

You Can Depend On The Man Who Advertises

NINE times out of ten you will find that the man who advertises is the man who most willingly returns your money if you are not satisfied.

He has too much at stake to risk losing your trade or your confidence. You can depend on him.

He is not in business for today or tomorrow only—but for next year and ten years from next year. He knows the value of good will.

You get better merchandise at a fairer price than he could ever hope to sell if he did not have the larger volume of business that comes from legitimate advertising and goods that bear out the promise of the printed word.

Don't miss the advertisements. This very day they call your attention to values that tomorrow you will be sorry you overlooked.

"I work all the time and feel strong . . ."

You Can Escape Periodic Upsets

Women who must be on the job every day need Lydia E. Pinkham's Tablets. They not only relieve periodic pain and discomfort . . . they help to correct the CAUSE of your trouble. If you take them regularly . . . and if you are not a surgical case . . . you should be able to escape periodic upsets.

Chocolate coated . . . convenient . . . dependable. Sold by all druggists. New small size—50 cents.

"I am 27 and a textile winder in the mill. I had cramps so bad that I had to cry many times. I used to stay in bed two days a month. Lydia E. Pinkham's Tablets helped me wonderfully. For the first time in my life I do not suffer. I can work all the time now and feel strong.—Mrs. Bennie Coates, 1963 Terrace St., Muskegon, Mich.

OWL LAFFS

BY A WISE OWL

A well known man from Bainbridge pulled a fast one on Monday night and some of you other married men might try it some time. He says: "I went home quite a bit under the weather last night and my wife didn't suspect a thing." When asked if she couldn't smell his breath, he answered: "That's just it. I ran the last block home and when I got to her I was all out of breath."

I won't tell you who it was, because if you try it and it doesn't work, and you get the old rolling pin act from your wife you might want to get back at the guy who suggested it.

One of our local physicians told one woman she must walk after each meal, so now, she takes all her meals at a cafeteria.

While passing a little love nest on Donegal Street I heard the man of the house say: "Didn't you promise at the altar to love, honor and obey me, wifey?" And his wife answered: "Goodness knows what I promised! I was listening to hear what you promised."

Girls who used to flag the trains with their petticoats now have to let the trains crash together head on.

A young bride was boasting of her good fortune of having a perfect husband and she said: "I have a wonderful husband." The divorcee to whom she was talking, sarcastically exclaimed: "Just beginners' luck."

No matter how natural they look, wigs always give false impressions.

Our local dumb Dora told me that she always thought a football coach was the carriage the players rode in to and from the football games.

I met a man from Florin who had the best reason for not going to church that I have ever heard of. On Monday when the minister saw him he asked: "Why don't you come to church any more?" The man, very frankly answered: "For three reasons: Firstly, I don't like your preaching; secondly, I don't like your singing; and thirdly, it was in your church at a church party that I first met my wife."

And that, dear readers, is something to get mad about.

One hears a lot about Byrd's hardships, but nothing of the comfort of opening the front door and not having a blizzard of handbills blow in.

During his wife's absence, a fellow from Salunga was "hatching" it. Having a fondness for soft boiled eggs for breakfast, he decided to make some, his first morning alone. Not having a clock or a watch that was running to time the eggs he was at a loss to know when they were cooked. He suddenly hit upon an idea. He put the eggs on the stove, called long distance on the telephone and when the operator told him his time was up, (three minutes being the allotted time for a long distance call without extra charge) he took the eggs out of water and they were perfectly done.

That, housewives, is household efficiency. It is lots cheaper to phone long distance than wind a clock.

Even when parents know their children are bad they don't want anyone else to think so.

Speaking of housewives here's a little household hint for today. Attack a short wooden handle to your poodle dog and he will make you a very convenient mop for washing pots and pans.

Last Saturday night Johnny Charles said to his girl friend: "A penny for your thoughts." She said: "What do you think I am, a slot machine?"

Hearing a chap say that during his vacation he "hit all the high spots" doesn't necessarily mean that he has been on the mountains.

