(From page 1)

well filled display of farm products in every department.

The entertainment committee reported that something new will be inaugurated on the opening night of this year's show. A speaker's stand will be erected on South Market street somewhere near Main and County Agent Bucher has been engaged to open our show by making an address. A band will furnish music.

The committee on booths reported a large amount of space already engaged in the various buildings.

The committee on catalogue reported that the business men are patronizing it and same will soon be ready for the printer.

The committee on advertising is making quite an effort to give the exhibit wide publicity which will indicate a banner attendance.

Even though the association got off to a late start, everybody is working like a beaver to make this year's exhibit the banner fair of the eleven years.

MELLOWED 80 MILLION YEARS

While the Brontosaurus browsed in OKLAHOMA

Millions of years ago—even before the ancient Brontosaurus lived—Nature formed the Cambro-Ordovician oil pool in Oklahoma. Today this oldest of Mid-continent crudes is piped to the great Sinclair refineries where it is refined, blended, de-waxed, freed from petroleum jelly and made into Sinclair Opaline—a product resulting from 80 million years of filtering and mellowing. Try a crankcaseful of Sinclair Opaline—note how it stands up in the heat of fast driving. Note especially at draining time how little oil has been used up—positive, visible proof of protection for the last mile as well as the first!
