Why doesn't everybody buy the new Pontiac?"

The other day, in the deepest sincerity, an owner said to us—"Why doesn't everybody buy the new Pontiac?"

Do you know what prompted this question?

This owner had simply learned what we have known since we built this car, namely-

-that if everybody were completely familiar with the advantages of owning the new Pontiac, almost everybody would want it.

Suppose, briefly, that everybody knew such facts as these-

-that Pontiac is really a big car, with a wheelbase of 117 inches, and a Fisher body that is most generously roomy-

-that Pontiac has a big, smooth, powerful straight eight engine—really the equal, in every way, of the very finest power plants-

-that Pontiac has "Knee-Action" wheels as developed by General Motors, which are far different from the independent springing devices offered on other cars in the field-

-that Pontiac has big, smooth, powerful Bendix mechanical brakes—unexcelled by any brakes for safety and ease of action—

-that Pontiac is a product of the General

Motors Corporation-the foremost automotive organization in the world-

-that Pontiac is really almost as economical, both to buy and to operate, as any car you can name . . . including even those that are designed primarily for economy-

—that not more than three or four stock cars in America can pass a Pontiac on the road—and these only on miles and miles of straightaway—

-that Pontiac is really the surprise car of the year, with far more specific things to recommend it than any other car at its price-

-and, finally, that Pontiac is one of the two most beautiful cars in the world . . . absolutely regardless of cost!

Yes-if everybody actually knew these thingsknew them, that is, as we know them-we believe that just about everybody would want a new Pontiac.

If we're right in this assumption—you want a Pontiac-for you've read the facts here, for

Are we right?

Then come in. We will be delighted to prove to you the full truth of every single statement made in this message.

PONTIAC

SURPRISE CAR OF THE YEAR

HASSINGER & RISSER

120 S. Market Street, ELIZABETHTOWN, PA.

Rules for Bank Customers

The following Rules will be the means of saving a great deal of time and annoyance—by not following

Rule 1—If you have any business with a Bank put it off until 3 o'clock, or if possible a little later, as it looks more business-like to rush in as the

Bank is closing. Rule 2-Never put stamps on your checks before you get to the Bank, but give the Teller two cents, and ask him to lick it and cancel it for you; the Teller expects to lick all the stamps, and it is a source of dissappointment to him when people insist on doing it themselves, and will save him buying his lunch.

Rule 3—In depositing money, try to get it up-side down and wrong end foremost, so that the Teller may have a little exericse in straighten-

ing it up before counting it.
Rule 4-It is best not to take your Bank Book with you, but call at another time and have it entered. You can thus make two trips to the Bank where one would answer.

Rule 5-If a check is made payable to your order, be careful not you and wait while you endorse it; this helps to pass the time and is a pleasure and relief to the Teller.

Rule 6—If a check payable to your

order is drawn on a Bank where you are not known, and the Teller asks you to get yourself identified, be sure and treat this request as an insult, and do not fail to get very "mad" about it. He will then think you are a Judge or a Member of Congress, and feel ashamed at not recognizing such a notable person.

Rule 7—You can generally save

time when making a deposit, by counting down your money to the Teller, as you can nearly always count more speedily and correctly than he can.

Rule 8-If you can make a deposit of \$100 and give a check for \$50 it is a good thing to call frequently at the Bank and ask how your account stands, as it impresses the officers favorably with your business quali-

Rule 9—Never keep any record when your notes fall due; and then if they are protested, censure the Bank for not giving you notice.

Rule 10-Always date your check ahead; it is a never-failing sign that you keep a good balance in Bank; or if you do not wish it generally known that you are doing a good business, do not deposit your money until about the time you expect your check will be in.

Rule 11-When you order back a collection, be sure and not give the amount or the day when it is due, as it gives the Bank officer a chance to look over all his collection books in finding it, and impresses him with the idea that your transactions are so immense that you cannot keep an account of them.

A strict observance of the foregoing rules will make your accounts desirable for any Bank, and make you a general favorite with all the

SOME SAY ITS BETTER;

We reprint this from one of our ex-

In 1890 this writer drew a salary of less than \$10 a week. My work was writing copy, doing job printing, setting ads and doing general newspaper work. Wheat was 75 cents a bushel, there were 5-cent loaves but we did our own baking. Our house rent was \$5 a month. Beef cattle sold for 2 cents on the hoof, hogs at about 3 cents, but we got the best cuts for 10 cents, and we had meat twice a day. Wool sold at the farm at about the same price it is sold today and you could buy the

best suit in the house for \$10. There were five in our family, and I felt chesty in the fact that I could afford a bicycle. During those days I saved enough money to buy a modest home. No one stepped on the gas then and rammed a V8 or his tin Lizzie into a farmer's hayrack and expected the farm as an offset for damage. We stayed at home all through the week and on Sunday afternoon took a walk down the railroad track. We had never tasted of the bitter or sweet of modern fare. We more than broke even, and we were happy. There is a change now. Some say it's better and some say it's worse.