A stranger walked into a certain newspaper office in a nearby town and the office boy said: "The editor is loaf-

Brazil Rain-Drenched in One Part; Dry in Other

Geographically, Brazil is divided into two great sections—the plateau country in the East, which includes nearly one-third of its territory, and the great interior tropical plains, drained by the Amazon system and in a smaller degree by the Rio de la Plata tributaries. The country lies almost entirely in the torrid zone, observes a writer in the Kansas City Star. In general it is a tropical country, with subtropical and temperate areas in the South and in the central plateau region. The forest-covered lowland valley of the Amazon is a region of high temperatures which vary little throughout the year. There is no appreciable change of season except in the variation of rainfall. The coastal plains lying between the plateaus and the sea are subject to high temperatures and humidity as far south as Santos.

The varied rainfalls are one of the peculiarities of the climate of torrid Brazil. Whereas three years may pass in the northern state of Ceara without rain, other sections are drenched for months with tropical downpours. The country is fortunate in being free from the earthquakes and hurricanes so common along the great Cordillera from Chile to Mexico and in the Caribbean countries.

Coffee is found chiefly in the temperate plateau regions and in southern Brazil. This is the principal source of Brazil's wealth, with the states of Sao Paulo and Matto leading in production. The latter has an area of 530,000 square miles and is the principal cattle state of Brazil.

History of Letter "P"

The letter P, the sixteenth letter of our alphabet, was written in the Phoenician from right to left, according to an authority in the Chicago Tribune. It is interesting that, although the Greek alphabet is generally considered to have descended from the Phoenician, the Etruscan and Umbrian symbols for P more closely resemble the Phoenician than they do the Greek symbol. The early Roman form of the letter was similar to the Greek, but as time went on the form became more and more rounded. It was not until imperial times, however, that the semi-circle was completed and the letter had reached the form it now retains. The sound represented by the symbol always has been the breathed labial stop.

The letter Q was in the earliest Greek alphabets the symbol koppa, which was retained in Ionic Greek merely as a symbol for the figure 90. The pronunciation in Greek is the same as K. In Latin Q is commonly used in combination with U pronounced as W before a following vowel as in the English quill. The letter R, called rho in Greek, often was written in early Greek alphabets as D, which caused confusion between the two letters. No consonant has a more varied pronunciation than R. The letter S, called sigma in Greek, also has a varied pronunciation. It may be sounded as sh, as Z, or as a hiss.

More Millions For Ford Plant

Expansion gives 7,500 ton daily steel capacity.

The construction of two huge steel mills costing \$12,000,000 including the expansion plans announced last week, is being interpreted by the press of the country as a step by Ford towards independence of the steel corporations as a source of supply.

The new mills will require eight months to complete, give employment to 500 additional men, enable the Ford factory to produce 3,000 cars a day without buying a pound of steel in the market.

Buildings costing \$650,000, machinery and equipment total an additional investment of 36,000,000; the sum represented by the two mills.

About 229,400 square feet of space are provided for in addition to the 64,500 square feet in the present mill. The increased facilities will furnish the 36 different kinds of steel required in the manufacture of Ford products.

Fifteen hundred added tons daily will give Ford a capacity of 7,500 ton total tonnage. The present Newton mill at Monroe is geared for a 6,000 ton production per day now.

Caissons are already being sunk for foundations of the two big new mills to be erected east and west of the present open hearth steel mill buildings. The east mill will supply cold strip in sheets up to 84 inches in width; the west, hot strip, 48 inches wide.

Criminology Research Cesare Lombroso, famous criminologist of the late Nineteenth century, founded criminology as an independent subject of research. The study of crime is conditioned by the difficulty in gathering significant statistics, the changing concepts of crime and by the fact that each country decides for itself of what crime consists. Social, environmental and individual influences are very complex, and criminologists do not consider their results conclusive.

Heard while passing an open window on Main Street, wife: "I was a fool when I married you?" Hubby, agreeing: "I knew that but I thought you would improve. However, now I realize my mistake"... you can judge for yourself what happened after that.

