Urge Reduced Tobacco Crop

GROWERS ARE WARNED THAT THEY ARE RAISING A 'LUXURY' AT A MEETING HELD HERE LAST SATURDAY EVENING

H. A. Hanemann, representative of the Pennsylvania Bureau of Markets, urged Lancaster county tobacco farmers to reduce their acreage and form a strong organization in an address delivered at a meeting of the Lancaster County Tobacco Growers Association held at Mount Joy Saturday night.

Marketing problems and experimental activities were discussed by Dr. S. W. Fletcher, director of research, and Prof. F. D. Gardner, head of the Agronomy department of Pennsylvania State College.

Local speakers said that big buyers were willing to pay 12 cents for the 1931 tobacco crop, but that growers were stampeded into selling for 10 cents on the first day. "This condition," Mr. Hanemann said, "is an urgent reason for cooperative action in our industry. Lack of organization is defeating your efforts to grow tobacco at a reasonable profit. An average of six cents a pound is not a reasonable price; you can't grow a crop for that, but it is natural for dealers to buy as cheaply as they can. That's the way of business."

Warns of Competition

Mr. Hanemann warned farmers they are growing a luxury and that no material improvement will be noted in the tobacco business until economic conditions improve. He warned, too, of competition from other producing districts including Porto Rico.

Answering criticism that the federal-state crop forecast for 1931 was "misleading" the speaker said that such reports are based on actual information. He added that the annual forecast for Pennsylvania tobacco will be discontinued if growers so desire.

Growers reported that about half the 1932 crop is planted and that the acreage is about the same as last year. Frost nipped some young plants early (Turn to page 8.)