MAYTOWN

Miss Lizzie Brandt spent several days at Lancaster with friends. Miss Anna Albright spent several days at Marietta, the guest of Mr. and Mrs. Robert McKain. Mr. and Mrs. Bayard Brandt of

Lancaster visited Mr. and Mrs. James F. Johnstin on Thursday. Mr. and Mrs. John Newton, of Haddon Heights, N. J. are visiting Mr. and Mrs. Eli L. Hoffman.

Lenten services will be held at the Reformed church, Thursday evening. The sermon will be delivered by Rev. W. N. Wright, of Columbia.

The Sunshine Bible class of the Reformed Sunday school entertained the Golden Link society of Zion Reformed church Marietta, and the young people of Maytown Reformed Sunday school at a Valentine party. Decorations were in keeping with the season, a program was rendered and games played. Refreshments were served to sixty-three guests.

Don't forget the old saying that he laughs best who laughs last. You're wrong; it's he laughs best whose laugh lasts

PULLETS REQUIRE FROTEIN IN FEED

Normal Development Should Be Chief Aim.

Poultrymen cannot make up for a deficiency in breeding by cutting down the protein in the feed to delay early laying, says Prof. L. C. Norris of the New York state college of agriculture Tests at Cornell show that pullets need from 14 to 15 per cent of protein in their feed during the period from twelve to twenty-four weeks of age. When less protein was fed, laying was delayed for about ten days and the growth of the pullets was retarded.

Poultrymen need an early-maturing

type of pullet of proper size and vitality which lays as large an egg as that laid by a pullet which starts to lay at a later age. Such a pullet is cheapest to grow, because she uses relatively less food for maintenance and more for growing in the non-proto endorse it before handing it to the Teller, but let him return it to ductive period than does the slower growing bird. A pullet which reaches a weight of three and three-fourths pound at five months of age and begins to lay, is cheaper to grow than the pullet that takes six months. More over, he says, the early-maturing pullets lay more eggs in a year than the slow-growing birds. Size of bird, size of egg, and vigor must be considered in breeding the flock, along with early

> Poultrymen should feed and manage the pullets to keep them developing normally, he advises. Do not lower the protein content by feeding more than 50 per cent of scratch grain or by cutting the protein content on the mash. Induce the flock to take exercise, and cull out the small-sized, rapidly-maturing pullet that develops red comb early.

Much Valuable Feed Is

Blown Away by the Wind Saving poultry feed would seem to e a penny-wise and pound-foolish policy, as usually understood. When one speaks of "saving feed" he usually re fers to cutting down on the grain and mash fed the growing chicks or hens, with the hope that the birds will be able to pick up additional feed around the yards or in the fields to make up what the owner does not give.

There is another method of "saving feed" that is commonly overlooked, the saving of which is much more real That is, to feed the grain and mash so that little is wasted and unused.

Probably none achieves the ideal whereby none is wasted, unless one feeds only whole grain and scatters it on bare ground in such limited quantities that it is cleaned up in a minute or two. Feeding dry mash calls for adequate feeders.

In feeding cracked corn, many farmers have a considerable portion of finely ground corn in the grain as it comes from the mill. Scattered on the ground, this finely ground portion is largely lost. Dumping the cracked corn and wheat in the mash feeders works nicely and saves this finely OTHERS SAY ITS WORSE ground corn, since it blends with the mash after the coarser portions are eaten.

Another source of wastage in mash is having it blow away. Whether the feeders are inside with the windows open, or outside, they need protection from wind. A surprising amount of mash can blow out of an open feeder during a windy day.

Green Feed for Hens

Feeding the laying hens green feed tends to keep them in good health and to promote egg production, says the United States Department of Agriculture. Green feeds are one of the best sources of vitamins for poultry. Mangels and turnips provide some succulence, but very little green feed. When cabbages are available at rea sonable cost some may be fed, but good quality alfalfa also should be supplied. Alfalfa is valuable, not so much because of its protein content, as formerly believed, but be cause alfalfa leaves are rich in minerals and vitamins, which are lacking in the mash ration. Alfalfa leaf meal is a good substitute for fresh green

POULTRY FACTS

North Carolina farm families consumed 8,330,000 chickens in 1932 and sold 5,010,000.

Yeast adds to the cost of a poultry ration, but does not improve the nutritive value of a good ration.

The fact that a hen's egg is composed of two-thirds water indicates the importance of having a supply of clean water before the biddies at all times.

Furnish the hens with nests about a foot wide and two to three feet deep, filled with shavings. The nests should be darkened. . . .

It is estimated that the poultry industry uses almost eight times as much grain yearly as the brewing industry used in the year 1917.

Feeding milk to hens is very easy. as it is given simply as a heverage No water should be given, but the milk supply should be available at all times.

Baked Ham Supper

The Ladies' Aid and the Missionary Society of the Evangelical Congregational church will hold a baked ham supper on Thursday, March first, from 5 to 9 P. M., at the home of Mrs. Irvin Geistweit. Tickets for the supper will
