Probably the largest small mouth bass ever caught in this vicinity was landed from the river at the mouth of Chickies creek Thursday evening by John Rollman, Marietta street. The fish weighed seven pounds exactly. Not in years has a bass anywhere near his size been caught around here. Some five pound bass have been caught but they were few. Four pounds is considered extra large. Last week an angler landed one weighing six pounds and four ounces from the Yellow Breeches creek in Cumberland county. Fish Commissioner O. M. Diebler said of that one that it probably was the largest fish of its species ever caught in Pennsylvania.

The fish caught by Mr. Rollman was almost twenty-five inches long. It was 17 inches in circumference at the thickest part of the body. Its mouth was so large that the closed fist could be put down its throat without any trouble and its tongue was as big as a man's. Mr. Rollman caught the bass on a plug. In describing the battle it put up he related how it jumped clear of the water seven times in an effort to shake out the hook. Using a five ounce split bamboo casting rod with light tackle it took forty minutes to land it. Shortly before landing the seven pounder Mr. Rollman also caught one weighing four pounds. Loren Somers, also of town, was fishing with Mr. Rollman at the time and he too was quite fortunate as he landed a 2 1/2 inch pickerel.

Save Young Pines Insect pests attack trees as well as farm crops. Watch the tops of small white pines. If the needles begin to wither on last year's growth, doubtless the white pine weevil is present. Control measures should be practiced. Your county agent will gladly furnish this information.
