## PENNSYLVANIA DUTCH

What Shwilkey Bumblebeek Has To Say This Week

De Polly wore amoh en boomer awilsh shac maidel. St hut sex lawyer un finf ducter der hensching gevva far mich. Far awhile noch dem dos mere ghired wora worch ich gaver considered der glicklished mon on Barrick awer ich het gli gapn my glick farhondled uff en shaner hoond, un derno der hoond ghussa. Mere nen nonner net recht farshta kenna. Se hut an gooter barn g'hot fam shtapt un ich wore net weit ob won on's fecht gonga is. Es is uns en koo farrecked. Se hut g'sawt se het der wolf on schwontz g'hot un ich hob g'sawt se het hola harner. Mere hen g'shritta far en gonge woch der waega. Derno hut se de tzooker bowl ferbrucha un ich hob awenich g'shul-ta. Don hut se g'sawt ich ware mean un geitzlich, un mere ren en gonge wier net tsu nonner g'schwetzed. Ae lawg hen mere en fecht gretked waga em himmel, un so is es fart gonga bis mere agreed hen en shaeda-brief greega un yaklich si agener wake dravela. Ich bin noach of shettile far en lawyer greega far de ardiekle uff shruva, un ich bin net hame cooma bis shpote. Es woreen dunkley nocht un es licht in der kich hut mich aw g'hameled, awer ich wore im shtickel uff tzeega un es wore now ken tzeit g'west far shtuppa. Ich bin ni un doh wore es beest nocht-essa uff em dish os ich in mime laeva g'saena hob. De coffee kon hut g'shmoked uff em uffra; midda uff em dish wore en grosser deller foll ponna koocha g'shonna. Se hut g'w'hit os ich ponna koocha g'tlich. Em lawyer si hob beer wore in mime ruck-sock g'shucka, un wile ich om essa wore hut se es g'watched we en oldte kotz en mouse. We ich fardich wore essa hov ich em lawyer si bobbeer os mime sock una ebbes g'schwetzed un era es g'longed. Se hut awenlich ga laesa, wos se hut kenna, un sell wore net feel-wile ma lawyer si shrives hard tsu laesa is wons amoh kold is -don hut se g'sawt:

"Gottlieb, du husht tere tsu feel gevva. Es house, de koo, de tza wa si, un de helft fun geld. Du husht po nix g'lost far dich selver."  
"Well," hov ich g'sawt, "ich con shoffa far en laeva un de consant net ich hob farshpucha dich tsu enara we ich dich g'hired hob, un ich tsaril wosever os happened mit mere, sell farshpucha will ich holla."

De Polly is uff g'jooped, mich un der hols greeked un mich es arsh mohl g'bussed in edlichia yohra. Ich hob's g'reemest in der uff se g'shmisa un selly nocht hov ich se widder ga-karraseered we in oldta tzeida. Mire hen agreed de koo nawlich de tzooker bowl fergrawva, un so weid os der himmel concerned wore, hen mere os g'mouched un branch establishment uff der ardt shtarda.

Des is der foll mit feel familia in dara weldt. Se doona 'nonner net farshta bis es besht dale fun aram g'hired laeva farlunga is. Wom my experience anich blesser bringt tsu dina laesser don sin se wilcome der tsu.

## 135 Speakers on Farm Show Prog.

(From page 1)  
Nel, President, American Farm Bureau Federation and Charles W. Holman, Secretary, National Milk Producers Federation, Washington, D. C.

Subjects of interest to every Pennsylvania farmer are included in the list of Farm Show events which have been assembled by the Farm Show Commission and will be available in printed form about January 1.

Among the associations holding conventions during Farm Show week are: Pennsylvania Livestock Breeders' Association, Pennsylvania Berkshire Breeders' Association, Pennsylvania Chester White Breeders' Association, Pennsylvania Durco Jersey Breeders' Association, Pennsylvania Poland China Breeders' Association, Pennsylvania Hampshire Swine Breeders' Association, Pennsylvania Sheep Breeders' and Wool Growers' Association, Pennsylvania Dairywomen's Association, Pennsylvania Ayrshire Breeders' Association, Pennsylvania Guernsey Breeders' Association, Pennsylvania Federation of Holstein-Friesian Clubs, Holstein-Friesian Registry Association, Inc., Pennsylvania Jersey Cattle Club, Brown Swiss Cattle Breeders' Association.