Some people wash their faces Each mawnin' in de sink— Ah use a drinkin' fountain, And does it while Ah drink. A WISE OWL

"THAT LITTLE GAME" — A PHILOSOPHER

WHEN I HEAR A GUY SAY HIS WIFE WONT STAY FOR THIS OR THAT I KNOW THAT SHE'S TO BLAME. — NOW MY WIFE AND I CAME TO A LIL AGREEMENT AND IT WILL WORK OUT AS SUCCESSFULLY WITH ANY OTHER COUPLE. — MY WIFE PLAYS "BRIDGE" EVERY WEDNESDAY AFTERNOON. — EVERY WIFE SHOULD HAVE SOME SUCH RECREATION; — AND I PLAY "POKER" EVERY SATURDAY NIGHT. — EVERY HUSBAND SHOULD HAVE SOME SUCH RECREATION. — NOW THEN, IF MY WIFE COMES HOME LATE FROM "BRIDGE" AND KEEPS ME WAITING FOR MY SUPPER, I DONT JUMP ALL OVER HER, I GIVE HER A SMILING LIFT, — AND IN TURN MY WIFE MEETS ME WITH A SMILING COUNTENANCE WHEN I GET HOME LATE FROM A LIL GAME. WHEN I TAKE CIGARS HOME FOR MYSELF I ALSO TAKE WIFEY SOME CANDY. — YOU'VE GOT TO EVEN UP WITH YOUR WIVES.

FELLAS. — MATRIMONY IS FULL OF JOY WHEN YOU MAKE IT A FIFTY-FIFTY PROPOSITION, BUT IT'S ALL WRONG WHEN YOU TRY TO MAKE IT SEVENTY-THIRTY WITH YOUR WIFE ON THE SHORT END.

I'LL BET HE'S GOIN' INTO POLITICS AND IS CHIRPIN' FOR THE FEMALE VOTES.

IF YOU HAD MARRIED WHAT I DID YOU WOULDN'T TALK THAT WAY, JOE.

YOU WIN THE PERFUMED BALLOTS.

Smoky Substitutes Long Used Before Glass Lamps

The story of lamps and lighting is a long one and that part of it that deals with the early settlers in New England holds many interesting features, notes a writer in the Detroit News. One of them is the betty lamp, which was really a boat-shaped iron vessel with an open Wick. This, however, was burned sparingly, for it gave off a rank-smelling smoke and the glow was so feeble that it was of little assistance.

About the same time candle-wick, a resinous pitch pine, was cut into strips for lighting. It was more practical, as it burned brightly, but there was still the problem of the dense smoke.

Rush lamps were also used, because they were easy to obtain, being nothing more than cut-off-nine-tails braided or bundled and soaked in oil or tallow. Bayberries, as well as the fat of wild animals, were used when tallow was not obtainable because cattle were scarce. Candles were used only for special occasions.

After putting up with all of these inconvenient methods of lighting, the coming of the Sandwich glass lamp was welcomed by the housewives of the early days. By 1800 the glass lamp was in general use.

Cinderella's Slipper

Although the folklore of many lands contains the inspirational story of Cinderella's romance, the different versions are not legends but variations of a romantic and true incident in the life of Rhodopia, the "rosy-cheeked queen" of Egypt, who reigned 2,000 years before the birth of Christ. History relates, writes G. R. Turner in the Kansas City Times, that on a certain day in that distant past Rhodopia was bathing in the Nile when a strong gust of wind carried off one sandal and laid it at the feet of the Egyptian king, who was presiding over a court of justice almost a mile away. The daftness of the sandal so impressed the king that he offered a reward for knowledge of the owner's name. Rhodopia claimed the reward, courtship followed, and soon she was queen of Egypt.

Queen Christina

Christina, queen of Sweden, was born in 1626. Her father died when she was six years old. She became queen in her eighteenth year. Urged to marry, with her cousin, Charles Gustavus, suggested as the most suitable consort, in 1650, she appointed Charles her successor. She soon desired to abdicate in his favor, and finally did so in 1654, leaving the country in male attire, under the name of Count Dohna. She embraced the Catholic religion and lived for many years in Rome, dying there in 1689.

Criminology Research

Cesare Lombroso, famous criminologist of the late Nineteenth century, founded criminology as an independent subject of research. The study of crime is conditioned by the difficulty in gathering significant statistics, the changing concepts of crime and by the fact that each country decides for itself of what crime consists. Social, environmental and individual influences are very complex, and criminologists do not consider their results conclusive.
