plus the total of withdrawals must equal the total deposits.

"Cloth-Yard" Shafts

The Archers company of Pinehurst N. C., says that toxophilites for many years have accepted 28 inches as being the length of the cloth-yard shaft. El mer's "Archery" says: "Arrows for men are standardized, and have been for time out of mind, at 28 inches. That is the real length of the 'clothyard shaft' of the old English ballads because the Flemish weaves brought over the continental cloth-yard of 27 inches, and it was so called to dis tinguish it from the standard yard of 36 inches which survives today. With the inch-long pile added to it the clothyard shaft thus became a 28-inch."
