### Motorists Paying Heaviest Taxes Ever Levied Upon Transportation

AMERICAN motorists, constituting roundly one-fourth the population, pay in addition to general taxes probably the heaviest special levies ever imposed upon any form of transportation!

The chart, compiled from au thentic statistics, tells the story of the virtually unbroken upward trend of motor vehicle taxes to a new record total estimated at \$1,-085,000,000 in 1932. This is 6% above the 1931 total, \$1,025,000,000, and 17% above the 1929 total,

Railroad tax accruals, representing taxes upon the only comparable mode of transportation, have been declining since 1929, the 1932 total being \$280,000,000, or 9.1% less than in 1931 and 30.5% less than in 1930. The decline here was due to lower gross revenue and net income, but motor vehicle taxes generally disregard either valuation or use and thus, while 8.9c of every railroad revenue dollar in 1932 went for taxes, the gasoline tax, one of 27 levies imposed upon motor vehicles, took 29c from every gasoline dollar.