Pennsylvania Association of Dairy and Milk Inspectors, Pennsylvania State Beekeepers' Association, Entomological Society of Pennsylvania, Pennsylvania Farm Bureau Federation, former State Board of Agriculture and Institute Lecturers, State Horticultural Association of Pennsylvania, Pennsylvania Vegetable Growers' Association, Pennsylvania Potato Growers' Association, Pennsylvania State Poultry Association, Pennsylvania Tobacco Growers' Association, Society of Farm Women of Pennsylvania, Pennsylvania State Association of Markets, Pennsylvania Threshermen and Farmers' Association and Pennsylvania Farmers' Protective Association.

Most of these meetings will be held in the Farm Show Building. However, a number of luncheons and banquets have been scheduled in downtown hotels and other banquet halls.

Every effort has been made by the program committee in co-operation with officials of the farm organizations, to distribute the meetings throughout the week so that over-lapping of discussions on similar subjects could be largely eliminated.

## Parents Received Health Reports

(From page 1)  
This little blue folder showed that a medical examination had been given the child, by an approved medical practitioner, serving under the State Department of Health, and the results of that examination were being sent home to the parent.

In seventy-two cases out of every hundred, these envelopes reported that the child showed symptoms of some defect, that could be and should be corrected by prompt attention on the part of the home, and the family physician, or dentist. It might be defective vision, or enlarged tonsils; it might be a defect in hearing, or in speech; it might be only "unclean teeth," but whatever it was, it should be corrected and cared for by the parent of the child.

These little blue folders are the direct message to parents concerning the physical condition of their children, as gleaned by the medical examiners of the State Department of Health, and are intended to guide the home in fitting the child for the best possible work in school.

To cast the notice aside without attention, is to fail, in the home side of the co-operative effort to have the child healthy, happy, and unretarded in the daily journey toward adolescence. The blue folder is the friend of the pupil in school. Follow its instructions implicitly for the best results, department officials urge.

## TRIED TO SMUGGLE IRIS TIED AROUND HER WAIST

Smuggling of Iris roots into the United States from Canada, attempted by a woman traveler who had wrapped them in a towel wound around her waist under the outer clothing, caused her great embarrassment when the ruse was detected and she was informed that the confiscated material legally might have been brought in under a permit issued by plant quarantine officials of the United States Department of Agriculture.

A customs inspector observed the apparent inconsistency between the traveler's rather slender build and her corpulent appearance, and search made by a woman officer at the port detected the subterfuge.

Plan the Home Garden  
During 1932 thousands of families again will rely on the home garden to save them money and at the same time provide them with healthful food. Now is the time to plan the 1932 garden on paper in order to purchase seed more efficiently. Arrange for inter-cropping and succession planting in the small garden.

Improve Farm Flocks  
Sixty-six management demonstrations conducted in as many communities under the supervision of the State College extension service during the past year brought to the attention of 150,000 farmers the importance of methods of

low bid of \$16,865 for construction of swimming pool gymnasium basement in Slippery Rock State Teachers College.

Williamsport—Three hotels operated here taken over by American Hotels Corporation of New York.

HOLLAND INSTITUTE OF THERMOLOGY

WINTER USHERS IN SEASON OF COLDS

Two a Year Average Person's Lot as Result of Dry Indoor Air.

TWO times a year are the lot of the average person, and these are usually contracted during the winter heating season, that period when we wrap ourselves indoors. Because of the fact that respiratory diseases become epidemic commencing with the start of the heating season it is the consensus of prominent health authorities, heating and ventilating engineers, and air conditioning experts that the supply of dry air that characterizes most homes and places of work during winter is in a large degree responsible for colds, influenza and other respiratory ailments.

