Development of Tobacco Crop

EXPERTS CLAIM IT MAKES TWO-THIRDS OF ITS TOTAL GROWTH IN PRACTICALLY FOURTEEN DAYS

For a crop to make one-half of its total growth in fourteen days is no ordinary feat. However, the tobacco crop does exactly that during the middle of its growing period. This fact becomes even more significant when it is realized that most types of tobacco have one of the most restricted root feeding systems of any farm crop, with a central root and short lateral feeder roots usually bunched within a radius of not over 18 inches. Moreover, the tobacco plant removes more plant food from the soil per pound of dry matter than do any of the other common farm crops.

Quality and yield spell profit for the tobacco grower. Even the most fertile of soils are unable to meet the plant-food demands of the fast-growing root-restricted tobacco plant. During its (From page 6)

Big Air Circus Here on Sunday

AIRPLANES AND AUTOGIRO TO ENTERTAIN FOLKS AND CARRY PASSENGERS—THERE WILL BE A PARACHUTE JUMP, ETC.

Everybody sit up and take note! Big circus coming to Mount Joy! All are welcome. Where is this circus? On the field owned by John Melhorn, proprietor of the Melhorn Fruit and Poultry Farm, along the Marietta Pike, a short distance from town.

Yes, indeed, we are having a real circus, but not one of wild animals, acrobats, clowns, etc. This will be more thrilling—this will be one of those much talked about air circuses and will be the first one ever witnessed by the greater part of our town.

The air circus will come to Mount Joy to the above mentioned field Sunday, July 16, both afternoon and evening.

All available ships will be flown here in formation from the Lancaster airport.

Mount Joy and other towns will turn out 100 percent to see airplane demonstrations in stunting, parachute jumps, etc.

The autogiro, privately owned by the Gardien Spot Motor Company, of Lancaster, will be here for demonstration and passenger trips. (Turn to page 5)