Warmed indoor air is "dry" for the simple reason that winter (cold) air is more dense than warmed air, and contains less moisture than warmed air, according to the Holland Institute of Thermology of Holland, Mich. Winter air of 32 degrees F. has capacity for only one-fourth the amount of moisture that air of a temperature of 70 degrees has; therefore, there is a moisture shortage when the winter air is taken indoors and warmed to 70 degrees. The result is that indoor air is too dry. The warm, dry air quickly dries the mucous membranes in the nose and throat, irritating them, creating of them more active fields for bacteria that cause disease.

Furthermore, dry air is usually germ-laden, dusty air, and more germs reach this active field for infection. The only practical solution of this undesirable condition lies in supplying the indoor air with sufficient moisture to offset the deficiency. This is best accomplished by means of modern warm air heating systems of the vapor type in which a humidifier that recycles its water supply direct from the house main automatically injects into the home air the moisture from 3 to 25 gallons of water per day, according to requirements. An average of six gallons of water per day, or one quart per hour, should be evaporated to offset the moisture deficiency in the average five-room house.

## TAXES ON FARM REAL ESTATE \$19,000,000

Land owners in Pennsylvania paid approximately \$19,000,000 in taxes on farm land and buildings in 1929, according to estimates derived from Federal Census figures by the bureau of statistics and information, Pennsylvania Department of Agriculture.

For the first time in the history of census taking, detailed information on farm real estate taxes was collected by the enumerators two years ago. Satisfactory figures were secured on 118,431 farms operated by full owners. These owners reported the value of their land and buildings at \$72,617,356, upon which a tax of \$12,202,957 was paid. This is an average of \$1.24 per acre and represents 1.68 per cent of the total value of the real estate.

When the leading counties in the production of field crops are compared with the least productive counties, it is found that farmers in the former counties paid approximately \$2.00 per acre in real estate tax, while those in the poorer counties paid approximately 70 cents per acre. However, when placed on a percentage-of-value basis, there is practically no difference.

While farm land owners in Philadelphia and Delaware Counties pay the heaviest tax per acre—\$14.58 and \$6.55 respectively—these payments are the lowest in the Commonwealth when figured on the basis of total value of a property taxed. The percentage of value taken as tax is only one per cent on farm land and buildings in Philadelphia County but almost three per cent in Bradford County.

Match Strawberry Bed  
When the ground has frozen several inches straw can be applied as a mulch to the strawberry bed for best results. The rows should be covered with 5 or 6 inches of wheat straw as soon as the first real cold weather occurs. Two to three ton of straw per acre should be sufficient to give the plants proper insulation against alternate freezing and thawing during the winter.

## FARM YOUTHS RENEW INTEREST IN AGRICULTURE

"One of the most hopeful signs for the future of agriculture in Pennsylvania at this time of economic distress, is the enthusiastic desire of farm boys and girls to learn improved methods of farming and rural home making," says the Pennsylvania Department of Agriculture.

"Seventeen thousand young farm folks, representing all sections of the Commonwealth, are enrolled this year in either 4-H Club work conducted by the Pennsylvania State College, or in rural community vocational schools supervised by the State Department of Public Instruction. The present enrollment represents a 67 per cent increase over that of three years ago. To find this favorable attitude existing among so many farm youths should lend courage to older people who are perhaps more closely confronted with the problems of the day."

"The renewed interest in agricultural life now so noticeable on every hand, gives particular significance to the announcement that 'short courses' will be provided at the Pennsylvania State College of Agriculture this winter. These courses are designed especially for those who do not wish to spend four or even two years in college, but who desire to become familiar with the very latest agricultural information and practices. The courses will open January 4, 1932 and continue to February 26, 1932. An opportunity is thus provided to any one who has an average grammar school education and a desire to learn the newer developments in the science of agriculture."

Hatch Fresh Eggs  
It is not advisable to hold eggs for hatching purposes more than 10 days before putting them in the incubator.
